Established 1826

I read of a lovelier clime Than earth with its summer array:
Beyond the dark mountain of Time
It stretches in beauty array.

The smile of our God is the light
That giveth each hue of its flowers,
And mantles each beauty-crowned height
With sunlight more tranquil than ours.

Just over the mountain it lies,
The sweet summer-land of the soul,
And beneath those beautiful skies
No storm-cloud ever shall roll.

A pilgrim and stranger I roam In search of that country afar,— I read of a mansion, my home, For beauty as bright as a star.

The city prepared of our God
Hath dwellers within it, I know;
Familiar its streets are now trod
By those I have loved here below.

Just over the mountain it lies, And often in vision I see The house of my Father arise, The home of my kindred and me

I journey by faith o'er the hills, I wind through the valleys below I sing 'mid the storms and the ills That pilgrims must suffer, I know.

Oh shall I some bright sunny morn Look down from the summit of bliss, A pligrim to anglehood born, Escaped from that country to this?

Just over the mountain it lies,
And there is the home of my heart;
The sight of it gladdens my eyes,
And bids all my sorrows depart.

And shall I the city behold

Whose builder and maker is God,
Whose walls are of jasper and gold,
Whose streets by the angels are trod?

Shall I through the emerald gate,
From earth and its desert of sin,
Pass on to my angel estate,
With Jesus forever shut in?

Just over the mountain it lies,
My home in the valley below,
And, oh, what a joyful surprise
To catch the first sight of its glow!

A pilgrim and stranger confessed,

I walk to the mountain of light,
From whence the dear land of the blest
The Canaan I seek is in sight.

Jesus, my Saviour and guide,
I follow Thy rough, thorny road,
Till with Thee I surely abide,
At home in the land of my God,

Contented and happy I roam.
Till dropping this frail mortal guise,
I stand in the light of my home. -Montreal Witness

OUR FLEET IN THE MEDITERRA-NEAN.

In a few days (says the Daily News, May 30th) the finest fieet of iron-clads that ever assembled under one command will be found in the Mediterranean, under the command of Vice-Admiral Sir James Dynammond. Already the fleet, which consisted of six fron-clads, as anany sloops, and three gun-basts has been asymented by the "Triumph" and the "Monarch," from the Channel squadron, the former touching at Malita to take on board Admiral Rice, who proceeds to Turkish waters as second in command. Now four other armored broadside ships are ordered to Gibraltar with all despatch—the "Sultan, 'commanded by his Royal Highness the Duke of Edinburgh, the "Rupert," from Chatham; the "Raleigh," and the "Monarch." To made good the vacancies thus caused in the Channel squadron, several of the coastguard fron-clads have have been ordered to join the flag of Admiral Beauchamp Seymour, who is just now of the Spanish coast with the "Minotaur," the "Black Prince," the "Hector," and the "Minotaur," the "Black Prince," the "Resistance," the "Hector," and the "Minotaur," the "Black Prince," the "Resistance," the "Hector," and the "Minotaur," the "Black Prince," the "Resistance," the "Hector," and the "Minotaur," the "Black Prince," the "Resistance," the "Hector," and the "Minotaur," the "Black Prince," the "Resistance," the "Black Prince," the "Resistance," the "Hector," and the "Channel squadron, several of the coastguard fron-clads, are ordered to fix the "Resistance," the "Black Prince," the "Resistance," the "Hector," and the "Channel Squadron, several of the coastguard fron-clads, are ordered to gix the "Resistance," the "Raleigh," and the "Minotaur," the "Black Prince," the "Resistance," the "Raleigh," and the "Minotaur," the "Raleigh," and the "Minotaur," the "Raleigh," and the "Channel squadron, several of the coastguard fron-clads, are ordered to gix the "Minotaur," the "Raleigh," and the "Channel squadron, the "Black Prince," the "Resistance," the "Resistance," the "Raleigh," and the "Channel squadron, the "Resistance," the "Ra

of any ship, native or foreign, in those waters. Altogether, therefore, we may consider ourselves very adequately represented just now in the Levant.

