"Father Time a Severe But Honest Judge."

For seven years the "FERRO ENGINE" has held the leading place among the Engines used in the Newfoundland Fishery. These "ENGINES" were built to use Gasoline; but we have hundreds of testimonials where Kerosene has been used with equal results. Other Engines have been introduced and have been claimed by their Manufacturers to be the "ONLY." But Father Time has been their Judge and they fell by the Wayside. Hundreds of "FERRO ENGINES" have been used in Newfoundland during the last seven years, and many of them without a cent of repairs, and the "FERRO" is acknowledged today as the best two Cycle "ENGINE" on the Market.

"THE NEW FERRO Kerosene Oil Engine."

We have on hand a car-load of the "NEW FERRO KEROSENE OIL ENGINES" which were built expressly for Newfoundland trade, and which have Float Feed, Water Jacketed, Kerosene Carburetors, and all the Gasoline it requires is priming, no extra Tanks being required. These "KEROSENE ENGINES" will be sold at no advance over the price quoted by our Former Agents for the "GASOLINE ENGINES" while we have on hand a Number of the "GASOLINE ENGINES" which we will sell at a great reduction on their first cost to avoid the expense of shipping them back to the Factory.

The number of recommendations below should be satisfactory proof that these "ENGINES" though built for Gasoline will run satisfactorily on Kerosene.

THE L. M. TRASK CO. La Scie, October 13th, 1914.
Dear Sirs.—I saw by Advocate where you stated you would wish to hear from every user of a "FERRO ENGINE," and receive the number of same, and you would send a Spark Plug of your own make, so I thought I would let you know the number. (The No. is) 3263. It is a 7 H.P., and to just give you the truth about the Engine, it is the best one made. We used it last Summer on a large Motor Boat, a Deck Boat about 7 1/2 ft. wide, and about 3 1/2 ft. deep and towed a trap skiff that would bring about 16 or 17 barrels of round Fish after her, and did good work fast enough, too good for the 9 H.P. F. Engine, and this year we have the Engine in a new trap skiff about 30 ft. long, 6 ft. 10 in. wide, 33 inches deep, and cares for nothing here, and there are lots of Engines here of different quality.

The 8 H.P. A. Engine is here in a boat about the same size and they cannot do it, and for some, the A. Engine, F. Engine and all is here, have had plenty of trouble, and we have not had one hour's trouble since we had the "FERRO ENGINE." I say it is the best here.
Wishing you every success, I am yours sincerely,
(SGD.) MOSES BURTON.
Salvage, Bonavista Bay.

L. M. TRASK & CO., St. John's.
Dear Sirs.—We have been using one of your 5 1/2 H.P. Ferro Gasoline Engines for two Summers, and it has given entire satisfaction in every way, it has never given one minutes' delay.
We consider the Engine the best on the Market for fishing purposes, and would recommend it to anyone requiring a good Engine.
The number of the Engine is—
(SGD.) ISAAC SQUIRES.

BRILLIANT MANOEUVRE EXECUTED BY BRITISH FORCES ON THE AISNE WITHIN 100 YARDS OF GERMANS

A Considerable Number of British Troops Were Moved from the Trenches to the Northeast of France and Their Places Taken by French and the Germans Were Kept in Complete Ignorance of the Movement

(Continued from page 1.)
laying siege to Antwerp, in case that place should hold out, or in the event of the capture of the fortress, to act in conjunction with the besieging force in a desperate assault.

"After the fall of Antwerp and the release of the besieging troops there was a gradual increase in the strength of the opposition met by us the resistance of the detachments—which beyond the right extreme of the German fortified position near Bethune, a fortnight ago, consisted almost entirely of cavalry—grew more and more determined, as more infantry and guns came up into the front line until Tuesday, Oct. 20th, when the arrival opposite us of a large portion of new forces, and a considerable number of heavy guns, enabled the enemy to assume the offensive practically against the whole of our line; at the same time they attacked the Belgians between us and the coast.

"Operations Take Fresh Turn."
"The operations then really assumed a fresh complexion. On Wednesday October 21st, the new German formations again pressed forward in force vigorously all along the line. On our right, south of Lys, an attack on our line was repulsed with loss to the assailants. On the other hand, we were driven from some ground close to the north, but regained it by a counter attack.

"Still further to the north the Germans gained and retained some points. Their casualties to the southeast of Armentieres were estimated at over six thousand.

"On the north of the Lys in our centre, a fiercely contested action took place near La Gher, which village was captured in the morning by the enemy, and then retaken by us. In this direction, the German casualties also were extremely heavy. They came on with the greatest bravery in swarms, only to be swept away by our fire. One battalion of their 104th regiment was practically wiped out, some four hundred dead being picked up by us alone.

"Captures and Releases."
"Incidentally by our counter attacks, we took 230 prisoners and released some forty of our men, who had been captured. It is agreeable to record that our men were very well treated by their captors, who were Saxons, being placed in cellars for protection from the bombardment of our own guns.

"On our left our troops advanced against the German twenty-sixth reserve corps, near Paschendale, and were met by a determined counter offensive, which was driven back with great losses.

"At night, the Germans renewed their efforts unsuccessfully in this quarter. At one point they tried a ruse which no longer is new. As they came up in a solid line two deep, they shouted out: "Don't fire! We are the Coldstream Guards!"

