

Children Cry for Fletcher's

# CASTORIA

Fletcher's Castoria is strictly a remedy for Infants and Children. Foods are specially prepared for babies. A baby's medicine is even more essential for Baby. Remedies primarily prepared for grown-ups are not interchangeable. It was the need of a remedy for the common ailments of Infants and Children that brought Castoria before the public after years of research, and no claim has been made for it that its use for over 30 years has not proven.

## What is CASTORIA?

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is pleasant. It contains neither Opium, Morphine nor other narcotic substance. Its age is its guarantee. For more than thirty years it has been in constant use for the relief of Constipation, Flatulency, Wind Colic and Diarrhoea; allaying Feverishness arising therefrom, and by regulating the Stomach and Bowels, aids the assimilation of Food; giving healthy and natural sleep. The Children's Comfort—The Mother's Friend.

GENUINE CASTORIA ALWAYS

THE CENTAUR COMPANY, NEW YORK CITY

## STORAGE BATTERY SERVICE

We are now completely equipped to take care of all Storage Battery troubles. We can recharge, repair and rebuild in first-class shape. We can save you time and money also and express charges that were necessary until now.

We can save you money when you need a new battery, as we handle the PREST-O-LITE, which is all Canadian-made, saving you exchange and duty. We have a size for every car. It will be to your interest to see us when in need.

Prest-O-Lite equipment is on many high-grade cars for 1920.

R. MORNINGSTAR

WATFORD GARAGE

SHERWIN-WILLIAMS PAINT

\$1.85 a Quart

We have sold it for twenty years and expect to do so until someone makes a better one.

MURESCO 70c a Package

A durable wall finish at a reasonable price. Easily applied and in good variety of colors.

FLOGLAZE \$1.50 a Quart

A real hard finish enamel suitable for floors, furniture, autos and buggies.

ELASTICA \$1.60 a Quart

A durable elastic varnish for floors or linoleum.

N. B. HOWDEN EST.

## STARTING BEEKEEPING

Suggested Outfit for the Apiary Novice.

Start With the Right Hive—The 10-Frame Langstroth is Regarded as the Best—How to Prevent Swarming—Care of Freshening Cow.

(Contributed by Ontario Department of Agriculture, Toronto.)

**E**XTRACTED honey production is the most satisfactory for beginners. Start with three colonies and sufficient up-to-date equipment and then make the bees pay their way. One colony does not give the beginner an opportunity to right mistakes or accidents profitably. Three colonies can be managed by devoting one evening weekly to the apiary.

Avoid many troublesome pitfalls by starting with the right hive. The 10-frame Langstroth hive has given the best satisfaction in Ontario. All beekeepers' supply houses carry this hive and its parts in their regular stock. Buy your first hives from a good manufacturer. It is very necessary to have all hive parts interchangeable so that they may be used in any colony in the apiary. Uniformity and accurate workmanship alone can ensure this need.

One complete 10 fr. Langstroth hive consists of:

1. A bottomboard.
  2. A hive-body with self spacing frames and wire.
  3. A telescoping metal roof cover.
- In addition the beginner should provide for each colony one queen excluder; two extra hive-bodies complete with frames; and 7 lbs. of Medium Brood Foundation which runs six sheets to the pound, to fill the frames with a guide and foundation for the future combs. All hive material should be nailed, wired and painted before the opening of the spring rush.

It is advisable to commence with a 2-lb. package of bees and queen; a swarm or a nucleus. Less danger from disease attends the buying of pound packages than the buying of swarms and nuclei. Pound packages may be secured for delivery from May 1st to June 30th. Early packages will yield a surplus if carefully handled. Enquire of the Provincial Apiarist re disease in your locality before buying swarms, nuclei or colonies. A small colony of bees is much less vindictive than a full colony and thus offers a better opportunity for the beginner to grow with his bees.

The accessory equipment for the beginner should consist of:

1. A veil of black cotton tulle.
2. A standard bee smoker.
3. A hive tool.
4. A spur wheel wire embedder.
5. An uncapping knife.
6. An uncapping box.
7. A complete set of Department Literature, Bulletins 213, 233 and 256, and a good reference bee book.
8. A small honey extractor.

With the exception of Nos. 6 and 8 it is advisable to acquire the material needed from a supply firm at once. The uncapping box can be made at home, and the beginner could probably co-operate with another beekeeper in securing the use of an extractor. With the increase of colonies to ten, it would then be advisable to provide a storage-can to assist in handling the crop.—W. A. Weir, D. A. College, Guelph.

## THIS WOMAN'S RECOVERY

Shows Remarkable Curative Power of Lydia E. Pinkham's Vegetable Compound.

