

HP YOUR SAUCE

Try this much-talked-of Sauce.

Everybody is delighted with its new and delicious flavour, that's why it is selling so freely everywhere.

Of all Grocers.

Turning Failure Into Success

BECAUSE a hundred inventors failed to make machines that would fly, has nothing to do with the hundreds of aeroplanes that dot the sky over England, France, Belgium and Canada.

Because you can't make a rich, delicious cup of coffee with the brand you are using, has nothing to do with your success with

SEAL BRAND COFFEE

Rightly chosen—expertly blended—perfectly roasted—“Seal Brand” comes to you with all its rich, aromatic flavor sealed in the tin and ready to delight you with its rare deliciousness.

In 1/2 and 2 pound tins—in the bean, ground, or fine ground for percolator.

CHASE & SANBORN, MONTREAL

IS SENT TO JAIL FOR CRITICIZING GOVERNMENT.

Port Arthur, Ont., May 28.—Wm. J. Hanna, who claims to be a railroad man from Rivers, Man., was sentenced to six months at hard labor upon conviction before Provincial Magistrate O'Brien of making seditious remarks on board a train.

He pleaded guilty but the evidence of one witness was taken to show that he had described the government as “rotten,” and that Canadian Red Cross nurses were immoral.

“It's a wonder the people on the train did not kick you to pieces,” said the magistrate. The sentence was the maximum under the Defence of the Realm Act.

Reasons for the Senate.

Winnipeg Tribune.—Of course, the Tribune is quite alive to the fact that there are and always have been reasons why the Senate does exist. The Senate has always been a convenient party bribe fund, of which both of the great historic parties have availed themselves freely and unblushingly. On account of its veto power over legislation of its entirely irresponsible character, and of the life tenure of its members, it has been a useful tool in the hands of the anti-public interests, as has been most brazenly shown during the session now closing. These are very powerful and very obvious reasons why the Senate does exist. They would hardly do, however, to support before the public the contention that the Senate should exist.

GETS FIRST WORD FROM RED CROSS

Mrs. C. A. Smith of Duke Street Learns of Husband Being in Hospital Because of Burns

Mrs. C. A. Smith of 102 Duke street has received through the British Red Cross a message regarding her husband, Gunner C. A. Smith of the 2nd Heavy Battery, who is at Sudborth Hall Hospital, Ongar, Essex, England. The message is as follows:

“He is suffering, as you know, from the effects of accidental burns on the hands and legs. He is being thoroughly well looked after, everything being done for his comfort and complete recovery.”

This is the first word that Mrs. Smith has had of this accident; there had been no official advice from Ottawa or through the casualty list, and she is anxiously awaiting further information. Gunner Smith suffered from shell shock at the time of the Vimy Ridge fight but returned to the line soon afterwards.

Kings County.

Andrew Bell to James Carney, property in Hampton.

Johanna Dunn to Martin Dunn, property in Sussex.

Martin Dunn to Joseph Dunn, property in Sussex.

Alex. Roulston to Almer Megan, property in Kingston.

AUTOMOBILE FOR THE SAFETY COMMISSIONER

One of the matters which may be dealt with in the common council at the weekly meeting this afternoon is a recommendation for the purchase of an automobile for the commissioner of public safety. Since taking this office six years ago, Commissioner McLellan has covered his rounds of the various stations and carried out the other work of the department, which requires considerable traveling around the city, with the aid of a horse and carriage. He now finds that this means of locomotion is not rapid enough to keep pace with the demands of the work, and he regards the cost of keeping up a horse as making the question of comparative economy a live one. If he recommends that a car be purchased, Commissioner McLellan will ask for something larger than a runabout, in order that it might be used for general purposes in his department—and it won't be a tin Lizzie, either,” he said this morning.

IN WALL STREET.

New York, May 28.—Pressure against war issues was resumed at the opening of today's stock market, equipments, motors and affiliated specialties yielding one to two points. U. S. Steel rallied quickly from its depression. Ralls were irregular, although a two point break in Canadian Pacific was more than neutralized by the strength of Reading, Union Pacific, New York Central and New Haven. Industrial Alcohol, Marine preferred, and Colorado Fuel ran from three to one points. U. S. Steel was unbroken in exceptionally large volume down to 102-1/8, an extreme reversal of 2 1/2 points. New low records were made by Liberty 4 1/2, on their further decline from 47-3/8 to 47-1/2, and the second four at 94-3/8 to 94-1/2.

CORN AND OATS

Chicago, May 28.—Severe drops in temperature brought about upturns today in the value of corn. The sudden change of weather conditions was generally believed to be adverse to crop progress. On the advance in prices, however, selling increased, owing partly to official denial of reports that the government had placed large contracts for alcohol. Opening quotations, which ranged from 5-8 to 11-4 cent higher, with June 1-37 and July 1-38-1/2 to 1-39-1/2, were followed by a moderate reaction.

