Teachers' Convention.

To-morrow in the hall of St. Bonaventure's College, a Teachers' Convention will be opened, under the auspices of the Newfoundland Teachers' Association. A goodly gathering of teachers are assembling in the city from all parts of the island, and a successful series of sittings may be expected. According to the program already published, teachers will direct their attention to many problems which affect school life, and the training of children.

We cannot conceive any discussions which are of greater importance to the future welfare of the land than the better training of children and the better training of men and women to do it. In addressing the students of the Normal School at Truro last Tuesday, the Rev. Dr. Borden said:

"Canada wants men and women strong in body, pure in mind and possessed of the best education and the highest ideals. Men not alone with strength to lay rails, but to direct that strength to the best advantage; men to plan and dig canals, to disembowel mountains, to finance industries and cast railways into virgin territory. Men and women are needed to impart to the youth knowledge which will lead them to discover how great the things are, trained men may accomplish.

In like manner teachers are needed to inspire the young toward attaining the profession of higher political life; toward making men and women cultured and refined; to make the home a paradise; and to know that whilst in the doing of this they were doing a nation's work—elevating it and placing Canada amongst the loftier pinnacles of national greatness."

What Canada wants in this connection, Newfoundland needs. Better training for teachers, greater opportunities for development during their teaching life, means to live a fuller life to keep abreast of educational improvements elsewhere. If the

Twentieth Century is to be the children's century in Newfoundland, more attention must be paid to their school teachers.

Deserters Cause Delay.

The American banker Goslip, which arrived here last week to put a man in hospital, was to sail for the Banks Saturday, but some members of the crew left the vessel and would not return, while the others we hear, refuse to go in her while she is thus short-handed. It is difficult to get men here to fill the places of those who have left, the vessel is still in port with no immediate prospect of sailing.

Vessel's Narrow Escape

The English schooner "Mary Annie," Capt. R. Jones, arrived here this morning to A. S. Rendell & Coy., sail laden from Cadiz, after a run of 27 days. The vessel had variable weather on the run out and it was marked by no incident of special moment until Saturday afternoon when she narrowly escaped being cut down and sunk by the S. S. Florizel after that ship left this port for New York. It was very thick at the time and the "Mary Annie" kept sounding her fog horn and those on board could hear the sound of the Florizel's whistle coming nearer and nearer. The belief on the schooner is that the officers of the ship could not hear the "Annie's" horn owing to the noise created by her own whistle and the rapidly revolving propeller. The Florizel whose name could be distinctly seen shot flying from her bows went over the schooner's deck. The incident occurred just off this port but fortunately it terminated without damage.

Police After Evans.

Saturday we noted the fact that a strange man was seen at Horse Cove during last week asking for bread, and today we learn he was at Broad Cove. The police were also made aware of this fact, and from the appearance of the man it is believed to be the escaped prisoner Evans. The police went off in carriages to Broad Cove to-day, and if it is Evans he will certainly be captured.

An Auto Accident.

Shortly after noon to-day as chauffeur Otto Oppelt with another chauffeur on board was driving up Water Street in Mr. W. D. Reid's automobile, the car met with an accident which narrowly escaped being serious for the two men. When opposite McDonald & Co.'s drug store, Otto saw that if he kept his course he would collide with a horse and cart, and cut across the street to escape the team. In doing so one of the wheels of the machine came off and the car "skidded" and struck a cut which had been opened there. The axle broke and with the momentum the auto had, the other fore wheel went up in the air and crashed through the plate glass window of S. Milley's store, lodging on the front show shelf. Glass particles and pieces were thrown around on all sides, but fortunately no one received injury, though many people were on the sidewalk at the time. The broken glass window was a valuable one.

Arrived From Fogo.

The coaster Maggie Sullivan, Capt. Downer, arrived from Fogo last night with a full cargo consisting of oil, codfish, seal skins and lumber. Shortly after leaving Fogo the wind increased to a gale and carried away the foremast at the bounds. The balloon jib and rigging came down by the board. Capt. Downer reports good fishing at the Wadhams, and at Fogo boats are getting from 2 to 4 qtls. with hook and line. The schooner brought two passengers here, Mr. and Mrs. Oke. Mr. Oke will go to Hospital to have an operation performed.

Church Union Vote in Favor.