"Getting Used to German Tricks."
"Our men, however, are getting used to tricks of this kind, and the only result was that they allowed the enemy's infantry to approach quite close before they swept them down with magazine fire.

"Apart from the six hundred found near our lines in the centre, our patrols afterwards discovered some three dead out in front of our trenches, killed by our artillery.

"Thursday, the 22nd saw a renewal of the pressure against us. We succeeded however, in holding our ground in nearly every quarter. South of the Lys, the enemy attacked from La Bassee, and gained at Vialanas and at another point, but their efforts against a third village was repulsed by artillery fire, the French and British guns working together very effectually.

"Made Some Gains."
"The Germans advanced in the evening on our left and were again pushed back, though they gained some of our trenches in the latter quarter. "By this time the enemy succeeded in bringing up several heavy howitzers and our casualties were considerable.

"On Friday, the 23rd, all action south of the Lys, on our right was confined to that of artillery, several of the hostile batteries being silenced. In the centre their infantry again endeavored to force their way forward and were only repulsed after determined fighting, leaving many dead and several prisoners.

"North of the Lys their attacks at different points were repulsed.

"On our left the 23rd was a bad day for the Germans. Advancing in our turn, we drove them from several of the trenches out of which they had turned us the previous evening, and captured 150 prisoners and released some of our men which they had taken. As the Germans retreated, our guns did great execution. They afterwards made five desperate assaults on our trenches advancing in mass and singing "Die Wacht Am Rhein," as they came on.

"Assault Easily Beaten Back."
"Each assault was easily beaten back, our troops watching until the enemy came within very close range before they opened fire with their rifles and maxims, causing terrible havoc in the solid masses.

"During the fighting in this quarter

on the nights of the 22nd and the 23rd, the German losses were again extremely heavy.

"We made over six hundred prisoners and picked up 1,500 dead, killed on the latter day alone.

"Much of the slaughter was due to the point blank magazine fire of our men against the German assaults, while our field guns and howitzers, working in perfect combination, did their share when the enemy were repulsed. As they fell back they were subjected to a shower of shrapnel; when they sought shelter in villages or buildings they were shattered and driven out by highly explosive shells and then caught again by shrapnel as they came into the open.

"Showed Lack of Training."
"The troops to suffer so severely were mostly of the Twenty-third corps, one of their new formations; certainly the way their advance was conducted showed a lack of training.

"The spectacle of these soldiers chanting a national song as they marched to certain death was inspiring. It was at the same time pitiable and if any proof be needed that untrained valor alone cannot gain the day in a war, the advance of the Twenty-third German corps on October 23rd most assuredly furnished it.

"Besides doing its share of execution on the hostile infantry our artillery in this quarter brought down a German captive balloon. As some gauge of the rate which guns were firing at what was for them an ideal target it may be mentioned that one field battery opened 1,800 pounds of ammunition during one day.

"Heavy Losses on Both Sides."
"On Saturday, October 24th, the action on our right once more was confined to artillery, except at night when the Germans pressed on, only to be repulsed. In the centre, near Armentieres, our troops withstood three separate attacks from the enemy, our guns coming into play with good effect.

"Against our left the German twenty-seventh corps made a violent effort, with no success.

"British on Offensive."
"On Sunday, October 25th, it was our turn to take the offensive. This was carried out by a portion of our left wing, which advanced. We gained some ground and took two guns, and eighty prisoners.

"On the centre, fighting was severe, though generally indecisive in results, and the troops in some places were engaged in hand to hand fighting. Towards evening we captured 200 prisoners.

"Up to the night of October 25th, not only have we maintained our position against a greater force on the part of the enemy to break through to the west, or to force us back, which was started on the 20th, but we have on our left passed to the offensive.

"These six days, as may be gathered, have been spent by us in repelling a succession of desperate onslaughts. "It is true that the efforts against us have been made to a certain extent by partially trained men, but it must not be forgotten that these troops, which are in great force, have been only recently brought into the field, and are comparatively fresh. They are fighting also with the utmost determination, in spite of the fact that many of them are heartily sick of the war.

"Though we have undoubtedly inflicted immense losses on the enemy they have been able to fill up the gaps in their ranks and return to the charge and we have suffered heavily ourselves."

FISHERY GEAR!

WE ARE MANUFACTURERS, of the GILL NETS, used by Messrs. Job Brothers & Co. in the Straits this year. They have been successful at a time when traps had partially failed. We make them in all sizes to order.

WE ARE MANUFACTURERS, of COTTON DRIFT NETS, such as are used in the North Sea Herring fishery. As the catch of Herring will be interfered with during the war, a good opportunity occurs for use of these Nets in Newfoundland.

WE ARE MANUFACTURERS, of the celebrated STANDARD brand of Herring Nets, which is universally acknowledged to be the very best Net on the market. We are now making the CRESCENT brand Herring Net, which is the best and strongest low priced Net made. It is mounted just the same as the Standard Net, and it is barked for preservation, not merely dyed like other cheap Nets.

WE ARE MANUFACTURERS, of SQUID TRAPS, which are now legal, we make them in any size required, to order.

We manufacture TARRED COTTON LINES, all sizes, for Bankers use, strong, durable, and easily handled.

We make Cod Traps, Cod Seines, Caplin Seines, etc., to order, in all sizes.

All the above fishery gear we can strongly recommend, and we would urge our fishermen to patronize articles of home manufacture, in order to give employment, which is so much needed this year.
