GOSSIP

BUTTERMILKING COMPETITION

During the past thirty years nothing has been done more to advance the interests of dairying than the introduction and growing use of De Laval Cream Separators, both in creameries and on the farms. They have transformed the dairy industry from unprofitable drudgery into a profitable department of the farm, and one which may be conducted with comparative ease. So generally is this fact recognized that it is only a matter of a very short time till even a man keeping two cows will not be without a cream separator. We are informed by the Company that at the present time there are over one million De Laval machines in use and that with the introduction of the New Improved styles in 1908 the demand has increased over 100%. The manufacturing equipment has been doubled and factories have operated night and day since last February, but the Company state it has been

It is the man who looks for trouble who generally finds it. When Bishop Dudley was about to transfer the field of his labors to Kentucky, some of his friends were inclined to remonstrate.

"So you are really going to Kentucky?" said one of them.

"Yes, indeed," replied the bishop.

"But do you know what kind of a State that is?" inquired the anxious one. "Why, I saw in the paper that in a Kentucky town one man killed another dead for just treading on a dog. What are you going to do in a place like that?"

"Well," replied the bishop, calmly, "I am not going to tread on a dog."

William H. Hotchkiss, one of the directors of the American Automobile Association, said the other day in Buffalo "I believe that a man, to love automobiling thoroughly, must know all about his car—how to run it, how to clean it, how to repair it, how to take it apart. A friend of mine owns a small car. He has no chauffeur, and every time he goes out a breakdown occurs. No wonder. He said to me the other day: 'I took my runabout all apart yesterday.'"

DE LAVAL CUP IN BUTTER-MAKING COMPETITION

quite unable to fill all orders. This is a high tribute to the excellence of De Laval machines and one fully justified by the continual effort of the Company to provide the very best in Cream Separators.

The De Laval Separator Company has always closely identified itself with the interest of dairying and this year has awarded for competition at Winnipeg, Portage la Prairie and Brandon Exhibitions, handsome silver cups valued at \$100.00 each. The illustration herewith will enable our readers to gain an impression of the cups to be competed for and needless to say they have excited considerable interest among De Laval users and others. Only bona fide owners of De Laval machines or members of their households are eligible to compete and the cups must be won three times in five consecutive years to give permanent possession. Many entries have been made and the fight for possession of these valuable awards at the three Exhibitions promises to be a keen one. The names of the successful ones will be duly announced through these columns.

"Did you?" said I; and knowing his impracticability, I added, seriously: "Well, when you do that, you must always be careful not to lose any of the parts." "Not to lose any of them?" said he. "No fear. Why, when I put that machine together again yesterday, I had nearly two dozen pieces left over."

GREAT MILK AND BUTTER RECORDS.

The Superintendent of Advanced Registry of the American Holstein-Friesian Association, in his report to the annual meeting of the Association recently held at Syracuse, said:—

"During the past official year our breeders have had 2,055 cows under test for periods of not less than seven days. Of these 2,055 cows whose records were reported, 47 began their records not less than eight months after calving; while 14 of them made semi-official yearly records. Of the 1,004 ordinary records reported, 72 were extended to 14 days, and 173 to 30 days. The average of the seven-day record by ages was as follows:—583 full aged cows averaged: Age, 7 years; days from calving, 23; milk
