

Crops For Sheep

The wise shepherd in planning his crops for the year has regard to the needs of his flock. He recognizes the great advantage of providing not only a variety of foods but a succession of succulent crops the season through. Bulletin No 12, "Sheep Husbandry in Canada", published and issued free by the Live Stock Branch at Ottawa, takes up this subject in a practical and thorough manner. Under special crops for sheep it deals with clover, alfalfa, vetches, rape, cabbage, turnips, mangels, corn and the several classes of grain. Each is treated separately in regard to method of cultivation and manner of feeding. Dealing with vetches the bulletin says:

"Vetches, or tares as they are also called, make excellent fodder for sheep, either as a soiling crop or as cured hay. This crop much resembles pens in habit of growth and requires about the same kind of cultivation. Its vines are more slender than pea vines and stand up better when grown with a stiff variety of oats. Vetches are grown extensively for sheep in Great Britain, and to some extent in Canada for the same purpose. The writer while raising sheep, always grew a small area of tares with oats for coiling the show flock, and in case of a shortage of clover vetches were cured for hay. The crop being fine in vine and very leafy is much relished by sheep and constitutes a rich diet.

"Two varieties of vetches are grown for fodder. The common vetch is the chief sort cultivated, but the hairy variety is receiving some attention. The latter produces the heavier yield, but so far the seed having to be imported is very expensive and few care to bother with it.

"The soil for vetches should be clean, mellow and rich. The seed may be sown in drills or broadcast. A good seeding for either soiling or hay is about three pecks of vetches and four pecks of oats per acre. The vetches are ready to feed any time after the crop comes into blossom and before the seed commences to ripen. For soiling the crop may be hauled to racks, or be distributed on the sod of a pasture field as soon as cut, or it may be allowed to wilt in the swath for a few hours. Vetch hay is made in much the same manner as clover or timothy is handled. Vetches may be pastured by sheep, but this is a wasteful practice, so much of the crop is destroyed by tramping."

Sheep raisers who do not already possess a copy of this bulletin would do well to order one from the Live Stock Commissioner at Ottawa.

A POSITIVE CURE FOR INDIGESTION

If you have indigestion, your food ferments in the stomach and bowels. It does more; it decays, and the nutritious matter which should go to make new blood decays with it and this leads to an impoverished condition of the blood, to nervousness, biliousness, constipation, sick headache, bad breath which disgusts your friends, and other disagreeable and unpleasant conditions.

And all this trouble is caused by the food that doesn't digest, but ferments and oftentimes rots in the stomach.

And fermentation is caused by the stomach not being strong enough and energetic enough to thoroughly mix the food with the digestive juices.

M-I-O-N-A is responsible for tens of thousands of cures. In fact, it is such a positive cure for indigestion and all stomach troubles that it is guaranteed by the Alberta Drug and Book Co. to cure or money back. The price of a large box of M-i-o-n-a tablets is 50 cents, and they are sure to promptly relieve the worst case of indigestion or gastritis. Try them.