At the sitting this morning of the Methodist Conference at Governor Street Church, a discussion took place on the basis of Church Union. Similar discussion has been held at the several Provincial Methodist Conferences in Canada. The discussion this morning occupied fully two hours, and a large number of ministers and lay representatives took part in it. The discussion proved interesting, not only to the members of the Conference, but to the large number of visitors present, and at the close a vote was taken on a motion proposed in favor of a certain basis of union and carried by 40 votes to 50.

Vessels Delayed.

The schr. Dorothy Baird, laden by Jas. Baird, Ltd., with 4,550 packages of fish for Pernambuco, was ready to sail Saturday, but owing to the fact that some of the men who signed on her absented themselves from the ship, she was delayed in port until to-day, when the men were rounded up and put on board. Of late this practice of seamen quitting their vessels and delaying them has become an intolerable nuisance, entailing often great loss and much annoyance to owners and captains. We learn that in future men who are arrested for such an offence will be severely dealt with.

Police Court.

To-day 3 drunks were each fined \$1 or 3 days.
A drunk and a man held for safe keeping were released.
A disorderly in his own house was discharged.
A disorderly and a drunk, who have appeared before court repeatedly, were each fined \$5 or 14 days.
A seaman of Liverpool, who says he deserted the Mongolian, was remanded for 3 days.

Died Suddenly.

One of the orphan boys of Mount Cashel died suddenly this morning at the institution, of heart failure. The poor little chap whose name was Ronald Goff, a native of Hr. Grace, was 11 years old and was 2 years in the orphanage. He was a boy of delicate constitution and subject to weakness. On Thursday last, the morning of the Feast of St. Peter and Paul, he made his first Holy Communion with other little boys of the orphanage. When he became ill everything possible was done for him by Rev. Bro. Ennis and the other rothers of the orphanage and Dr. Breim and Mitchell were quickly summoned, but before their arrival his spirit had departed. The little chap was a favorite with all and his death has created much sorrow at Mount Cashel.

Personal Notes.

Mr. Peter Saunders accompanied by Mrs. Saunders, arrived here by the Bonavista Saturday, and will remain on a holiday until after the regatta. Mr. Maurice Cullen, artist, arrived here by the Bonavista, and will spend some time in the city.

An Ugly Situation.

Special to Evening Telegram.
BERLIN, To-Day.
Germany is sending gunboats to Agadir, and will make a claim to Southern Morocco unless France and Spain withdraw at once from the present adventure and really respect the integrity of Morocco.

Special to Evening Telegram.
LONDON, To-Day.
Germany's intervention in Morocco is the subject of press comment. The Standard says Germany loses no opportunity in taking advantages of international complications. The desire which has been growing so fast among us lately to be on better terms with Germany will suffer a serious set-back. The Morning Post says Germany has torn up the Algeiras treaty, and this has been done absolutely without consultation or discussion with other Powers. Germany's interpretation is now made plain. The question now is how France and England will regard it. The Daily Graphic says the action of Germany precipitates a situation far graver than the preceding Algeiras difficulty. The Daily Chronicle says the situation may develop into a very ugly one.

Dying of Electric Shock

A young man named Thomas Phelan, 19 years old, working for the N. S. Co. as motor inspector, at Bell Island, is dying of an electric shock received three weeks ago. He reached under the controller on his knees to get a tool. His cap was wet and he received an electric shock in the body. He fell down unconscious, but Mr. Dixon who was working there used first aid and he revived. He worked for a week and then collapsed. He is not expected to live many days.

Body Decomposed.

The body of the infant found by the two boys named Cook and Martin, in Quidi Vidi Lake yesterday was examined by Dr. Rendell at the morgue this forenoon. It was so badly decomposed that the sex of the infant could not be determined and the Doctor thinks it must have been several weeks in the water. Inspector Collins had the remains placed in a coffin to-day and buried.

Will Do Away With Night!

THOMAS A. EDISON, the famous inventor, recently made a statement that before fifty years more have passed the darkness of night will be completely removed. This will be accomplished, he claims, by the more effective use of Electricity, 95 per cent. of which is now wasted and only 5 per cent. of its power brought into actual action. This is interesting. Here is something of more interest to you. We are not attempting to do away with the night, but we are attempting to do away with high prices as the following will show:—
