## 器器器器器器器器

Recognized as the leading specific for the destruction of worms, Mother Graves' Worm Exterminator has proved a boon to suffering children everywhere. seldom fails.

"Ever tempted to sell your automobile?" asked the cheerful idiot. "The temptation is strong enough," replied Mr. Inbadd, "but there are too many points involved You know I mortgaged my house in order to buy the machine." "Yes, I know that." "Well, I mortgaged the machine in order to build the garage, and now I've had to mortgage the garage in order to buy gasoline."

# WINTER HOME FLOWERS

Brightening the Windows When Bloom Is Most We.come.

Cleaning and Grading Grain-How a Good Fanning Mill Properly Operated Will Greatly Increase the Yield of Field Crops - Every Farmer Should Have One.

(Contributed by Ontario Department of Agriculture, Toronto.)

O insure a supply of flowers during early winter for the window it is necessary to have suitable plants started early in the fall. Among the best kinds for early winter flowering are a few of what are known by florists as Dutch bulbs. Of these there are only a few kinds or varieties that can be had in flower early in the winter White Roman Hyacinths are very satisfactory for early flowering. The colored Roman Hyacinths are not as good, and do not flower as early as the White Romans. The loose grow-ing, richly perfumed flowers of the White Romans are very pretty and acceptable. The Paper White Narcissus can also be had in flower early. French grown bulbs of the Trumpet Major Narcissus can also he had in flower in the window before Christ-mas by potting the bulbs toward the end of September, or not later than the end of October. All of these bulbs can usually be had early in October at seed stores. Pot the bulbs in rath-er sandy potting soil as soon as the

er sandy potting soil as soon as the bulbs can be obtained. The soil should not be too rich in fertilizers, Three or four bulbs can be put in a five-inch pot. The top of the bulbs should be just under the surface of the soil when potted. The surface of the soil should be about half an inch below the top of the pot for water space. Water the bulbs well as soon as potted and set the pots away in a cool, dark place in a dark cellar or cupboard until roots have well started, usually for about four or five weeks. When roots are well started,

and possibly showing through the hole in the bottom of the flower pot, they should be brought into the winthey should be brought into the window to flower. Keep the soil well moist, not too wet, until they are through flowering. Dutch Hyacinths and many other varieties of Narcissus (Daffodils), Tulips and Freesias can be potted in October or November, but few of them will flower until January or February. carded some years ago.

Chinese Sacred Lilies.

Bulbs of these can be started in deep saucers or soup plates in October for early flowering. Set the bulbs firmly in the saucer and then fill the saucer or dish with fine gravel stones, so as to almost cover the bulbs. Fill the saucer up with water and set them away in a dark, cool place, as mentioned before, for about three weeks, until roots ave well started, when they can be brought into the window to flower. These will flower in December. Keep the sau-

cers filled up with water as required.
Callas, Epiphyllum or Xmas Cactus, Cyclamen, Primulas, several varieties of Begonia, especially the Glorie de Lorraine type of Begonias, are suitable for Christmas, as well as the dwarf Semperflorens type of gonia that flower so profusely either in the window in winter or out of doors in the summer. Late flowering Chrysanthemums are also good for early winter decoration. All of these last named plants have to be grown expressly for the window or purchased from a florist. The bulbs named as suitable for early flowering can be grown with very little trouble and expense by any one who takes an interest in flowers and in flower growing. No plants or flowers give more ing. No plants or flowers give more satisfaction in winter than do the winter flowering bulbs before named.

These two farm operations may be accomplished at the same time and by the same means. The fanning mill is the most successful medium in obtaining this result and too much importance cannot be placed on the use of this machine. The successful operation of the fanning mill depends on two factors, that of wind blast and the use of sieves. The removal of light or inferior grain and the smaller and lighter weed seeds is almost wholly dependent on the wind blast. It also assists the sieves because it removes part of the grain which would otherwise have to pass through them and it prevents clogging in the sieves by light seed. The two most important sieves are those of the top and bottom. The top sieve should be just large enough to let the grain pass through and keep back the la.g-er impurities. The bottom sieve

Cleaning and Grading Grain.

should be of just sufficient size to keep back the good seed.

The utility of many fanning mills is impaired by the owner not possessing a full assortment of sieves and by his using poorly-fitting sieves, which allow weed seeds and grain to lodge in the mill. The efficiency of many fanning mills too is often lessened by the operator being in too much of a hurry." To obtain the best results, grain should pass slowly over the lower sieve. When the fanning mill is turned too rapidly or the lower sieve has too much slope, many of the smaller impurities will not be be of just sufficient size to

of the smaller impurities will not be removed.

