V. C. For Airman Who Brought Down Zeppelin Rushing Upon London

London, Sept. 5.—That a Zeppelin airship was badly damaged in the raid on the English southeastern counties on Saturday night, in addition to one destroyed, was indicated in an official sttement given out this afternoon by the

government press bureau. It said:

"An important part of an enemy airship was picked up in the ties. The ship undoubtedly suffered severe damage from gunfire." ties. The ship undoubtedly suffered severe damage from gunfire."

King George today awarded the Victoria Cross to Lieut. William Leefe Robinson of the Royal Flying Corps, for bringing down a Zeppelin while the airship was approaching London on Sunday night. The British official press bureau says that the cross was awarded for the most conspicuous bravery. Robinson attacked the Zeppelin under circumstances of great difficulty and danger and sent it crashing to the ground a flaming wreck. Robinson had been in the air for more than two hours and had previously attacked another airship.

Capture Defensive Works Between Moquet Farm and Point Where British and French Join Forces—"New French Drive"—Russian Victories

Paris, Sept. 5-The capture of Soyrecourt and Chilly by the French yesterlay, makes a total of twenty-nine villages taken since the start of the offensive on the Somme front. The positions wrested from the Germans vesterday were powerfully organized.

At Barleux, one of the strongest positions on this front, repeated direct at-tacks were unsuccessful and the French finally reported to a turning movement, attacking to the southwest. The Germans counter-attacked no fewer than Serious For Braves at Critical Time six times yesterday in a desperate effort to regain lost ground.

The work of inspecting the water supply system of the city, along the Loch Lomond extension, has been continued over the week-end and holiday by the commissioner of water and sewerage and Engineers Clarence Goldsmith and Frank McInnes with a view to securing an accurate knowledge of the exact condition of the system and its capabilities. Tests are made at frequent intervals and the inspection is a thorough one .
