HAPPENINGS IN STRATHROY

Presentation To an Esteemed Teacher—Sunday School Picnic.

Strathroy, June 22.—Miss Kent, for the past eight years commercial teacher in the Collegiate Institute here, has tendered her resignation, and will shortly leave the service of the school board. Yesterday the pupils met, with Mr. Kerr, the principal, in the chair, and presented Miss Kent with a beautiful silver tea set, consisting of a pitcher, sugar bowl, and cream jug. The presentation was made by Miss Chalmers, while an address was read by Miss Cadhead. Short addresses were made by Mr. Auld, Mr. Forth and Fred S. Miliken, a pupil of the school, who has won the Edward Howard arithmetic prize and the T. V. Robinson prize for public speaking.

Mr. Johnson, public school inspector for West Middlesex, has sent out notices that the arbitration in the school dispute in section No. 1 on July 23. The trouble arises over the location of the school, many of the ratepayers claiming that it is not as near to the center of the section as it should be, and that a number of the pupils are subjected to great inconvenience as a result. The school has only recently built.

Mrs. George Evey, of Strathroy, who was injured by lightning during the recent storm, is on the road to recovery. The lightning struck the house and passed down to the room occupied by Mrs. Evey, the latter being partially paralyzed by the shock. The house was not damaged.

The annual picnic of the Bethesda

TORONTO'S WATERWORKS.

Toronto, June 21.—It is proposed that Toronto shall expend \$710,000 in the improvement of its waterworks system. City Engineer Rust made a detailed report today of what was required and the total expenditure reached the figure named. The principal item is a new pumping engine to cost \$250,000. A bylaw to authorize the expenditure will be submitted to the ratepayers.

Feather Beds, Pillows and Mattresses renovated and sterilized; also manufacture of Mattresses, Feather Pillows, Quilts and Spring Beds. Beds and Mattresses cleaned, repaired, and re-stuffed. IRELAND THROUGH CANADIAN EYES

OWNERS OF P. M. TO BE ASSESSED

Ex-Ald. Geo. Armstrong Gives His Impressions of the Green Isle.

J. P. Morgan & Co. Propose Settlement of Michigan Railroad Tangle.

Ex-Ald. George W. Armstrong, who is still in Dublin, sends The Advertiser the following interesting letter from that city:

Dublin, June 13.—The more I see of Ireland the more I am in love with it. It is a most beautiful country. It certainly merits its name, "The Green Isle." Its fields are covered with verdure and appear to be in a high state of cultivation—that is, in the south and eastern parts. Its little hills and valleys are every side and the people kill and live on the fatted calf. I am told that on the western side where the destitution exists. As we pass between its hills and see the beautiful streams of crystal waters meandering its valleys, we are strongly impressed with the idea of fertility, restful peace and outward content; its pastures waving with abundance, and horses, bovines, sheep and other animals, grazing in lazy serenity. All nature seems smiling with delight, only surpassed by the merry laugh, the healthy, happy, smiling faces of Ireland's attractive children.

I have been to the world-renowned Blarney Castle, toiled up its solid stone steps, built in walls seventeen feet thick; but dared not venture to jeopardize my ex-aldermanic neck to kiss the equally famous, world-renowned Blarney Stone.

I also visited the Lakes of Killarney. I shall not attempt a description. This would be beyond my limited powers. There is a saying: "See Venice and die." I would reverse this and say: "See the Lakes of Killarney and live to see them again. The whole district is classic. Here we have the meeting of the waters," of which the poet sings:

"There is not in the wide world a valley so sweet,
As the dear little spot where the bright waters meet."

And the poet is quite right, as poets generally are.

It is really wonderful what a power and influence there is in a penny (20) postage stamp to cover the empire; a railway time-table, an electric-car ride, a morning or evening newspaper, untold varieties of trinkets in the stores, yea, when you ask the price of most small matters you get the invariable reply, "A penny, sir."

An old woman, wretched, dilapidated and blind, asked me an alms. I put the inevitable "penny" in her palm, and if the "blessing" I received is fulfilled I shall sooner or later have a high place:

"Around the throne of God in heaven."

While on this line, allow me to mention a little incident that took place when I was at Blarney. An old dame far beyond the allotted three score years and ten in her actions as sharp as a needle, and with a tongue even sharper still, opened up a conversation with me, in the course of which I asked her how it was that in Ireland there were so many churches and so many poor people, with wretched hovels for their homes. She replied: "Sure, sir, we give the best to God."