\*\*BABOON MOTHER.\*\*

\*\*BABOON MOTHER.\*\*

\*\*A Mr. Hazely, in a lecture on Africa, tells the following story; A woman belonging to a settlement of about 150 souls went one day to gather some wood, and left her child on the ground to take care of itself. While the mother was gone a female baboon appeared on the scene, and, espying the child, approached and began to fondle it. The child was allowed to partake of the baboons milk, which deprived it of any appetite for its mother's. When the mother returned, she noticed that the child was carefully covered over with leaves, and had lost its hunger. This was done for several days before the mother ascertained who performed the unthankful act. When the mother did find out the doer, she induced the men of her tribe to lie in wait for the baboon the next day. The animal noticed the men raise their weapons to fire, and began to wave her hand, or paw, as if asking them not to kill her. But he natives killed her. No sooner had they done it, however, than the male baboon up in its appearance, and, by a loud shout, summoned others of his tribe to this spot. Then, in a body, the animals attacked them to their settlement, and the next day they were visited by about 500 baboons, who assaulted them with cocoanute and compalited them. next day they were visited by about 500 baboons, who assaulted them with cocoanuts, and compelled them to run away from their homes. The animals kept a

T. H. RANDALL & CO.
Annapolis, March 18th 1876.

J. L. SPRAGUE,
INVENTOR OF THIS CHURN,
SEING the failings of other Churus has lately constructed a CHURN which is the NEAREST PERFECTION ever yet constructed, and that is taking the lead wherever it has been introduced.

THIS Churu contains the lead wherever

THIS Churn contains the best points and taste of long study on the proper method of obtaining every particle of obtter that cream contains in from one to six minutes, the average time being four minutes.

It is now certain that a considerable part of the new crop of Wheat in Canada and the United States has been hayvested in a damp and unsound condition, and that much of the average time being four minutes.

ream contains in from one to six minutes, the average time being four minutes.

It has churned eight pounds of butter from six quarts of cream in forty seconds.

It has churned milk from a farrow cow, on a test, in one minute.

It will make tetter butter, and butter that will stand more working than that made in a common churn, the grain being coarser.

It will make the hardest kind of butter in the hottest days in August.

It works the buttermilk out in one minute, and cleanses itself in one minute.

By the motion of the paddles the air is pumped in at the ends, passes through the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream, and is carried off through a tube in the cream contains and all mate fave to the buyer, for damp grain makes flour of better color than dry, in consequence of the tors, or and admixture with the Floure than dry, in consequence of the tors, or and admixture with the Flour than dry, in consequence of the tors, or and admixture with the Floure than dry, in consequence of the tors, or and admixture with the Floure than dry, in consequence with the fell of the part of the buyer, for damp grain makes four of the tors, or and a

being fed, should never be allowed to horses. When water is drunk by them the bulk of it goes directly to the large intestines, and little of it is retained in the stomach. In passing through the stomach, however, the water carries considerable quantities of the contents to where it lodges in the intestines. If, then, the for do of the stomach is washed out before it is at costed, no nourishment is derived from the food.

"Did you come about that place?"
"Yes, sir," she answered.
"Oh, very well, then; take a seat, and reliable to the stomach is washed out before it is at costed, no nourishment is derived from the food.
"I say, bound Africa."
"Bou—bou—begorra, I don't know what you're referrin' to."
"Very strange," said the judge, "Can being fed, should never be allowed to horses. When water is drunk by them the bulk of it goes directly to the large intestines, and little of it is retained in the

BAD EFFECT OF EARTHING-UFTREES

A correspondent of the London Garden says that within the last twenty years he has often met with instances of the miscases, where only a few inches has been placed around the collar the result was as disastrous as where the trees had been placed around the collar the result was as disastrous as where the trees had been placed in this matter, and as perhaps for a few years no perceptible diminution in the vigor of the tree is noticed, the whole thing is forgotten until the tree becomes sickly, and ultimately dies, when perhaps fhe result is imputed to soil had been placed against and around the trunks, but he has found top-dressing and mulching over the roots beneficial, provided the material does not touch the trunks of the trees.

\*\*Bou—bon—begorra, I don't know what you're referrin' to."

"Very strange," said the judge, "Can you tell me if "amphiblous" is an adverb or a preposition! What is an adverb or a prepositio DOMESTIC ITEMS.

Sponge Cake.—Three eggs, one cupful cream of tartar, half a teaspoonful of soda.

DYE WORKS, ST. JOHN, N. B.

I Tis a well-known fact that all classes of goods get soiled and fa-ed before the material is half worn, and only require cleaning and dying to make them look as good as new Carpets, Feathers, Curtains, Dress Goods, Shawles, Waterproof Mantles, Silks and Satins, Gentlemens' Overcoats,

arb of pie plant, four ounces sugar, one-half pint cream, two ounces pounded cracker, three eggs; rub the stewed rhubarb through a sieve; beat the other ingredients well; bake with a bottom He had several farms registered on his

To PREPARE AN EGG FOR AN INVALID.

OMELET.—Cut from the loaf a slice an inch thick and pour over it half a pint boiling milk. Stir it smooth, adding pepper and salt. Beat five eggs, yolk and whites separately; pour on to the soaked bread, stir it together, and bake in a quick oven.

