CHURCH OPENING IN AMHERST .- It is in contemplation to open the Basement of the new Methodist Church, Amherst, on Sabbath next, 6th inst., Preaching by Rev. I. Sutcliffe and A. W. Nicolson.

THE conflict in the New York Baptist Minister's Association on "Open Communion," seems no nearer a close than it was a property ago. We hope it will go that is by such discussions that the other absurdity and unchristian character of close communion will be seen. The spirit which hedges in one secrament by another, that finds its best assurance of orthodoxy and the favor of God by refusing Christian fellowship with all who do not see exactly as it does, will disappear as true piety and intelligence advance. ceive, great satisfaction to the milliners and tradesmsn of the West End, who not unnaturall look fsrward to reaping profit out of the arrangement. Ever since his last accession to the Premiership, Mr. Disraeli has been anxious to associate the *eclat* of a Royal opening of the Chambers with his name, that honor having o late been sparingly bestowed in convection with his more immediate predecessors. Both last year and the one preceding it he received promises from the Sovereign that she would go in State to Westminster, but the ill health of Prince Leopold on each occasion prevented the intention being carried cut This year, I understand, the Royal promise has been given upon the same conditions, and its fulfilment will be subject to eventualities.

A BOILING TAKE.-The discovery of a boiling lake in the island of Dominica has excited much scientific interest, and investigations of the phenomenon arc to be made by geologists. It appears that a company explained the steep and forestcovered mountains behind the town of Rosseau, came upon the boiling lake. about 2,500 feet above the sea level, and two miles in cir amference. On the wind clearing away. for a moment, the clouds of sulphurious steam with which the lake was covered a mound of water was seen ten feet higher than the general level of the surface, caused by ebullition. The margin of the linke consists of beds of sulphur, and it: overflow found exit by a waterfall of great height.
