Little or nothing for the present is being heard of our pulp mill and power scheme materializing. Both, however, are sure to come, as from a financial viewpoint they are backed with excellent business possibilities. The pres-

Was Personally Attended by Dr. A. W. Chase

Before He Became Famous as the Author of Dr. Chase's Receipt Book.

Here is a letter from an aged gentleman who consulted Dr. Chase, long before his Receipt Book attained a world-wide circulation or his family medicines became known to the ends of the earth. Like most people of advanced years his kidneys were the first organs to break down and when doctors failed to help him he remembered the physician who cured him of pleurisy in his younger days.

Mr. O. D. Barnes, R.F.D. 1, Byron, Mich., writes: "About fifty years ago, when living in Ann Arbor, Dr. A. W. Chase, the famous Receipt Book author, was called on to treat me for

pleurisy. Ever since that I have used and recommended Dr. Chase's Medicines, and have two of his Receipt Books in the house. "Some time ago a cold settled in the kidneys, causing backache, frequent urination, dizziness, and affected the eyesight. My appetite failed and I could not sleep nights. Two doctors failed to do me any lasting good, so I started using Dr. A. W. Chase's Kidney-Liver Pills and Nerve Food. The results have been highly satisfactory to me. Appetite improved, I gained in weight, sleep and rest well, and feel strong and well. My kidneys resumed their natural functions, and I believe that my cure was due to Dr. A. W. Chase's Kidney-Liver Pills and Nerve Food. I am 78 years old, superintend work on my farm, and can turn in and do some work myself."

The Oliver Kiding Cultivator stands in a class by itself, by reason of the fact that it is built right, with larger range of adjustments so it can be adapted to do good work under all conditions in the potato field. Oliver quality has a name the world over.

In Aroostook County alone sixty-five per cent. of the Potato Cultivators used are Oliver. The feature of the Oliver Cultivator that appeals to all farmers who have used it or have seen it at work is the excellent work that this implement does. By an ingenious arrangement the gangs are held parallel, and therefore always cut a uniform distance apart, no matter how far they may be shifted to the right or to the left. On the Oliver Cultivator neither of the gangs leaves an uncultivated strip between the shovels, nor does one gang cut a narrower width than the other when the cultivator is shifted to the side.