"The stranger drew a long breath and went on; "I want a farm of three hundred acres, but one hundred acres must be marsh land."
"Here she is," was the reply. "Just three hundred acres in the farm, and just on hundred in marsh land."
"I must have a waterfall twenty six

CENTENNIAL ICE CREAM.—Two quarts will (cream if you have it,) three spoontule of arrowroot, the whites of eight eggs well beaten, one pound powdered sugar, boil the milk; thicken with the arrowroot and the sugar, and a little salt; pour the whole upon the eggs; flavor with vanilla or lemon.

CENTENNIAL ICE CREAM.—Two quarts feet high, on the farm," continued the stanger."

Here you are. This farm has a natural water-fall of twenty-five feet and eleven inches. I don't suppose an inch, more less, on a waterfall amounts to much."

"Well, no, but I want a windmill on one of the hills."

"Well, no, but I want a windmill on one of the hills."

Bunns.—Rub together one lb. of butter calm reply.

It was some time before the stra caspoonful of soda, one teaspoonful of thought of anything else, but fi the gram of tarter, or the juice of a Jemon, three lbs. of flour, a few currants if you like; beat the eggs with the sugar; dip them with a spoon into the baking pan.

Bake in a quick oven.

BUCKWHEAT BATTER.—Keeping buck wheat batter is often very troublesome, especially in mild weather. It can be kept perfectly sweet by pouring cold water over that left from one morning, and which is intended to be used for raising the next morning's cakes. Fill the vessel entirely full of water, and put in a cool place; when ready to use, pour off the water, which absorbs the acid.

"Bo it is."

"Has it an organ?"

"It has."

said the stranger, rising to go. "If there is anything I hate, is is a church organ and you can see for yourself that I would be in a state of continual misery. The farm suits me first rate, but I can't go that organ."

Just what estimate those two men placed upon each other's veracity as they separat-

SPANISH CREAM.—I qt. milk, 4 eggs, loz. gelatine. Pour one pint of milk on the gelatine. Pour one pint of milk on the gelatine, then add the other pint of milk, and stir it over the fire, in a farina kettle. Beat the yolks of the eggs with three tablespoonfuls of sugar, and stir into the milk, just before it boils. When it comes to a boil, take it off, stir into it the whites of the eggs, beaten to a stiff froth, with three tablespoonfuls of sugar. Flavor with orders solicited, prompt attention and satisfaction gurranteed.

SPANISH CREAM.—I qt. milk, 4 eggs, loz. And found it a bore. She quickly subsided, Grew tender to view, And whispered quite softly:

1'I'll scream till you do!'

Why did Pharaoh kill the boy bables of the eggs, beaten to a stiff froth, with three tablespoonfuls of sugar. Flavor with vanilla; pour into moulds. Use the next because he objected to the Hebrews, and not the Shebrews? SPANISH CREAM.-1 qt. milk, 4 eggs, loz

A SLIGHT MISAPPREHENSION.

Jokers' Corner.

The Germantown Telegraph says:—There is no mode that we ever tried so effectual in transplanting tomato, cabbage, cantaloupe, or any other tender plants from the hot-bed or from one place to another, as to prepare a vessel filled with manure water and rich soil, about the consistency of thin mush, with which the roots of the plants should be well-coated and set in a hole made with a sharp rownlop fiece of wood or dibble. After being rather firmly planted, moisten again with manure-water.

A SLIGHT MISAPPREHENSION.

A SLIGHT MISAPPREHENSION.

From the Philadelphia Bulletin.]

Judge Pitman is one of the directors of the blank town public schools. Last spring the board advertised for a female teacher, with instructions for applicants to call upon the Judge. A day or two afterwards have moisten again with manure-water. house to obtain the place. The judge was at the porch at the time, and when she entered he mistook her for a school-mistress,

sugar, one cupful flour, one teaspoonful cream of tartar, half a teaspoonful of soda.

Corn Bread.—One pint of butter milk, two eggs, one pint Indian meal, two tablespoonful melted butter, a little salt, one teaspoonful soda.

"I have a brother that's one, sir; that's all I know about it."

One? One what?

"Did'nt you ask me afther the miners, sir? My brother Teddy works wid'em.,'

"And this," said the judge, "I is the kind of person to whom we are asked to entrust the education of youth. Women we the education of youth. Woman, what do you know? What kind of a school have

you been teaching?'
"None sir. What should I teach school dissolved in boiling water.

CRULLERS.—One cupful of butter, two cupful of sugar, four eggs, one cupful of milk, one teaspoonful of saleratus dissolved in milk, one teaspoonful of sale.

It is hard to say which will bring the more pleasant expression into a woman's
