

If you boil the water you drink you may be swallowing a grave-yard; if you drink it without boiling you may be imbibing an aquarium.

An easy solution of the pure water problem is to order and drink only the famous White Rock Water, a natural mineral water certified by all leading analysts as being absolutely pure.

White Rock Water is a sparkling tonic. As a dilutant for whiskey it is unexcelled.

Ask for it at your club, hotel or restaurant.

Please call and inspect our stock before deciding.

IS TAKEN TO ALBERNI TO STAND HIS TRIAL

Former Mate of Schooner Jessie Charged With Giving Indians Whisky

(From Thursday's Daily) Among the passengers on the steamer Tees when she sailed early this morning was Provincial Constable Conway who had in charge a man named Dahoborg whom he was taking to Alberni to answer to a charge of selling liquor to the Indians at Clayquot. Dahoborg was arrested by Constable Conway yesterday on board the coal hulk Oregon. He was formerly mate of the sealing schooner Jessie and it was on the trip of the Jessie to secure an Indian crew that it is alleged the offence took place. It is said that the schooner had a quantity of liquor on board and after a carousal Dahoborg carried off some whiskey and sold or gave it to the Indians on the reservation at Clayquot. A warrant was sworn out for his arrest at Alberni and instructions were given the provincial police to watch out for him with the result that his arrest followed yesterday.

TRADES AND LABOR COUNCIL MEETING

Considerable Business Was Transacted at Meeting Held Last Night

(From Thursday's Daily) The Victoria Trades and Labor Council met in Labor Hall last evening. President Walters presided. R. H. Matthews presented his credentials as a delegate from the Barbers' union and was seated. The committee on Labor Day celebration reported that every effort to procure a boat for an excursion to Bellingham on that day had failed. The legislative committee having been instructed to ascertain what arrangements existed between the provincial government and Salvation Army, by which the latter were bringing immigrants to this country, reported by giving an extract from Hon. Capt. Talbot's speech during the session of the provincial house which showed that the government only agreed to assist the Salvation Army to bring out agricultural laborers and domestic servants. All money so advanced to be repaid to the government within a specified time. R. B. McMicking, president of the Victoria Liberal Association wrote to say that the association would cheerfully meet the views of the council with regard to Ontario immigration. Letters were also received from Sir Wilfrid Laurier and Hon. William Templeman to the same effect. The Barbers' union wrote enclosing \$10 to the fund for sending delegates to the labor congress at Winnipeg. The pressmen wrote to the same effect. The Electric Workers' union and the laborers also sent donations. The secretary was instructed to thank the unions that had contributed. The carpenters' delegates reported that the matter would receive attention at their next meeting. The council selected the following as a permanent Anti-Oriental Immigration committee, A. Johnson, E. Gilligan, B. Martin, E. Lendrum, and J. C. Walters.

The election of delegates to the Canadian Labor Congress, which will be held in Winnipeg for six days commencing September 16th, resulted as follows: C. Silvertz and J. C. Walters, with Edward Gilligan and The Typographical union, and Painters' union also intimated that these unions would send delegates to the congress, and judging from the reports of other representatives there will be at least six or eight delegates from this city.

HILL CREST MINES ARE BEING EXTENDED

Company Expected to be Producing Thousand Tons Daily Before Winter

(From Thursday's Daily) C. P. Hill, general manager of the Hillcrest Coal and Coke company, which owns five thousand acres of coal lands adjoining Frank paid a flying visit to Victoria yesterday to do some telegraphing to his mine, as none of the wires in the States are working owing to the telegraphers' strike. Mr. Hill is very jubilant over the splendid way in which the mine owned by his company, in which he has a controlling interest, has turned out. Speaking of the progress of the mine at the Driard yesterday, Mr. Hill said: "One of the things that brought me to whether our big new electric fan is installed and working yet. If it is, and it should have been last Monday, our mines are now shipping at the rate of six hundred tons a day of the very finest quality of coal. I am making every effort to increase our output to 1,000 tons a day by the time the snow falls. To do this is only a question of getting our machinery installed in time. Our compressed air haulage system both inside and outside the mine is in place, and we have compressors and a considerable amount of other machinery either on the way or on the ground waiting for delivery awaiting installation. "The C. P. R. uses our coal for their passenger engines, and if we get the output this winter we hope we shall deliver 500 tons daily to the C. P. R. for their own consumption and shall ship as much more to the towns of the western prairies. Our main tunnel is 190 feet, and we have a magnificent body of coal developed. Our main seam is fourteen feet thick, absolutely clean and free from dirt. We have built a spur two and a half miles long from the mine to the Crow's Nest branch of the C. P. R. and so far have not suffered from car shortage nor labor troubles."

Will Continue Work. Herbert Carmichael, provincial assayer, is at present engaged in the vicinity of Alberni making a topographical map of the district. This week he will move up to the Great Central lake, where he will continue work among the hills as long as the weather holds favorable.

