LONDON, ONTARIO, MAY 13, 1915.

No. 1181

Style "S"—Short bowed stay in lower half, exactly as shown

Style "L"—Long stay on wood scantling and posts

## Farm Homes Made Beautiful

THE coming of spring and summer means a brightening up and an improvement to your house and surroundings. Let us help you do it. Your lawn may be well kept, and with everything in good shape; but there is added value and good appearance in a strong and neat wire fence.

## Frost Improved Lawn Fence

is artistic in design and handsome. It is faultlessly woven on the latest automatic power machine—the only one in Canada.

Laterals consist of two well-galvanized No. 13 wires, tightly cabled and firmly interlocked with the evenly-spaced stays.

**Galvanized! Not Painted!** Herein is the great difference between Frost Improved Lawn Fence and others. It is heavily galvanized, and requires no painting; in fact, stands the weather better than any painted fence made, is fully rustproof and does not require attention every year like painted fences.

Of the two styles shown above, Style "L" has stays  $2\frac{7}{8}$ " apart, while Style "S" has stays the same at the top, but only  $1\frac{3}{8}$ " apart at bottom. A third Style "LP" has stays spaced  $1\frac{3}{8}$ " top and bottom. Best service-giving lawn fence ever offered.

**Frost Improved Lawn Fence** on 2" iron posts set in cement, and iron top railing, makes a beautiful and permanent job.

**Write for Illustrated Folder** We make all styles of gates with filling to match, as shown above.
