POR PURIFYING THE BLOOD, nothing has ever been offered which can compare with this EXTRACT OF SARSAPARILLA. It is found a great promoter of health, when taken in the spring, to expel the humors that rankle in the system at this season of the year. Many complaints have their origin in the spring, and in the causes above mentioned, for which no better remedy has ever been devised. By its use multitudes can spare themselves from the endurance of foul eruptions and ulcerous sores, through which the system strives to rid itself of corruptions, if not assisted to do this through the heatural channels of the body by an alterative medicine. Cleanse out the vitiated blood whenever you find its impurities bursting through the skin in pimples, eruptions, or sores; cleanse it when you find it is obstructed and sluggish in the veins; cleanse it whenever it foul, and your feelings will tell you when. Even where no particular disorder is felt, people en joy better health, and live longer, for cleansing the blood. Keep the blood healthy, and all it well; but with this pabulum of life disordered there can be no lasting health. Prepared by Praetical and Analytical Chemists.

lic mind that the \$10,000 prize should remain in St. John, and every one of the three or four hundred who watched the drawing yesterday had a vague idea that after number was announced—blanks and small prizes—hope was deferred, but without making the heart sick. Confidence in the luck of St. John remained. But when the lucky number was announced, and the fact of its being owned in Montreal was told, the hopes were blighted in the bud, and seven ighths of the people rose and walked way in silent disgust. The vague hope hat each one had cherished for himself notwithstanding the philosophic indiference we had tried to instill into the eople, was crushed as flat as a tond rodden on by an elephant, and they dearted to lament for what might have een.