AMBASSADOR BRYCE Remarks Made at Pilgrims' Commemoration Proceedings

Princeton, Mass., Aug. 20.—Ambassador Bryce at the ceremony today said: "It is fitting that the ancient motherland should come the settlers whom you commemorate, should be remembered here, and should send you her greetings. Many things have come to pass, both in England and here, which those grave, grim ancestors of yours might disapprove, good and necessary as you and we may think them. But the thing remains true now as it was then, the fearless man loves truth, and obeys duty and his work endures. The state that has such men, and to which such men are glad to render devoted service in war as in peace, grows to be the great state. They are bequeathed to you traditions that have been helpful to you ever since in many an hour of need, and will be helpful to you while your republic stands."

COORJ DECLARES THE TENANT NOT LIABLE

Judgment Given in Action for Damages to House by Frost Last Winter

County Court Judge Lampan has handed down his decision in the case of Warren vs. Winterburn, a case in which the landlord sued the tenant for damages to the heating plant as a result of alleged neglect thereof. The case raises a new point in this province and the decision has been awaited with peculiar interest, especially by owners of property, as it is understood that there are a number of disputes pending with respect to the subject which depends on the result of this case. Judge Lampan's judgment, which is given in extenso, sets forth all the essential facts in the case, and it will be seen that he finds for the tenant, and there is a likelihood that an appeal will be lodged. Mr. McPhillips, K. C., appeared for the plaintiff, and Mr. Walls for the defendant. "This is an action by a landlord against his tenant for damages to a hot water heating plant. The defendant became the tenant of the house on Belcher street, then owned by T. M. Henderson, but who subsequently sold to the plaintiff, defendant consented to occupy the house until 15th January, 1907. "The house contained a hot water heating plant and during the cold weather in January the defendant kept no fire in the furnace and in consequence the water, which was allowed to remain in the radiators, froze and burst eight of the radiators. Plaintiff's agents then notified defendant to repair the broken radiators, and on his refusing to do so, they employed a firm of plumbers to do the necessary repairs, which cost \$317.05, and that amount the plaintiff seeks to recover from the defendant. "There was no written lease and the plaintiff relies on the implied obligation on behalf of the tenant to use the premises in a tenant-like manner. That there is such an obligation I do not think can be doubted. The defendant occupied the house in British Columbia, and some weeks previously when the weather began to get cold, as he was using the furnace, he tried to drain off the hot water from the pipes and radiators, but found out that he could only do so by shutting off the cold water supply to the house; this would leave him without his ordinary supply of water for domestic purposes, so he concluded that it was the way of the country to leave the water in, and he let it go at that. There were two tanks to be drained, but he had no stop valve between the two, so it was impossible to drain off the heating plant independently. Both the plumbers who were called in to see there should have been such a valve, but there was none. It might be contended that the plaintiff, suspecting the danger, elected to take his chances and so made himself liable, but I do not think that view is tenable, because even if he had shut off the supply and run off the water by the tap in the cellar, some water would have remained in the radiators unless he had turned the valve in each radiator. Defendant was not aware of this, and Mr. Colburn, who was called in as a precaution is taken of turning the valve in each radiator, enough water will remain to cause a break if frozen. Before the damage was done, the weather was so cold that defendant decided to start a fire in the furnace, and in that way heat the house, as the heat obtained from the fire in the grate was insufficient, by reason of the coal and wood shortage it was impossible for him to get fuel, and the supply he had on hand was so small that he had to be content with using it for use in one grate. The weather was unusually severe—the most severe in thirteen or fourteen years—and a fair test to apply is to inquire as to what would have happened if it is in the knowledge of everyone who was here during January, that water pipes were broken by frost in house after house, and for a few days the defendant had no water, and it is clear they could not be attended to. In many of these houses the trouble would have been averted had the water been kept off, and the pipes drained off in the evening, but the fact is that many owners had to pay plumbers' bills on account of neglecting this simple precaution. In some places, also, radiators were broken and in one house the water froze and broke a radiator, although there was a fire in the furnace at the time. Instead of the defendant not using the house in a tenant-like manner, I think he has demonstrated that he used it in a manner comparing very favorably with the manner in which many owners used theirs, and in my opinion the plaintiff has failed to show that defendant has not satisfied his obligations to use the premises in a tenant-like manner. "The action is therefore dismissed with costs."

GRAFT CHARGES

Vancouver, B. C., Aug. 21.—Superintendent Booth, of the scavenging department yesterday examined into a case of alleged petty graft on the part of some of his men by refusing to take away garbage from residences until paid small sums. "I have heard a number of reports of this practice going on," he said, "but the charges now in hand are the first I intend to sift the matter thoroughly since, if the practice is allowed to go on, there is no telling where it will end. Personally, I wish the public would refrain from giving gratuities to the employees of my department for ordinary work as it tends to disorganize the service."