Chesley, Ont.—"Before using Lydia E. Pinkham's Vegetable Compound I was a total wreck. I had terrible pains in my sides and was not regular. Finally I got so weak I could not go up stairs without stopping to rest half way up the steps. I tried two doctors but they did me no good. I saw your medicine advertised in the newspapers and thought I would give it a trial. I took four bottles of the Vegetable Compound and was restored to health. I am married, am the mother of two children, and do all my housework, milk eight cows, and do a hired man's work and enjoy the best of health. I also found Vegetable Compound a great help for my weak back before my babies were born. I recommend it to all my friends who are in need of medicine, and you may print this letter if you wish."—Mrs. HENRY JANKE, R. R. No. 4, Chesley, Ontario.

It hardly seems possible that there is a woman in this country who will continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial after all the evidence that is continually being published, proving beyond contradiction that this grand old medicine has relieved more suffering among women than any other medicine in the world.

## To Prevent Swarming of Bees...

June is the swarming month and time of supering for the main honey flow which begins between the 10th and the 20th of the month, depending on the season and the latitude. Be sure to give supers enough to avoid any crowding which may cause the bees to become discouraged, quit work and swarm excessively. It should be the beekeeper's aim to prevent swarming as much as possible. This is done by keeping young queens, giving plenty of room and a systematic examination of brood-chambers to detect colonies which are preparing to swarm. When queen cells are found far advanced they should all be destroyed and the queen herself removed. After the colony has been queenless one week the combs should again be examined and all cells except one removed. This one will provide them with a queen and, if only one is left they will not swarm again. Where an improvement of stock is desired the new queen may be given instead of leaving one queen cell.

Natural swarms should be hived on the old stand after removing the parent colony to one side. The swarms should be given the supers from the old colony. New swarms work with great vigor because they have no brood to care for during the first week. Colonies held together without swarming gather more honey than those which swarm. It is the beekeeper's patriotic duty to reduce the cost of honey production and thus increase the quantity he is called to produce as greatly as possible. They also cause the beekeeper less trouble at unexpected times. This may be done more by swarm prevention than in any other way. Bulletin 233 takes this matter up thoroughly and should be carefully studied by all beekeepers. By mastering the methods described it is quite possible to manage as many apiaries as there are days in the week, barring Sundays and rainy days.—W. A. Weir, D. A. College, Guelph.

## Care of the Freshening Cow.

This is the month when a large number of cows freshen. Both fresh cows and newly-born calves should receive special attention. Cows expected to freshen should be placed in a box stall for a few days before and after freshening. Many valuable cows and calves are lost by neglecting to provide box stall accommodation. This should be found in every dairy stable; or one have a special barn for the purpose.

For Asthma and Catarrh.—It is one of the chief recommendations of Dr. Thomas' Electric Oil that it can be used internally with as much success as it can outwardly. Sufferers from asthma and catarrh will find that the Oil when used according to directions will give immediate relief. Many sufferers from these ailments have found relief in the Oil and have sent testimonials.

## CASTORIA

For Infants and Children In Use For Over 30 Years

Always bears the Signature of *Chas. H. Fletcher*

"How do you make such good, wholesome, tasty bread day after day?"

We are often asked this question. The answer is simple. We use only the very best goods—Five Roses Flour, Fleischmanns Yeast, Malt Extract, Granulated Sugar, Fine Salt and Pure Lard, mixed in a mixer by Hydro power, and a knowledge of know how. That's our answer.

Have you tried a Loaf?

F. H. Lovell's

BAKERY & CONFECTIONERY.

## CHANTRY FARM

Am now booking orders for eggs from Canada's Best Dorkings and Black Leghorns—winners of most prizes at C. N. E. 1919, also bronze medal and special ribbons for male and female Black Leghorn, utility pens cheaper. Special prices on 50 or more Leghorn eggs.

ED de GEX, Kerwood P.O.

AFTER CLOUDS COMES SUNSHINE. AFTER DESPONDENCY COMES JOY. AFTER SICKNESS COMES HEALTH. AFTER WEAKNESS COMES STRENGTH.

In the spring when you're "all in"—fagged out—blood thin, if you will turn to Nature's remedy, a tonic made from wild roots and barks, which has stood fifty years as the best spring tonic—you will find strength regained. No need to tell you it's Dr. Pierce's Golden Medical Discovery, put up in tablet or liquid form, and sold by every druggist in the land. After a hard winter—shut up indoors, your blood needs a temperance tonic, a tissue-builder and blood-maker such as this "Medical Discovery" of Dr. Pierce's.

SARNIA, ONT.—"I was in a very bad condition. I could not eat without feeling distressed. Had indigestion so badly I was always in misery. I had liver trouble as well, and the two just put me 'down and out' for about five years. I had many good doctors but got no relief. I took Doctor Pierce's Golden Medical Discovery and before I had taken two bottles I was much improved, and in less than six months I was well. I could eat anything and do my work with pleasure."—Mrs. ANNIE BARON, 226 Hurand St.
