The Athy Buard of Guardians, recently adopted a resolution impressing upon the Government the necessity of providing seed in spring for the poor people in the union whose creps have entirely failed. The chairman stated that from all accounts there would be great distress this winter in the mountain districts, where the cat and potate prop are a failure. A similar resolution was passed in Nass.

A woman who had purchased some bread in an establishment were imported bakers are employed was beaten by two men en the 15, says the Cork Examiner. On the arrival of the afterneon train from Branden a num-ber of strikers and the police came into collision over a man who ceme to werk at Messrs. Thempson's factory. Two of the men were arrested. It is expected that an arragement will come to between the operatives and some of the masters.

At New Ross, recently, a man named Kernedy, a resident of the County Carlow, was wandering about the streets in a listless manner. Several hours later, while near the quay, he fell unconscious to the ground. On exemination it was found that he was dying of hunger, and that he had esten nothing for two days. Stimulants were given him and he regained his senses. He was conveyed to workhouse by the police and died shortly after. Kennedy was at one time a wealthy

Serious reports are published as to the distress which is likely to exist in the hilly pertion of the Queen's County during the coming winter and spring. The potate crop along the hills running from K-llsshin towards Meyauno, Clough, Wolfhill, and Timahoe, is almost an entire failure, while the ost crep is God help them, they have nothing which can nearly as bad. Owing to the very wet season the oat crop has grown to straw, the grain being light and worthless. Much of the barley crop in South Kildare and Carlew remains unout, and nearly the whole of the crep is still in an unsafe condition in the

It is a new thing in Irlah politics to find a popular newspaper helping a archaser of coycotte belittle members of the Irish party. At a recent meeting of the Killarney Beard of Guardians, Mr. Shoehan, M. P , presiding, an alarming report was read from Dr. Han-nafin, the Medical Officer of Health of the Milltown district. He said that the health of the district was very good at present, but he had apprehensions for the future on account of the state of the petato crop, as hamet a couple of cases of bowel disease in the district which he can trace to the use of unripe or diseased petatees. A communication was also read from the Dispensary Cemmittee stating that they were quantmeus in considering that some employment should be given In the district to obviate the impending distress caused by the failure of the petate crop and the lack of employment for the laboring classes in this district. Alarming accounts frem other districts are also at hand.

Though the weather for the past week has been splendid-enabling very considerable progress to be made with the hay and oat orops-we regret there is very little ressen to doubt that the fears entertained regarding the potato crop will be only tee well justified. Even in such unions as Rescommon, where failure will not be by any means so complete as in more western districts, the loss will still be considerable, and much suffering will probably be the result. Taken in connection with the fall in the price of cattle-the genoral belief is that the figures which will be re-alised in October and November will leave nething, or next to nothing, for the summer's grass—the outlook cannot be a pleasing one for any class in the community—Roscommon Messenger.

