stiended this Institution has induced the Directors to REDUCE the RATES originally required in British North Americs to the ordinary European Rates. The result of such Reduction is to enable parties to avail themselves of the important benefits of Life Assurance at much lower Rates of Premium than those of any other Assurance Company transacting business in Canada. The Directors have also resolved to extend to British North Americs the advantages afforded by the HALF CREDIT RATES at PREMIUM which have been so highly approved and are so generally adopted by Policy Holders in the United Kingdom. The most liberal conditions are likewise offered to he Assured in the limits to which they may proceed by see or land, to other parts of North America without affecting their Interest in their respective Policies.
