PORK AND BEANS BOOST NEWSPRINT

Unique Reason Advanced at Ottawa Enquiry for High Paper Costs.

Ottawa, Jan. 14.-It may seem a far cry from pork and beans to a daily newspaper, but Canada's paper control tribunal was cold today that the high cost of these prime necessities of logging camp life is one of the things which makes newsprint expensive. The tribunal was also told—George H. Montgomery, mill counsel, being the teller—that the newspapers have acted downright shamefully during the newspr.nt enquiry; that they wanted action by the government, not by the commissioner, and only attended Mr. Pringle's investigation for a short time because they were on a fishing expedition for evidence to be used against Canadian mills in a United States processition under the Sherman combine

In fact, he intimated that the nice, good paper mills had tacitly agreed to prolong the period during which they

Paris, Jan. 14.—Russia may be represented, together with all the other nations that were engaged in the war against Germany, at the first formal meeting of the peace conference. Whether Russia will have present at that time a delegation of prominent Russians, irrespective of party, or other spokesmen, if any, probably will be decided at the next meeting preliminary to the congress. This will be held tomorrow because of the opening of the session of the French Parnament today. All the delegations, with the exception of the French, which will be occupied with

parliamentary affairs, will employ their time in preparations for Wednes-The first question to come up be fore the actual peace conference will be that of the proposed league of na-tions, and it was made known today that it had been planned for the con-ferees to devote twelve hours daily to this work, if necessary, until it is on the way to completion. There is some reason for believing that the first plans for the structure of a league of nations to be laid before the conference probably will be somewhat composite, representative of a consensus of opinion on the part of the American, British and French statesmen who have been discussing the subject. It will not purport to be a flinished product, but is intended to serve as a starting point for development.