It reminded me of the incident in the New Testament, "but she of her want did cast in all that she had, even all her living."

It is said Saint Patrick drove all the snakes out of Ireland. One must have been not able to drive that one out. The snake is known by the name of "D. Ts." Every Irish city, town and village has too much whisky; Ireland is the publican's paradise. Wouldn't I like to drive out, or crush out, that last and most dreadful of snakes! Yours truly,

GEORGE W. ARMSTRONG.

A MARINE MYSTERY

Lake Boat Reports Passing Through Large Quantity of Wreckage.

Detroit, June 21.—A mystery of the lakes may be wrapped up in the report made to Capt. J. W. Westcott by First Mate Wm. J. Hayes, of the steamer Harvey M. Brown, which passed Detroit today. Hayes reported that between 4 and 5 o'clock Thursday morning, at a point 20 miles north of Long Point, on the course from Buffalo to Southeast Shoal, the Brown passed through considerable wreckage. The morning was very foggy and the mate could not see a great distance, but was able to see many parts of boats, garbs and decking. Also the top of a round pilot house. These were painted white and lead color. There was also a quantity of smaller pieces.

As there have been no storm and no boats are reported missing, the matter remains a mystery, unless, as Capt. Westcott surmises, the parts represent an old wreck coming to the surface.

The Brown also reported that she lost a deckhand by drowning at the Buffalo dock. The man was standing on the dock and fell in. His body was recovered, and his relatives in Sandusky, Mich., notified.

ENGLISH SPAVIN LINIMENT

moves all hard, soft or calloused lumps and blemishes from horses, bloods, spavins, curbs, splints, ringbones, swellings, stifles, sprains, sore and swollen throats, coughs, etc. Save \$50 by use of one bottle. Warranted the most wonderful Blemish Cure ever known. Sold by Callard & McLachlan, London.

Feather Beds, Pillows and Mattresses renovated and sterilized; also manufacture of Mattresses, Feather Pillows, Quilts and Spring Beds. Beds and Mattresses cleaned, repaired, and re-stuffed. Also, Upholstery, Carpets, and Drapery cleaned and renovated. 217 E. BAY ST. & CORNER OF KING ST. E. LONDON, ONT.

New York, June 21.—J. P. Morgan & Co. have announced the details of the settlement of affairs of the Pere Marquette Railroad Company. The adjustment centers chiefly about the preferred stock, which as at present constituted, is not preferred as to assets.

A large number of the preferred shareholders have agreed to subscribe to \$5,000,000 five-year 6 per cent debenture notes to the extent of 50 per cent of their holdings.

These notes are to provide for payment of the company's floating debt to a similar amount, which is at present outstanding in the form of receiver's certificates. In return they are to receive a new issue of preferred stock, with a bonus of new stock amounting to 15 per cent of their holdings. The new stock will be preferred as to assets and will be cumulative as to dividends of 4 per cent, 3 1/2 years from next July.

It is stated that the Pere Marquette stockholders have furthermore agreed to cancel the lease of the road by the Cincinnati, Hamilton and Dayton Company. This relieves the Cincinnati, Hamilton and Dayton from paying the guaranteed dividends on the Pere Marquette common and preferred stock.

When the stockholders at their meeting vote in favor of this plan, the Pere Marquette will be taken from the hands of the receiver. It is reported that the Morgan interests will then make it a local Michigan company, to be run independently, with several Michigan capitalists elected to the board.

COBALT NEWS

A special from Cobalt says: The rush up the Montreal River continues; every day a very large number of canoes are seen working their way steadily up towards the rich area, while all the steam, naphtha and gasoline launches available in these waters are laden with prospectors. It is impossible to estimate how many thousands men are prospecting the Montreal River, and the reports that are received from those who have as yet led one to believe that it will ultimately prove to be very much richer than the Cobalt area.

Last week some miners who have been in Larder Lake reported here that they have seen the richest discovery of gold ever uncovered in the world. The samples of ore taken from the veins were full of free gold, some of the gold being in little nuggets the size of a pea.

