

Royal Yeast Cakes

Produce and Provisions

Codfish—The schr. Faustina took out 4,767 qts. of fish from Henry Clement and J. Penney & Sons, Ram- sey, to Oporto this week; the A. H. Whitman 2,233 qts. from A. E. Hick- man, Hr. Breton, to Oporto, and the Lady St. John 3,400 qts., also to Oporto from Wm. Webber & Sons, Rencontre. The foreign markets are keeping in good condition. Our stocks in Oporto are down to 10,515 qts., with consumption 3,085 for the week. Norway had 33,370 qts. in the Oporto market at the end of June but it was being absorbed at the rate of about 5,000 qts. per week, being new fish. The outlook for next fall's marketing of our 1924 catch is very good. If our exporters do not get panic and start the price too high and thereby antagonize foreign buy- ers at the outset, all will be well. If they start at \$8 and have to come down to \$5 later in the season it will be disastrous. A leading exporter said to The Trade Review yesterday "If we can open out at \$7 for No. 1 merchantable and keep it from going lower all will be well, and this is what I hope will be done." Asked whether he did not think that the big Nor- wegian catch would drive the price of our fish down below \$7 in the local market, he said "No, I do not fear Norwegian competition. Their fish is fast going into consumption, they have more buyers and consumers this year than any time since the war, and most of it will be gone into con- sumption before ours reach the European markets in heavy quanti- ties in the closing months of the year."

Cod Liver Oil—We extend our wel- come to a party of American sci- entists who arrived by the S. S. Rosa- lind from New York. This party is composed of some of the ablest uni- versity professors who work dur- ing the next month or more will be confined to the biology of the codfish, tracing its life history from the be- ginning, also the investigation of the food and environments of the ma- ture codfish. The principal object in view is the study of cod liver oil and the reason of its wonderful vital- izing power. With this object in view a model cod liver oil factory and laboratory has been erected at Bay Bulls at considerable expense. The Marine and Fisheries Department are rendering all the assistance possible to those visitors. We hope to have further information to give readers in our next issues as this scientific movement which was started two years ago is now growing and sure to have wonderful developments in the near future.

Common Cod Oil—There are many substitutes for common cod oil in the leather trade, and therefore no

prospect of much better price in the future, but it is very different with the refined oil for medicinal purposes as it is one of the greatest possibili- ties. If we intend to put this country ahead we must all co-operate and not miss any opportunity to show the scientists now visiting our country that we appreciate their efforts and are ready to help in any reasonable way for the benefit of all concerned.

Canned Salmon—Stocks of last year's canned salmon are completely exhausted. The few cases remaining sold for \$9.50 per case. Reports are now being received that the catch this season is far short of an average. Several packers who are always cer- tain of 150 to 200 cases for the sea- son, have not secured 20 cases to date. The report all along the French Shore is to the same effect. When the first sign of salmon was seen the weather was so blustery that no person could attend to the nets. Some consider that the presence of so many seals in White Bay and along the Treaty Coast this season has had the effect of driving the sal- mon off the coast. It is almost too late now to look for any quantity and the supply is going to be very short. We know of several packers who re- fuse to sell any under \$10.00 per case and some intend holding for \$12.00 per case and even these prices will not pay them unless there is con- siderable improvement during the next two weeks.

Lobsters—A few cases of lobsters came in from Placentia Bay this week. The pack so far is poor, which it is said is due to taking off the in- spector. A request was made for a few cases of the British Empire Ex- hibition and great difficulty was found in getting even two sound prime cases. The fishery to date is poor. The highest is one packer in St. Mary's Bay who has 24 cases. The price paid so far for P. B. new catch is \$22.50.

Flour—The first car load of new 1924 wheat was sold at Pillsbury on June 15th in Kansas. Since then the harvesting has continued amid ideal weather conditions. Reports state that the vast golden plains of Kansas are producing the best milling wheat on record. Harvesting was spreading rapidly when our correspondent wrote on June 24th and is likely to be near- ing completion at this date. Crop re- ports from Minneapolis and the northwestern States are very favor- able. Recent rains and hotter weather are bringing wheat along nicely and some places are said to be nearly equal to last year.

Pork—The market is unchanged and local quotations are practically the same as in our last week's issue, viz., fat back \$24, ham butt \$24.25, S. C. Clear \$24, and spare ribs \$23 per barrel. Ham butt is becoming a scarce article in the market. Owing to the holidays this week, two here and followed by two in the United States, a minimum of business has been done. The S.S. Rosalind brought in this week 550 and the S.S. Winona 235 barrels. Total 785.

