Re Statement to House of Commons, January 30, 1947:

Hon. members will no doubt be anxious to have at the earliest moment possible a statement of the situation with respect to Canada's participation in the peace settlement with Germany. The government is anxious that Canada's position in this particular should be made known to Parliament at the earliest possible date. With the permission of the House I should like to give hon. members a statement before we adjourn.
