OUR INDIAN ARMY.

The power of Great Britain as a military the simple reason. we suppose, that our the simple reason. we suppose, that our naval strength is altogether beyond question. the fifteen magnificent ironclads in the Medi-

fighting soldier

less than 120,000 of these, of all ranks, in the three presidencies of Bengal, Bombay, and "slow" but sure days of 1835, ought to show Madras. As we have just said, the native artillery is but an insignificant force, but our a splendid annual financial exhibit. Indian cavalry, on the other hand, are troops of which we may well feel proud. We do not mount any of the men, except in the case of four regiments of Madras light cavalry and the body guards of the Viceroy and the body guards of the Viceroy and the Company and Madras. As in the success of Bambay and Madras. As in the success of Bambay and Madras are troops.

France and the Eastern Questifon.—
The purchase of the Kedhive's shares in the Sucz Canal did excite uneasiness among our neighbors, and the present Minister of Foreign affairs, M. Waddington, is believed order or orders for the contingences of a New order or orders for the contingences of a New order. Governors of Bombay and Madras. As in to be peculiarly hostile to the erection of order or orders for the contingences of a New the case of the Russian Cossack, the men English authority at the delta of the Nile. House when they are going out of office, not find their own horses, and thus form a sort But, now that he has been satisfied as to knowing that they will be returned. I notice of irregular cavalry. In Bengal there are or purposes, France has drawn sensibly in the journal of the session 1878, that the bay seven, in Madras four, and in the Paniah closer to this country than she had been Chairman of the Contingent Committee, bay seven, in Madras four, and in the Punjab five other regiments. Altogether, it seems, we have upwards of 19,000 sabres at our disposal in India, besides the nine British regients to which we have referred. Of native infantry of all kinds there are in round num bers 100,000 men, made ap of forty-nine regibers 100,000 men, made ap of forty-nine regiments in the Bengal presidency, forty in Madras, thirty in Bombay, and twelve belonging to what is called the Punjab Frontier Force. These men are all efficiently armed, affairs as would give them back their ceded office, a committee have the authority to would march and fight as well, probably, as lost their only possible ally when they were duty or privilege of the new members of a qualifications. An elector ought first of all terests. We are fully persuaded that we have a class of men at the investment of the condensation of the cond this would be the case we need be under no apprehension. All native regiments have European officers attached in certain fixed proportions, and so far as discipline and drill proportions, and so far as discipline and drill proportions.

Austria, which would have been glad to regiments have gain the influence wrested from her at every well informed mind the impression is Sadowa. But she was warned that if she should enter the field Russia would enter it overstepped his duty. apprehension. All native regiments have proportions, and so far as discipline and drill should enter the field Russia would enter it overstepped his duty. are concerned these are modelled on our home too. Here France was left to her fate. The ervice. Both in the cavalry and infantry the troops and companies are commanded by native officers, but each regiment of horse o foot has an establishment of seven European officers besides. A trustworthy military officers besides. A trustworthy military force of natives, then, is here at the orders of Great Britain, which might be employed, at Gambetta's adventurous spirit should interfere and prevent the enpenditure.

Berlin. We need not wonder, therefore, if received. I think the Government should interfere and prevent the enpenditure.

Berlin. We need not wonder, therefore, if honest, staunch men, this is first.

The second received of the summer's sun conquers the honest, staunch men, this is first. Great Britain, which might be employed, at any rate in large numbers, for our benefit wish to see Russia so much weakened by probably you will hear more about this. outside the country. And were it necessary veto on the will of Austria or double the efto increase the force in case of withdrawal of to increase the force in case of withdrawal of a portion of it from the country, there would be no difficulty whatever in adding to the ranks. No doubt it would be impolite as it. ranks. No doubt it would be impolite, as it lady out of the field. It is no reproach to concerns the Chairman of the Contin-takes are largely regulated by its legislation would be unwise, to make any sudden change in our Indian forces, or destroy the balance which now exists not only between European and native soldiers, but between the classes of which the latter are composed. At the same time, if we urgently required the aid of this country will perhaps be forgiven if it the fleets of the armies of England. Bu fifty or a hundred thousand men from India, practices the same patriotic selfishnesss. there would be little difficulty in getting the ---number by simply increasing their ordinary pay in some slight measure. Sixty thousan men, composed, say, of twenty thousand Euro pean and forty thousand native troops, could ago, and his grandsons established then be despatched by the Viceroy quite as soon, in all probability, as the same number would be ready to set sail from England.—London of the concern, and so successful was he that
