FALLING.

That is what a great many people are doing.
They don't know just what it is, but they
have a combination of pains and aches, and
each month they grow worse.
The only sure remedy yet found is Davis' Quinine
Iron and Wine, and this by rapid and
thorough assimilation of the blood, purifies
and enriches it, and, rich, strong blood flowing
to every part of the system repairs the wasted
tissues, drives out disease and gives health and
strength.
This is why Davis' Quinine Iron and Wine
will cure Dyspepsia, Indigestion, Liver Com-
plaint, Malaria, Intermittent Fever, General
Debility, etc.

BURTON, S.W. CO., 17, 1883.
Geo. H. Davis:
Dear Sir,—I was a great sufferer from Dys-
pepsia, and for several weeks could eat nothing,
and was growing weaker every day. I
tried Davis Quinine Iron and Wine, and was
happy to say I now have a good appetite and
am getting stronger.

Yours,
JOSEPH McCAULEY.

UPPER CAVENDISH, YORK CO., N.B.,
July 25, 1882.

Geo. H. Davis, Esq.:
Dear Sir,—In answer to your letter of inquiry
relative to the benefit derived from Davis' Quinine
Iron and Wine, allow me to say that I con-
sider it a wonder, and the best tonic I have
ever used, having tried several others without
any benefit. I was induced to try your
Quinine Iron and Wine, and in now a
man, having gained by its use my former
strength and activity, and as for my appetite,
it never was better.

Very truly yours,
BLIJAH NAVES.

Davis' Quinine Iron and Wine is not a drink,
and does not contain whiskey. It is a simple
preparation of Iron and Quinine that causes no
irritation, either to the stomach or the bowels.
Ask for Davis' and take no other.

SHOEING HORSES.

There is no subject connected with
horses so poorly understood by the
masses as the formation and structure
of the foot, and what constitutes proper
shoeing. The large majority
of horse owners do not know how to
leave them to be shod as they see a
farmer, never asking whether he is
skilled in detecting irregularities in
shape, or diseases produced by im-
properly fitted shoes. The hoofs are
out, burned, soaped and filed accord-
ing to the fancy of the smith with-
out a word of explanation as to the
animal goes lame as we commence to
dress and bathe. A large per cent.
of the diseases of the feet and legs
are doubtless produced by improper
shoeing. No rule can be given to
govern in all cases. The structure
of the foot, manner of moving, and
work given the animal, form the basis
of the knowledge necessary in
order to shoe correctly. More atten-
tion is given to the looks of the job
when finished than to the comfort or
welfare of the animal. It is impos-
sible to lay down any rules, but it is
easy to say that horse owners should
be satisfied to have their horses shod
and fitted altogether too much, especially
at the heel, and that the fitting of the
hoof should not be allowed. It is also
safe to assert that the majority of
shoers make too narrow at the heel and
leave the hoof to be shod as they see a
farmer, never asking whether he is
skilled in detecting irregularities in
shape, or diseases produced by im-
properly fitted shoes. The hoofs are
