6 Wellington St. West.

Practical Dispensing, Prescriptions and Pharmaceutical Chemistry, has for the past seven years been engaged as Instructor in the Theory and Practice of Phar

used as a text-book in many Colleges of Pharmacy and is highly recommended by the pharmaceutical press of the United States and England.

PROF. J. T. FOTHERINGHAM, B. A., Lecturer in Materia Medica, Latin, Microscopy, and Pharmacognosy, has been for nearly four years resident Assistant Classical Master in Upper Canada College and is spoken of as an exceptionally good teacher.

PROF. GRAHAM CHAMBERS, B. A., M. B., Lecturer on Practical Chemistry and Toxicology, obtained his Arts degree in 1886, and graduated in medicine in 1889, obtaining the Gold Proficiency and Silver Starr Medals, also spent a session in

A. Y. SCOTT, M. A., M. D.

CHAS. E. HEEBNER, PH. G.

The New Professoriate.

We have much pleasure in presenting to our readers portraits of the recently appointed Professors of the Ontario College of Pharmacy.

PROF. A. Y. SCOTT, B. A., M. D., Dean, and Lecturer on general Chemistry and Botany, is a graduate in honors in the Department of Natural Science, University of Toronto. He matriculated in 1878, graduating in 1882 with First Class honors. Although holding the degree of M. D., he has not been engaged in the practice of medicine, but has taught in Upper Canada College for the past nine years, in which work he is still engaged.

PROF. CHARLES F. HEEBNER, PH. G., Lecturer on Pharmacy, Theoretical and

G. CHAMBERS, B. A., M. B.

macy in the New York College of Pharmacy, and also for 12 years chemist in charge of the laboratory of Lazell, Dalley & Co., of New York. He is also author of a "Manual of Pharmacy and Pharmaceutical Chemistry," which is now

J. T. FOTHERINGHAM, B. A.

Germany attending Prof. Liebrich's Pharmacological Laboratory in Berlin University. He has paid but little attention to the practice of medicine, devoting himself principally to study and teaching.

More Remedies for Tuberculosis

Dr. Koch's bacterium essence has been named "Tuberculin." There are signs that this definition is rather in the way of an epitaph than of a baptism. But the wonderful boom of enthusiasm which his announcement excited naturally tempts other discoverers into the same field. A short time ago two important lectures were delivered— one in Paris, the other in Berlin— both by eminent investigators, in which methods of treatment