Beef—The beef situation remains unaltered and no change in prices is anticipated during the warm season. Boneless beef is rather scarce in the market, and this particular grade may advance twenty to fifty cents this month on scarcity. The imports of all qualities this week were 785 bar- rels, viz., 650 by the S. S. Winona from Montreal and 135 by S. S. Rosa- lind from Halifax and New York. Local quotations stand at \$24.50 for flank, \$23 family, \$22 box packed, \$20 family special and \$20 boneless.

Molasses—The quality of the choice molasses imported from Bar- bados this year has given excellent satisfaction, unfortunately the quan- tity available is not nearly equal to requirements. We predicted that 80c. per imperial gallon would be easily obtained for the choice grade

and our calculations have been cor- rect. We fully expect to see choice molasses selling at 85c. before very long. Fancy molasses will be commanding 95c. per imperial gallon when trade opens up during September. The very strong position of sugar on which there has been a continued advance and likely to go still higher during the fruit pro- ducing season will make values for molasses very firm. The Sunset Glow is on the way from Barbados with a cargo and the Frank Adams and Lila D. Young will also take cargoes. The imports to St. John's are now over 6,000 bushels as against about 5,000 at this date last year.

Sugar—The price of sugar in the local market is the same as quoted last week. An advance of 10 cents per 100 lbs., however, took place at Montreal this week in all grades. There is no change in the New York quotations, but as the demand is in- creasing daily the figures may suffer any day. The grinding operations of the big crop in Cuba are about over and renewed activity in placing or- ders is expected to occur in a few days. The St. John's price is still \$7.60 per 100 lbs. for white A-m. granulated.

Teas—There is very little change in the tea market. The firm feeling maintained, the first sales of the new indicated in our last week's report is maintained, the first sales of the new Indian teas being exported at high prices. The market for the higher grades especially of Indian and Jap- an teas will, it is believed by dealers, hold up for several months to pre- sent high levels. Lower grade teas are likely to ease off a bit when the mar- ket becomes active. British tea import- ers regard the present position of tea as very strong for Ceylon and Indian higher grade teas.

Hay and Oats—The market for hay and oats continues quiet and the local demand is at a low ebb, as is the local market continues at \$2.60 per 4 bushel sack P.E.I. Hay is \$35 to \$35.50 per ton. A fair amount of business in hay continues to be done in Canada for shipment to the States, good Timothy being scarce a firm feeling prevailed in the markets of Mon- treal. Sales of car lots were made there this week at \$17 for No. 2 Tim- othy. The hay crop for this season will, from present indications, be up to average.

The Depotism of Demagoguery

Morning Post: As this country has a constitutional problem of very much the same character, we cannot but be profoundly interested in the develop- ment of the French crisis. In the old days, the system of checks and bal- ances was directed against the usurpa- tion of authority by executives. To- day legislatures, more particularly democratic assemblies, are laying claims to powers, in America, in Great Britain, and in France, which seri- ously interfere with the executive's conduct of foreign affairs, and, more- over, tend to remove any barrier against the sudden impulses and cap- ricies of popularly elected legislators. Tyranny is eternal, and the new tyrant is the demagogue. He is at this moment very active in our country. He is now going to make his influence felt more strongly in France? And if, in his democratic zeal, he breaks the balance of the Con- stitution, may he not be creating a precedent which may be seized by even more ruthless spirits?

Mountain Climbers Honor Colleagues Dead in War

MILLON, England, June 16 (A.P.)—A war memorial tablet of the "Pell and Rock Climbing Club" of the lake dis- trict, has been unveiled on top of Great Gable Mountain, 2,949 feet high. The memorial consists of a park which takes in twelve peaks and most of the land surrounding them over the 1,500 feet line, and honors the 25 members of the club who lost their lives in the war. Hundreds of mountaineers jour- neyed to the Great Gable for the cere- mony.

WANTED—A Second Hand Dictaphone. THE COWAN BROKERAGE CO., LTD. June 28, 1924.

The Picture Wonderful STAR MOVIE To-Night

"LET NOT MAN PUT ASUNDER"

A BASIL KING NOVEL, with PAULINE FREDERICK and LOU TELLEGEN.
A J. STUART BLACKTON PRODUCTION IN TEN PARTS.