Many persons who are interested in Larder Lake, and who have spent considerable time there are more than confident that the district will prove eventually to be the richest gold mining vein in the world. The public are getting more anxious every day to learn the result from the government mining engineer's report on that district, as doubtless a great deal will depend on the nature of the report.

Cobalt shipments last week amounted to 462,700 pounds, with Contagins in the lead. The following table shows that only three mines shipped, but a great many cars were ordered for next week:

Right of Way sends two cars, one of high-grade, and one of second-class Contagins, 278,000 pounds to Perth Amboy.

Right of Way, 127,300 pounds, to Copper Cliff.

Nipissing, 57,400 pounds, to Bergen Junction.

It will be seen that nearly one-half of the total output came from Contagins.

The question has been asked as to why the La Rose did not ship.

One in authority at that mine has given a solution. The smelter negotiator, Henry Thimmins is now on his way to Cobalt, having made very satisfactory arrangements with the American Smelting and Refining Company, who will buy the La Rose ore.

Mr. Thimmins has sold them 10,000 tons of ore and this contract will be filled as fast as the ore can be sent.

Eight carloads will be sent immediately and steady weekly shipments will be maintained.

Cobalt camp is rapidly showing up its greatness and the returns of 1907 will amply justify the optimism that dullness in the stock market cannot weaken.

The Evans mine is making its first shipment from the Portage Bay district or extension.

English engineers are invading the camp. Several sales are about to be effected, particulars of which will be given later.

Gold Island a Mass of Quartz.

Cobalt, June 19.—Mr. A. Cadieux, superintendent for the Gold Island Larder Lake syndicate, left here yesterday for Larder Lake with a gang of miners, for the purpose of commencing operations on Gold Island, located in the northwest arm of Larder Lake. This island is a rich mass of quartz, containing high gold values, and mining engineers have reported that a stamp mill in operation there will return high values in gold from the very start. Russell & Company, Traders' Bank Building, Toronto, are the organizers of this syndicate.

The Kind You Have Always Bought

Beware the Signature of *Dr. H. H. Plummer*

CASTORIA

The Kind You Have Always Bought

Beware the Signature of *Dr. H. H. Plummer*

THE HIGHEST RECOMMENDATION

for the shares of the LUCKY BOYS GOLD MINES, LIMITED, is the fact that large blocks are being rapidly subscribed for at Cobalt, Hatterbury, New Liskeard and Larder Lake. We are receiving letters from mining engineers and miners every day reserving large blocks of LUCKY BOYS shares. These men have been over the ground, and in all of the letters we receive from them they say that the most profitable mines in the Larder Lake district. The fact that LUCKY BOYS will be the greatest and their own money in LUCKY BOYS should be sufficient to satisfy the most skeptical. Miners everywhere are all pinning their faith to the LUCKY BOYS. They are buying all the shares they can. They realize what a splendid investment they are getting in buying LUCKY BOYS in making a fortune? Bankers and conservative business men throughout the whole country are now buying LUCKY BOYS for their investment. We strongly advise our clients not to hesitate, but buy, this price, and at the rate that these shares are being absorbed we predict that they will not last long. The public will be falling over themselves six months from now trying to buy

LUCKY BOYS

at One Dollar per share or more. We strongly urge the immediate purchase of these shares. We are placing our own funds in it and we are willing to stake our reputation on the merits of LUCKY BOYS.

The LUCKY BOYS' properties consist of 20 claims of 40 acres each, making a total acreage of 800 acres. Some of the claims adjoin the famous Reddick claims, others adjoin the Proprietary Gold Fields, and others adjoin the wonderful Blue Bell properties.

We have sent our own mining engineers to examine and report on the properties, we have looked exhaustively into the merits of LUCKY BOYS before offering the shares to our clients. We question if an opportunity like this will ever present itself to you again. We advise our clients to buy LUCKY BOYS.

We advise you to buy all you can, you are bound to greatly profit thereby.

The stock of the LUCKY BOYS is actually worth a great deal more money than the price we are asking for it. Our engineers figure there is in sight on the properties of this Company gold equal to many times the par value of the total capitalization of the Company. All it requires for investors to make money is to have faith and confidence in the LUCKY BOYS proposition, and we strongly advise investors to put every dollar that they can in these shares at the present price.

Could you visit the Larder Lake district and examine the properties, as we have done, you would not hesitate a single moment in placing every dollar at your command in the shares of LUCKY BOYS.

