THE NATIONAL LEAGUE MEETING. THE NATIONAL LEAGUE MEETING.
New York. February 28.—The annual schedule meeting of the National Base Ball
League, which began to-day at the Fifth Avenue Hotel, promises to be one of the most interesting and protracted sessions ever taken part in by the men who control the National game in the largest cities east of the Rocky Mountains. Since the close of last season's play many deals have been heard of, and some of them have gone through. The most notable of these is the consolidation of the Brooklyn and Baltimore clubs, which was perfected only

materially by the deal, as "The Grooms" will now be made up of the star players from both clubs, while "The Orioles" will be a sort of second edition. Brooklyn is looked to as the most likely pennant possibility this year. Next is the Brooklyn-Baltimore deal the question of the transfer of the Cleveland club to St. Louis is one of the principal topics to be discussed. Chris Von der Ahe and B. S. Muckenfuss will each strive to be the recognized representative of the St. Louis club, and as Chris has come on armed for a strong hard fight has come on armed for a strong hard fight an interesting time is expected. That a twelve-club schedule has been prepared is beyond all doubt, but that it will remain intact during the season is not so certain. Many persons who have an inside knowledge of league affairs claim that there will only be eight clubs interested in the playing circuit before the season is many weeks old.

Sir Charles said the date of the next election would greatly depend on the coming session, but he was inclined to believe that the present Government would not appeal to the country before 1901, the limit of the parliamentary term being June of that year. Several prominent Conservatives called on their distinguished leader to-day, and he was tendered a reception at the residence of had Calder this evening. It is not likely he will address any public gatherings during his brief stay in Hamilton.

THE QUICK-BAKER OVEN

CONSTRUCTION-The construction of the Quicker-Baker Oven is unique. It has inject flues from end to end at either side, while the hollow doors are the exit flues. while the hollow doors are the exit flues. This gives an even temperature and equal distribution of heat. To prevent loss of heat through radiation, it is lined with tin, which is again surrounded with a blanket of asbestos. At the top is an air chamber. A false bottom prevents burning of the bread, roasts, etc., on the bottom. The temperature may be regulated without opening either door. It is guaranteed to bake the top to the same degree as the bottom—few summer stove ovens accomplish this satisfactorily. Manufactured by