THE DIVORCED WIFE WHO MET AGAIN, SAID:
"What is Divorce. The Tearing of Bone from Bone and Flesh from Flesh."
"I am one Man's Wife. The Other Man's Mistress."

THE DIVORCED HUSBAND SAID:
"You are My Wife, Not His; You can Never be His by all that is Good."
"By the Rights of Law and Heaven you shall not Marry Another."

NOTE—TWO SHOWS AT NIGHT.

ADMISSION TWENTY CENTS

Shooting at the Moon

Signals Planned to Reach the Planets.
One of the great dreams of solen- tists has always been to communi- cate with other planets. The dream has been reflected in fiction, in such wonderful stories as Jules Verne's "Around the Moon" and Mr. H. G. Wells's "First Men in the Moon."

Jules Verne's hero devised a method of shooting himself and his companions out of a huge cannon, while Mr. Wells's idea was the discovery of a metallic alloy which cut off the power of gravity, and so en- abled its discoverer to travel through space.

In 1891 a certain Mme. Guzman left a legacy of 100,000 francs to anyone who, within ten years, should discover a means of communicating with any planet.

This August, Mars will be nearer to the earth than it has been at any time in the past 120 years, and an attempt will then be made by man to establish communication—to solve once and for all the age-long mystery of whether or not the planet is in- habited.

Will the Martians Reply?
This wonderful attempt will be conducted from the heights of the Jungfrau, 14,000 feet up in the Alps. Mars will be some 35,000,000 miles away, which is comparatively near when we remember that at times the planet is 250,000,000 miles distant.

The means of communication to be tried will be light signals, which will be sent out by a powerful lens, the snows of the peaks acting as reflect- ors.

This year, also, an attempt is to be made to communicate with the moon. The money and machinery are ready, and the inventor of the latter, Professor R. H. Goddard, is backed by the Smithsonian Institute of Washington.

Briefly, Mr. Goddard intends to fire a giant rocket at the moon. This rocket is made of steel, and contains a small internal combustion engine ignited by a smokeless explosive. It will be forced forward by means of continuous discharges worked by a reloading mechanism.

The scientist believes that it will reach the moon in thirty-six hours, and that its arrival will be noticed by the explosion of three pounds of Vic- tor flash-powder contained in the nose of the rocket.

Mail Records Claimed for Stinnes

Berlin, June 17 (A.P.)—The claim has been made by German newspapers that the late Hugo Stinnes received more mail on a daily average than any other individual in the world. Figures were not given.

Italian newspapers, however, con- tend that the Pope receives more let- ters and newspapers than any person in Europe, it being estimated that his daily mail averages something like 27,000 pieces.

GREEN FRUIT and Dried Fruit!

Ex. S.S. Rosalind from New York and Halifax:
CALIFORNIA "SUNKIST" ORANGES—216's.
EXTRA FANCY "WINEAPPLE" APPLES—(Boxes).
EVAPORATED APRICOTS—25-lb. Bxs.
CALIFORNIA THREE CROWN RAISINS—25-lb. Boxes.
PRUNES—70 to 80's—25-lb. Boxes.
"GILT EDGE" CANADIAN CREAMERY BUTTER—28-lb. Boxes.
(EXTRA FANCY—"New Grass" quality)

PAYING UP.

I feel all kinds of pleasant thrills, glad smiles, my face adorn, as I proceed to pay my bills each time a moth is born. I write my checks, a goodly heap, and to myself I say, "The grocer now may cease to weep, the butcher may be gay. The plumber's hag- gard face will shine, the tinsmith's breast will glow, when they receive these checks of mine, to pay up what I owe. The undertaker's mournful life of sorrow will be rid, the harness-maker's patient wife may buy a Sun- day lid. There are a hundred ways to aid the ones who weep and wail; some hand out maxims with a spade, or spring a sunshine tale. Some will resort to any plan that does not tap their tills; but I would cheer my fel- low man by paying up my bills. And so I see the tailors smile, the black- smiths show their delight, mechanics come, in single file, to tell me I'm all

right." There is a most benign old bird who tours the village streets; he always has a kindly word for every one he meets; he always has a pleas- ant smile for every one on deck; but when you draw upon his pile he freezes up like back. The sunny smile and genial phrase are surely most sublime when offered by the man who pays his monthly bills on time.

A solution of baking soda or Ep- som salts is excellent for bathing eruptions caused by poison ivy.

Stiff Joints

Linger up with Minard's Liniment. Leading athletes use it.
