Explanation of the Fiery Phenemenon

For the past three or four evenings phenomenon has been noticed in the shape of a red light which illuminated the western sky as though a great conflagration was throwing its glare over the heavens.

Electric storms in the sun and in our atmosphere storms in the sun and in our atmosphere have produced this decomposition. Margaret Mather as Juliet. On invitation of Mr. O. B. Sheppard of the Grand opera house a quartette of city pressmen went to Buffalo Monday evening to witness Miss Margaret Mather's rendition of Juliet. The academy of music, as stated yesterday in a brief despatch, was jammed full, every seat in the house being sold before 5 o'clock. As Miss Mather is to appear at the Grand here week after next, it will be of interest to the public to know that the "Chicago girl," as she is sometimes called, is one of the finest Juliets of the called, is one of the finest Juliets of the day. She is just 21 years of see, and her whole soul is apparently invested in her characters. Miss Mather has grace and beauty in addition to aid her histrionic abilities. Besides Juliet, her repertoire includes Rosalind, Julia, etc. Salvini the younger played the lover, but he was wholly at sea in the tender passages of this great play. Milnes Levick is a member of the troupe, and this great actor informed the World man that he felt satisfied that Mather was the greatest Juliet since the days of Neilson.