6 CENTS PER SHARE

(Par Value, \$1.00. Fully Paid and Non-assessable.)

It should be noted that all of the Directors of the Company are well-known and successful business men—not men that are simply interested in a mine—but men that are miners in every sense of the word, and who know how to operate, maintain and conduct a mine in a business-like manner. Gentlemen are just the kind of mining men that investors should be glad to become identified with.

The fact that some of these gentlemen, who are Directors of the Company, and originally the cash that they receive for their interest in the properties should be sufficient to satisfy the most skeptical. These men know what a splendid investment they are getting in buying the shares at 6 cents each.

The mineral production during the current year has been remarkable as compared with former records, and it will be still greater in 1907. Remember, when you see the enormous advances in the prices of Larder Lake mining securities that are coming immediately and that will continue for months and months, if not for years, that we told you to select one or more good stocks, and that a small investment in them will yield inside of a very short time enormous profits that would be impossible in any other industry.

We are not trying to sell stocks of LUCKY BOYS to uneducated or half-witted people. We are trying to interest legitimate business men in a proposition that we believe will turn out to be one of the greatest of its kind the world has ever known, and again we say, if you are not in a position to hold this stock until such time as the LUCKY BOYS GOLD MINES, LIMITED, properties are developed, we do not want you to buy it. A mine cannot be developed in a day any more than a railway of 50 miles can be built in an hour, and no railway ever paid dividends or ever amounted to anything until the trains were running, and a mining property cannot amount to anything until the ore is being treated. People who purchase the stock of the LUCKY BOYS cannot expect the Officers and Directors of the Company to pay dividends until dividends are earned. We do honestly believe, however, that before the present summer is past LUCKY BOYS will be paying dividends to its stockholders. We are in business to-day and we propose to stay in it while there is any business to be had, and we say to you now that in some years to come we expect to be counted among the financial houses that are spoken of and referred to in the highest terms by investors.

When we offered the first block of Blue Bell shares, we predicted that the Larder Lake district would be the greatest gold district in the world, and our predictions are being endorsed daily by fully endorsed our predictions. The time is not far distant when the eyes of the whole world will be concentrated upon the wonderful golden north of New Ontario.

A year ago very few white men had trodden the trail through the Larder Lake district. To-day the greatest stampede the world has ever known is taking place. Capitalists, mining engineers and prospectors are now "hitting the trail" and hurrying through as fast as they can. Millions of dollars will be offered for some of the Larder Lake properties within the next few months.

THOMAS MCGAMUS,
President.

Vice-President of The Tumbukking and Hudson Bay Mining Company and President of The Tumbukking Telephone Co.

The price of LUCKY BOYS shares will **TAKE A JUMP** some of these days, and then it will be too late to buy them at the first issue price.

FRANK WESLEY HAYNES
Vice-President.

Director of the New Liskeard and Northern Ontario Mining Company.

TWAIN MAKES 'EM GASP

Shocks Staid Londoners by Parading Streets in a Bath Robe.

London, June 21.—Every staid Londoner who witnessed an exhibition given by Mark Twain yesterday fairly gasped for breath. Twain appeared in the foyer of Brown's hotel shivering only in a blue bath robe and slippers with about three inches of bare legs showing. The sight of an elderly man with bushy white hair in this unconventional costume startled the patrons of the hotel and worried the employees tremendously, but were staring at him, and then, accompanied by his secretary, walked out the front door of the hotel.

The sidewalks were thronged with girls on their way to work, who stepped short and gazed in astonishment at the American humorist as he made his way towards a bath club opposite the hotel.

After his bath Twain returned to his hotel in his three-piece costume and had the pleasure of making a lot more people open their eyes wide.

The manager of the hotel was agitated as he saw Twain enter the hotel, but didn't make a fuss. His feeling was that a great man like Twain must be allowed to do as he pleased.

Twain himself professed wonder at the excitement he had caused. "I simply wanted to take a bath," he said, "and did the same thing I often do at the seaside. London is a sort of a seaside town, isn't it?"

Generally speaking, it may be said that most of the ivory imported into Europe comes from Africa. Some is Asiatic, but much that is shipped from India is really African, coming by way of Zanzibar and Mozambique to Bombay.

On many mushroom farms the fungi are grown under ground. The spores are planted in long, raised beds.