Oats hardened as a result of the corn strength. Shorts were the chief buyers. After opening 8-4 cent off to 8-8 cent up the market settled slightly further gains.

Not Even Honor Among Thieves.

Boston Transcript.—The next thing in national damage to being Germany's enemy is being Germany's ally. The Austrians, impoverished and hungry, threatened with the disintegration of their empire, shamed in the eyes and hated in the hearts of the world, know what that means. The Bulgarians are just finding it out in their turn.

MAY BE TRANSFERRED FROM THE BATTERY TO DEPOT BATTALION

There is a rumor emanating from a semi official source that all those who enlisted in the 9th Siege Battery after the unit had its full complement to the number of 186 men, are to be transferred to the Depot Battalion.

The battery, it is said, is over strength and there is no authorization for taking on so many men. If the transfer should be made, it will mean that at least 100 members of the Siege Battery will be attached to the depot. The men liable for transfer will be those who enlisted after the full complement of the battery was signed on.

Machine Gun Most Efficient Of War Weapons

Has Caused Most of the Casualties. One Gun Calculated to be Worth in Field Almost Battalion of Riflemen

London, April 19.—(Correspondence of The Associated Press).—Of all the weapons used in the present war, the machine gun has unquestionably proved itself the most efficient. Says a British expert in the Daily Mail, “Probably a majority of the casualties in the war have been caused by this weapon; certainly the greater proportion of the enormous losses during the recent fighting have been so inflicted.”

“Any type of machine gun in the hands of a skilful operator has the same destructive effect upon men moving in mass formation that a keen-edged scythe has in a field of ripened wheat. It cuts broad swathes; nothing can stand against it.”

“A well-served machine gun is the most formidable thing that attacking battalions have to face. It is not merely the front ranks that suffer. At any place approaching close ranges, the bullets will go through the front-rank men, often through the second rank as well, and kill or wound those immediately behind them.”

There are several types of machine gun now in use in the British army, such as the Lewis, the Maxim, the Vickers, and the Hotchkiss. All are mobile. They can be moved quickly from one place to another, advantage being taken of any cover that offers. Each class of machine gun has with it a squad of about ten men. Should they find themselves pressed too closely, they pick up their weapon, fall back with it, and re-open fire upon the enemy from the next favorable position.

One authority has declared that in the field one machine gun is worth almost a whole battalion of men armed with rifles. Few soldiers can keep up fifteen rounds a minute rapid-fire with a rifle, but a machine gun can discharge 600 rounds in a minute, and the Vickers can discharge 1,600 rounds without stopping. Bullets pour from the muzzle in a rapid devastating stream, and as these guns use the same kind of ammunition as a rifle, there is little difficulty in keeping them fed.

The Lewis gun is described as the most mobile. One man fires it, using forty-seven rounds in succession. Beside him is another man who puts on fresh trays of ammunition as required, the change being made in two seconds. Meanwhile other men are hard at work filling trays and passing them on for use. The gun has an effective range of about 1,200 yards and can be fired either from a stand or a parapet, the gunner placing the piece to his shoulder as he pulls the trigger.

The Maxim and Vickers guns are fired from a tripod, the gunners squatting with legs a-straddle, and pressing a key. So long as he keeps his finger on the key the gun continues streaming out bullets as the belts, each holding 250 cartridges, fly through it. Gripping the handles with both hands, the gunner moves his weapon back and forth, playing on the advancing troops much as a fireman plays a hose on a burning building. Guns of this kind can also be used for putting by batteries, and it is possible to attack with them targets one cannot see.

At the beginning of the war, the British army had two machine guns to each infantry battalion. The number is no much larger. In addition, a special machine gun corps has been formed.

TRACED AND SANK U-BOAT.

Commander of British Destroyer F. loved Torpedo's Wake.

London, May 12.—(Associated Press).—The resourceful commander of a British destroyer recently accounted for a German submarine by following up the wake of a torpedo to its apparent point of launching and then dropping depth charges. The German torpedo, aimed at the destroyer, passed under it. The British vessel swung around and hurried to point near where the wake of the torpedo was first seen. Depth charges were dropped and soon the bow of the submarine came out of the water. The destroyer tried to ram the enemy, but the submarine suddenly listed, and sank like a stone. Other bombs dropped by the destroyer brought up the scene.

Some Genuine Partings.

Simcoe Reformer.—We have heard of one school which opens at ten o'clock new time, and closes at five o'clock daily. The leading trustee would not submit to the “changing of the Lord's time by that scoundrel, Borden.”—Port. Borden News. He would make a good team mate for a woman of whom we were told a day or so ago. She declared that it would give her greater pleasure “to shoot Borden than the Kaiser.”