The Rev. P. Melioy, of Clare Island has contributed to the Freeman a startling account of the impending distress in his sterile parish. Father Molley's report may be applied to a hundred districts in the South and West of Ireland. He says :- "Hero in Clare Island, where I writ?-and indeed it is in this place und it: inhabitauts. I am particularly interested—of one hundred and thirty families (the entire pepulation), at least one hundred and ten have to live exclusively on immatured and half-rotten tubers. Is this foed for workingmen? Is it feed for young growing up children? Even this wretched food cannot last beyond October. The little means the poor people had are now exhausted, for they have been buying Indian meal, most of them since Christmas (as there was a failure in last year's potato crop also), credit to get. Visitors to the North of Ireland will find themselves well repaid for going a litils out of the tourist's beaten track to see the new Cathedral of Monaghan, which is now approaching completion. The grandeur of the exterior is the first thing which excites admiration: but on entering the mighty pile the visiter-especially if he be of artistic mind-will feel yet more delight at the beauty of the decorations, and pleasure at the thought of the plety and enterprise which has raised such churches in a land where, not two centuries ago, a cave or the remote hillside were the usual places where Catholics dared meet to wership God. The Most Ray. Dr. O'Callaghan has ac-dressed a letter to Father O'Cannor, the Parish Priest of the peer peeple of the Calves Islands, with regard to the deplorable condition of affairs there. His lordshap says be is "Fully aware of the state of your parish spoken of. Many of them remember the necessarily exolte their serious alarm." His Lordship goes on to say that he knows Father O'Connor's zeal, and encourages him to render to his people every assistance in his power. Then comes a significant passage in his Lord-ship's letter. "But why is it that Mr. O Brien would lead them where we cannot follow. The Hely See has condemned the Plan of Campaign, and all are obliged to respect its authority, and obey its teaching."
This is, as we have said, a significant passage. Nay, more, it looks like a terrible judge. ment. The people of Calves Islands must starve in order to pay the landlord his rent. The Bishop in using the words quoted does so, we teel sure, under a prefound conviction that he is bound to de so, and with the greatest sorrow for the position of the tenaut. But it is useless to deny that these words practically tell the people that they must die. We have always regarded the Rescript with respect, but we were compelled, and we still feel compelled, to contist the truth of the statements annexed to the pronouncement, and on which it was apparently founded. One of these statement; was that the rents were exterted from I dieh tenants by agitators. If they are al-lewed to combine, and to club for this year their little resources for their own support, they may drag out a miserable existence through the winter. The Government have admitted the distress; they have voted sums of money to give employment. But they are at the same time sharpening the sword for the I landers who have no railways near boats to swoop upon them and oast them cut of their rock-girt cabins to perish of despair. "May God assist you," says Bishop O'Calleghan, "in the difficult circumstances in which you find yourself." Well may his Lordship add these sorrowful words to the fatal sentences which precede them .- Cork Herald

Mr. Mercier's Opinion.

NEW YORK, Oct. 5 -In an interview on the McKinley Bill the Hon. Mr. Mercier said :- "The relations of the countries," he said, "were such that if one was injuried the other must suffer. The new tariff will increase the price of the necessaries of life to a certain degree, and it will bring about an unfortunate and regretable condition of affairs between your c untry and ours. It is, in effect, retaliation and retaliation is war, and can war be prosperity, even in commercial matters? There is no telling where this thing will end or what will come of it, still I hope the outcome will eventually be a treaty and better understanding. I should mercial matters.

Whether they would I don't know, not being in the secrets of that Government, but I do not see any good reason why they should not try to improve Canada among the salving the provisional Canada's commerce by taking the provisional offer of reciprocity.

Value of a Strong Speech.

LONDON, October 3 —Sir John Macdonald's speech a: Halifax, N. S., yesterday, which was capled over here in extenso, attracts much attention in all quarters, and causes much rejoicing among the Conservatives, who accept the Canadian Premier's statements as voicing the sentiments of the majority of her majesty's sup-jects in the Dominion. In commenting on the speech the Conservative journals place stress upon the low estimate of the strength of the annexation idea, and of the party of Canadian independence and declare that this authoritative utterance disposes effectually of the silly bluster of the small but noisy party of disloyal-ty. They also approve the Premier's declara-tion that Canada's market cannot be wrested from her by any such unfriendly but short-sighted measures on the part of the United States as the McKinley Tariff Act.

Intriguing.

London, October 5,—Advices from Rome state that the British Minister through his friends in this city is bringing all the influence possible to bear upon the Pontiff sganat the bestowal of a Cardinal's hat upon Archbishop Walsh of Ireland. The effect of these appeals is not known, but it is said that the Pupe is deeply perplexed as between the British Government and the Irish people. It is claimed on ernment and the Irish people. It is claimed on behalf of the British Government that the elevation of the archbishop at this time would be an expression of approval on the part of Rome, an expression of approval on the part of Nationof the prelate's course in sanctioning the National League agitation and the plan of campaign,

The London Gas Works Troubles.
