SECRETARY

WM. NORTHEY, Secretary Montreal Arena Co.

In recommending the Preference and Common Shares of the Arena Gardens of Toronto as attractive investments, we draw attention to the following:

The Arena Gardens of Toronto will be a large revenue producer at all times of the year.

In the winter season the greater portion of the revenue will be derived from receipts of hockey games. For years Toronto has been urgently in need of a hockey arena. All the teams belonging to the larger leagues will play their games on this rink's surface. With a seating capacity for over 6,000 people, the new rink will fill all the requirements for many years to come.

Outside the winter season, the new Arena will also fill a long-felt want. It offers an ideal location for the National Horse Show, which is such a popular event in Toronto. Then there are such events as the Auto Show, Pure Food Shows, Vaudeville Shows, large Conventions, Band Concerts and Industrial Exhibitions, all of which attract large crowds. Up to the present time Toronto has not had any properly equipped building for such events, and these will help to insure the success of the new Arena from the very outset.

A new departure in connection with these undertakings is that a hundred ton artificial ice plant is being installed, under contract with the De La Vergne Company, dated June 23rd, 1911. This plant will not only maintain the skating ice during the winter, but will also manufacture fifty tons of ice per day for family consumption during the summer months. The profit on the sale of ice during the summer season will, it is expected, not only pay for the cost of running the ice plant during the winter, but furnish a very considerable revenue.

Mr. Lawrence Solman, who is well-known throughout Canada for his successful management of theatrical and summer amusements, has kindly consented to act as Managing Director.

Additional application forms will be supplied on request by, and subscriptions may be sent to, the undersigned:

city limits, while as many more have occurred within the county.

The last tragedy due to a level crossing in Middlesex was in the killing of three members of the Drake family two miles east of London on February 21. Two double fatalities also occurred in Middlesex within three months. On January 6 Walter Smith, of London, and his brother Henry, of Gloucester, were driving across the C. P. R. tracks north of the place, when their sleigh was struck by an express train and the two young men instantly killed. On the 22nd of the previous month, Mr. and Mrs. Charles Miller were instantly killed while in a few yards of their home, when they were struck by a light engine on the Grand Trunk, west of the Mt. Brydges station. Another level crossing fatality in the county was narrowly averted when Mr. Peter McArthur was struck and injured while driving across the Grand Trunk tracks near Gloucester.

The fatalities which have occurred during the past year in the city of London were as follows: On May 10 a Mr. Beres was killed at the Colborne street crossing of the C. P. R. On June 28 a city street car was struck at the Rectory street crossing of the Grand Trunk, and Watchman O'Leary met his death. On the same day a fatality occurred just east of the city. Though this was not a crossing accident, lack of protection of the right of way was alleged to have been responsible for the death, baby Humphrey, having got on the track in front of the Stratford train in the month of August three accidents occurred, one of which was fatal.

Struck a Motor Car. Dr. Angus Graham, driving a motor car, was struck at the Malton street crossing of the G. T. R. and a man named Taylor struck at Adelaide street. The fatality at Malton occurred on August 15, however, the Adelaide street crossing was responsible for the death of Edward Ingram, a 24-year-old boy, who was struck by the Grand Trunk flyer. On November 29 Harry Brownlee, a ten-year-old boy, was also killed at a crossing on a Grand Trunk train crossing Grey street. During the same month another near-fatality occurred at the Waterloo street crossing of the Grand Trunk, when George B. Hodgins, driving a trolley, was struck by a street engine crossing a Grand Trunk yard engine caused the death of Thomas Allan, aged five, Marquette block, on January 22 of this year.

At the inquests into all of these deaths the coroner testified that witnesses were always down on approaching crossings. On two occasions Coroner Dr. McLehennan wrote to the danger of level crossings in and around London.
