

The First Book of Botany :

DESIGNED TO
Cultivate the Observing Powers of Children.

By ELIZA A. YOUMANS.

Price, \$1.

The attention of teachers is respectfully asked to the following testimonies regarding the character of this work :

From Prof. John S. Hart, Principal of the Trenton Normal School.

"This little book seems to me to supply the very thing needed, in our course of primary instruction. I refer not to the study of Botany, but to the method of studying it here developed. We have here a fourth fundamental branch of study, which shall afford a systematic training of the observing powers; and its general introduction into our primary schools would work a great and most important revolution in our whole system of education."

From Edward Smith, Superintendent of Schools in Syracuse, N. Y.

"It is the only work I have ever seen that meets the wants of our schools in the lower grades, and I believe it will do more to turn the attention of teachers into the proper channel for the education of children than any thing heretofore published."

Prof. Wm. F. Phelps, Principal of the Minnesota State Normal School, Winona, wrote to the publishers:

"I have seen the advance sheets of Miss Youmans's admirable 'First Book of Botany;' send me a hundred and fifty copies as soon as it is printed."

After using it several weeks, Prof. Phelps thus closes an elaborate notice of the book in the *Winona Republican* :

"Every class in the Institution is now devoting a regular portion of its time, daily, to this study pursued in this practical way. The results thus far are highly satisfactory. It has awakened a new interest in study throughout the school. Many, who have heretofore been indifferent in their work, have taken hold with great zeal, and are pursuing this fascinating branch with ardor and enthusiasm. It is no uncommon spectacle, as we are informed, to see children occupying their play-hours with a bunch of plants, and, book in hand, pursuing this study as a pastime. This, surely, is an unerring test of its value, as it is the highest recommendation that could be given of its adaptation to the wants of our primary schools. We heartily commend the book to parents and teachers everywhere."

From the New York Tribune.

"The strong point of Miss Youmans's book is that it combines methodical object-study with the acquisition of an established branch of knowledge; and we cordially recommend it to teachers as a valuable contribution to educational progress in one of its most important aspects."
