

A POWER on Every Farm

THERE should be a power of some kind on every farm. It saves labor, time and money, and increases the earning capacity of the farm. It will work the raw material of the farm into a finished product. All up-to-date farmers agree that the modern gasoline engine is the best farm power. Our I. H. C. gasoline engine is the best gasoline engine. It is strong, durable, long lived and is of full rated, actual (not estimated) horse power. It is easy to operate and is easily kept in working order. It develops the maximum of power with the minimum of fuel. I. H. C. gasoline engines are made in the following styles and sizes:

Horizontal—(Portable and Stationary), 4, 6, 8, 10, 12 & 15 Horse Power.
Vertical—2, 3 & 5 Horse Power.
 Specially adapted to cutting dry fodder and ensilage, husking, shredding and shelling corn; threshing and grinding feed; sawing wood, separating cream, pumping water, etc. Indeed there is no service required of a power that will not be performed most satisfactorily by this engine. If you are not intending to purchase an engine now, you may want one in the future and really ought to know more about them.

U.S. Cream Separator

Oscoda, Ia., Jan. 15, 1906. 6

After trying different makes of cream separators I decided to buy a U. S. as it is the easiest to clean, built most solid, and I believe will last me as long as I live. Have had my separator over two years, and it has made me \$20.00 more a year per cow than I made before. I figure that my calves raised on U. S. Separator skim milk pay for keeping my cows.

The cream is clear profit. I make over \$40.00 a cow clear a year. I don't feed any grain, so I consider I am doing well. If I didn't have over 12 cows I believe I could get good interest on my investment if I had paid \$200.00 for a U. S. Separator. I keep books, so there is no guess-work about it.

T. G. Armstrong."

What the U. S. has done for Mr. Armstrong it will do for you. Write now for a copy of our big handsome 1906 U. S. Separator catalog which tells how and why. Address—

PAYS DOUBLE PROFIT

The Strangest Fencing

Anchor Fencing

Every wire—of hard galvanized steel—is a strand of strength.

Every clamp (the famous, non-slipping, 1-inch, japanned or galvanized steel Anchor clamp) irresistibly re-inforces each crossing wire.

Every ratchet, securing the ends, yields automatically to strain—rendering the fence invulnerable to storm, frost and pressure.

Horse-high—dog-tight—bull-proof. Not woven with fence machines which can only use light wires. Anchor Fences are constructed with Nos. 7, 8 or 9 uprights.

Our agent will construct it, or supply all materials, if you wish to employ your own labour. Send for catalogue. Many plain and ornamental designs. Also farm and garden gates. Agents wanted.

ANCHOR FENCE CO., Stratford, Ont.

Large number of improved Farms in Brandon District.

WESTERN CANADA LAND CO.

Head Office: 38 Ninth Street, BRANDON, MAN.
 P. O. Box 38. Long-distance Phone 326.

We are Canadians with over 26 years' experience in Western Canada, a large portion of this time spent farming, have travelled extensively through the West. We therefore claim to know the land and its producing possibilities.

YEARS WEAR NO REPAIRS

SEPARATOR FACTS

43

YEARS WEAR 75¢ REPAIRS

Just facts—that's all you want. Facts can't hurt you nor Tubular Cream Separators. Facts prove Tubulars outwear all other makes five to ten times over.

On August 2d, 1904, we started a No. 9 hand driven Dairy Tubular, rated capacity 900 lbs. per hour, on the hardest test a separator was ever put to—an endurance test to last until the wearing parts give way. This Tubular has now run 50 hours a week for 43 weeks—and is still running. Every week of this test is equal to a year's service in a ten cow dairy. No other separator made could stand such a test.

24 Years' Work—No Repairs		43 Years' Work—75¢ Repairs	
Hours run.....	1,200	Hours run.....	2,150
Pounds separated.....	1,000,000	Pounds separated.....	1,925,000
Turns of crank.....	5,155,760	Turns of crank.....	5,652,070
Turns of bowl.....	1,152,000,000	Turns of bowl.....	1,844,000,000
Oil used.....	8 quarts	Oil used.....	5 1/2 quarts
Time oiling.....	About 4 min.	Time oiling.....	About 7 min.
Time adjusting.....	None	Time adjusting.....	10 min.
Repairs.....	None	Repairs.....	75 cents

After 24 weeks, the balls in the frictionless bearing supporting the bowl showed wear. This was natural, for each had rolled over 32,000 miles. Renewing balls cost only 75 cents and ten minutes adjusting, yet made this Tubular as good as new. All Tubulars are equally durable. Catalogue P-193 tells about them. Write for it today.

CHATHAM BOLSTER SPRINGS

AS THEY APPEAR WHEN MOUNTED.

Make a farm wagon a spring wagon, and no farmer can afford to be without them. They take away the "jars" and "jolts," making it easier for the horses and the man.

Make the life of the wagon much longer and look better, and the cost is small.

MADE ONLY IN TWO LENGTHS.

40-inch Bolster will adjust to 38, 39 and 40.
 42-inch Bolster will adjust to 40, 41 and 42.

Capacities from one thousand to ten thousand pounds. Price on application.

MADE BY

DOWSLEY SPRING AND AXLE CO., LTD.,

CHATHAM, ONTARIO.

NOT HOW CHEAP, BUT HOW GOOD

DILLON FENCE, with ordinary attention, will serve for generations to come. Steel contracts and expands in cold and warm weather. During this process the ordinary fence wears out because care has not been taken in selecting suitable wire, properly put together. A number of factories now in the business are experimenting with different locks and wires, and at the farmer's expense. The **DILLON FENCE** is firmly established, and is made of the best **High-Carbon Coiled Hard Steel Strand Wires.** The coils form the spring that keeps **DILLON FENCE** tight and true in every condition of temperature and abuse. Write for our free illustrated booklet and estimates. **Good agents wanted.**