FALL OF METEORS CAUSES CONSTERNATION

One Descends in Vermont and One Near Shore of Long Island

Middlebury, Vt., Aug. 19.—Prof. Samuel Sheldon, of the Brooklyn Technical institute, went to Bristol Notch today to investigate the site of an unusually large meteor which was observed by many people throughout the country on Sunday morning. Those who saw it say it was an unusual brilliancy and size. The effect of its fall was like that of an earthquake. The country within several miles of the scene of its landing experienced shocks which caused damage to many houses. New York, Aug. 19.—The World today says: At 6 o'clock last evening, an immense meteor, apparently about 75 feet in circumference, fell into the sea about a mile off the Narragansett light, Long Island. At first a roar was heard, and an instant later a great streak of fire seemed to come down from the clouds and plunged into the sea. The meteor fell into the water with a noise of a mighty boiler letting off steam. Great waves rolled in upon the beach, part of the bathing pavilion was washed away, and along with it several fishermen's huts. Much damage was done to property abutting the water front. Some persons thought the strange incident marked the end of the world. Even old fishermen, used as they are to face death in the sea, were terrified and not for a moment did the excitement quiet. Captain George Green, who was in command of a vessel in St. Pierre when Mount Pelée blew its head off and destroyed that city, was sitting on the waterfront when the meteor fell. He declared nothing has ever frightened him so much except the Mount. Pelée disaster.

Extends Telephone Line

The Dominion Government has decided to extend the government-owned telephone lines to Pender Island. A certain sum will be provided each year until all the chief islands in the gulf are connected with Vancouver Island. The government has finally consented to undertaking this much needed enterprise at the urging of Ralph Smith, M. P. for Nanaimo.

CHASE AFTER INDIAN MURDERERS COMMENCES

Ward Has Been Received From Sergeant Murray in Charge of Possé

(From Thursday's Daily) Superintendent of Provincial Police Hunsay yesterday received word from Serg. Murray who is in charge of the searching party which has been sent out under instructions from the attorney-general's department to bring back Simon Gun-an-Noot and Peter Hima-day, the Indians of the Kispox tribe who are wanted for the murder of Max LeClair near Hazelton on June 19 of last year. The letter was written at Port Simpson where the party divided. One party will go up the Stikine river and make a thorough search of the country on both sides. The other party which will be under the direct supervision of Serg. Murray will go up the Skeena river to Hazelton where it will make its headquarters. The search there will be conducted mostly through the Babine river country where the Indians are supposed to be living with the Babine tribe. The search will be an exhaustive one and the parties are thoroughly equipped for a long stay in the wilds. There are a dozen men altogether in the posse and they are all trained woodsmen. Serg. Murray is confident that if the Indians are still alive they will be captured but it is expected that the search will be a long and weary one before the officers of the law catch up with the fugitives.

DENIES THAT RAILWAY LINE HAS BEEN SOLD

John Hendry Says Grand Trunk Pacific Has Not Bought the V. W. & Y. "The story that the V. W. & Y. railway is being sold to or has been sold to the Grand Trunk Pacific is absolutely untrue, says President John Hendry, of the Vancouver, New Westminster & Yukon railway yesterday. "I have no time to go into details since my return, but you may say that 'The V. W. & Y. is not being sold to anybody,' he continued. "We are going right ahead with our borings for the foundations of the railway bridge across the second narrows and it is our intention to build from here north to the Grand Trunk Pacific, as it always has been. "As soon as the borings are complete and we have ascertained the nature of the foundations that will be required, we shall have detailed plans drawn for submission for the approval of departments at Ottawa. Further than this I may say that we will apply for and expect to obtain government assistance for the building of the bridge, and subsidies for the line to the north."

Bicycle Race to Victoria

Nanaimo, Aug. 21.—A bicycle race that will test the endurance of the two contestants will take place in a short time between Geo. Banasky and W. Penny. The race is to be from Nanaimo to Victoria and the principals are now in training for the event. "He-Do you expect me to give you all the money you want? There isn't that much in the world!—Plick-Me-Up."

VICTORIA LOOKS GOOD TO VANCOUVER CRITICS

Local Lacrosse Team Called for Intermediate Championship of the Province

Vancouver, Aug. 21.—Victoria looks good for the intermediate lacrosse championship of the province. Spectators at their game with New Westminster seem to be of the opinion that they can get away with the Royal City team without much effort. There is no intermediate league, but matches will be played between the leading teams of Vancouver, Victoria and New Westminster for the championship. The Fairview team, of the city, is going to make a big bid for the championship and their chances look good. Three of the best intermediate teams that have played in the province for some time will be contesting the series, and the result should be some interesting games. If Victoria wins it will give the game the required boost ahead over the gulf. New Westminster has been counting on the championship, but she may have to take a back seat yet.

Alberni to Display Fruit

The Alberni Agricultural Society is arranging to ship to Victoria for exhibition purposes a collection of fruit of several varieties all grown in that section. The collection will be displayed in some window on the main thoroughfare here in order that the visitors to the coming exhibition may have an opportunity of seeing just what the Alberni section is believed that the fruit raising. It is believed that when the product of that part of the island is seen and appreciated it will be an advertisement of the best possible description for the country. Since April 1 of this year, when the provincial government land and timber office was opened in Alberni, over twelve hundred timber licenses have been filed. It is probable that in the near future Alberni will have a regular mail service by stage. E. H. Fletcher, provincial inspector, was in Alberni last week on an official visit and announced that a suitable tender for the additional service could be received immediately.
