We want to engage your attention about our Dress Goods Stock. If you have any thought of buying a dress you ought to see it. We are told repeatedly that there is nothing like them in Brockville for style and value. Ladies are good judges, and when they pass judgment it is generally correct. We have all the new makes and styles in Dress Goods, and some lovely new patterns in Challies. We will show the stock with pleasure.

Our stock of Spring Carpets has all arrived. As usual it is the largest selection you will see in this section, probably twice as large as any other stock. It comprises all grades of Brussels, Tapestry, Wool, Union and Hemp Carpets, also Velvet Carpets, Matting, Carpet Squares with border all around, and Floor Oilcloths. Tapestry Carpets range from 30c. to \$1.00 per yard. Brussels Carpets at 55c., 55c., \$1.00, \$1.10 to \$1.25. Borders to match a great many patterns. Also Stair Carpets. Prices guaranteed as low or lower than the same quality of goods can be bought for, either in Brockville or in the city. We tell no fables about our goods; we guarantee them as represented or money refunded. We solicit the favor of a call of inspection. Carpet laying and making attended to when desired.

**Things They do not do.**

The Ontario Agricultural College bulletin for July is devoted to giving practical hints on butter-making. Below are a few things that they do not do to the experimental dairy that may prove of interest to our agricultural readers:

1. We do not consider that we know anything about butter-making, as something new is being discovered every month. Not only from our own work are we continually learning, but also from the observation and reports of others.
2. We do not keep a cow that makes less than 200 pounds of butter in a year.
3. Nor put the dry cow on a starvation ration.
4. Nor expect a cow to make something out of nothing.
5. Nor keep our cows in an iced house, boggy or damp.
6. Nor allow them to go a whole year without carding or brushing them.
7. Nor depend upon pasture alone for a supply of summer feed.
8. We do not allow the milk to stand very long in the stable to absorb foul odors.
9. We do not neglect to strain the milk at once after milking.
10. Nor set the milk in deep cans in well water without changing the water at least twice, or without ice.
11. Nor mix sweet cream with cream to be churned less than twelve hours before churning. (The cream is ripened in one vessel which holds the cream for a whole churning.)
12. Nor add sealing water to the cream; nor guess at the temperature with the finger; nor take two or three hours to churn.
13. Nor gather the butter until the "dasher stands on top," and then dip it out of the buttermilk.
14. Nor add coarse salt by guess; nor work the butter into grease.
15. And finally, we do not send our butter to market wrapped in old rags that may have seen other service in the home.

Machine oil at 60c. per gal. warranted not to gum a machine. Try it.—Morr & Roberson.

**Things They do not do.**

The Ontario Agricultural College bulletin for July is devoted to giving practical hints on butter-making. Below are a few things that they do not do to the experimental dairy that may prove of interest to our agricultural readers:

1. We do not consider that we know anything about butter-making, as something new is being discovered every month. Not only from our own work are we continually learning, but also from the observation and reports of others.
2. We do not keep a cow that makes less than 200 pounds of butter in a year.
3. Nor put the dry cow on a starvation ration.
4. Nor expect a cow to make something out of nothing.
5. Nor keep our cows in an iced house, boggy or damp.
6. Nor allow them to go a whole year without carding or brushing them.
7. Nor depend upon pasture alone for a supply of summer feed.
8. We do not allow the milk to stand very long in the stable to absorb foul odors.
9. We do not neglect to strain the milk at once after milking.
10. Nor set the milk in deep cans in well water without changing the water at least twice, or without ice.
11. Nor mix sweet cream with cream to be churned less than twelve hours before churning. (The cream is ripened in one vessel which holds the cream for a whole churning.)
12. Nor add sealing water to the cream; nor guess at the temperature with the finger; nor take two or three hours to churn.
13. Nor gather the butter until the "dasher stands on top," and then dip it out of the buttermilk.
14. Nor add coarse salt by guess; nor work the butter into grease.
15. And finally, we do not send our butter to market wrapped in old rags that may have seen other service in the home.

Machine oil at 60c. per gal. warranted not to gum a machine. Try it.—Morr & Roberson.