Well cleaned and well graded grain is not only free from weed seeds, other seeds, dirt and chaff but is larger in size, has greater uniformity.

and is of stronger vitality than grain and is of stronger vitality than grain not so cleaned and graded. No farmer can afford to be without a good fanning mill and there are many farmers who would be much better off if they extended its use. — Dr. C. A. Zavitz, Ontario Agricultural College, Guelph. Guelph.

When the soil is moist, but not sticky, the drag does the best work. The road will bake if the drag is used on it when it is wet.

Repairs to roads should be made when needed, and not once a year after crops are laid by.

New Theory as to Oat Leaf "B." After scores of editors and correspondents throughout Ontario have by majority opinion decided that this season's marking of the oat leaves with the letter "B" presages British victory, "A Sidney Farmer," in the Belleville Intelligencer," assumes to settle all speculation finally by stating that "many people never knew that the 'B' stands for blood, as our Serious was straightful. Saviour was crucified in an oatfield. It has nothing to do with Britain or the war."

V.C. for ex-Torontonian.

Lieut. George A. Trorey, a son of George E. Trorey, manager of Birks. Ltd., at Vancouver, who with his brother, J. J. Trorey, formerly lived in Toronto, has been recommended for the Victoria Cross, for valiantly refusing to abandon his men while severely wounded. He is now rated "missing" and supposed to be a wounded prisoner in the enemy's

Nugget Starts Rush to Old Ground. The finding of a \$27 nugget recently on Leech river, 25 miles out of Victoria, B.C., has started a new rush to the placer diggings there, where \$500,000 was washed up within three months in the early sixties. Platinum is also being found in the abandoned camp, once the scene of government in the colony of Vancouver Island, and now sells at \$105 an ounce.

Board of Control Rule Unpopular. A mass meeting of Halifax citizens

has expressed its opinion in favor of the abolition of the Board of Control now governing that city and the restoration of the aldermanic board dis-

#### A Too-Faithful Stone-Cutter.

The printer is usually the hero-or the victim-of the humorous story that tells of a blunder in copying; but here is a mistake laid upon the stone cutter that could hardly be matched by any bull perpetrated in a printing office. The story is credited to the St. Louis Reveille: The workman had been instructed to carve over the door of the new church this passage from the Bible: "My house shall be called the house of prayer." In order that he might get the words correctly, the stone cutter was referred to the verse in the Bible-Matthew xxi He proceeded to his work, and the whole verse: 'My house shall be called the house of prayer but ye have made it a den of thieves!'

### Sandy's Small Profit

'Speaking about profiteering," said the tall man, "brings to my mind the story of the Scotch shopkeeper, Sandy MacFee, who, while talking to the manager of a London emporium, said:

'Ye'll pardon my askin' ye, sir, but what profits can ye mak' in Lun-

'Oh, as for that,' was the reply, on some articles 5 per cent., on others 10 per cent., and on some 20 per cent.

Twenty per cent.! Man, it's 'But don't you?' asked the Londoner.

"'Nae sic luck,' exclaimed Sandy.
'I can only mak I per cent. I just buy a thing for a shullin' and I sell it for twa.'"—Tit bits.

#### Tongue Twisters

We all remember the tongue twisters of our childhood, especially the narrative of "Peter Piper who ate a peck of of pickled peppers from a pewter plate" and the important in-formation that "The sun shines on" the shop signs and it sufficeth us."

Once in a while we come across one that is new to us. The latest that has come around our way is;-'The Leith police dismisseth us."

Another good barbed wire entanglement which our tongue has run small States, refuse to trade with 'er up against in the past, and which is new to a large number of people is: 'umiliate 'er!—French Life.

This is the great cricket critic, giving Gissing specific statistics as to

# **ACUTE NERVOUS** EXHAUSTION

All Treatments Proved Useless Until He Tried "FRUIT-A-TIVES".

MR. JAS. S. DELGATY.

R.R. No. 4. Gilbert Plains, Man. "In the year 1910, I had Nervous Prostration in its worst form ; was reduced in weight from 170 pounds to 115 pounds.

The doctors had no hope of my recovery, and every medicine I tried proved useless until a friend induced me to take "Fruit-a-tives".

I began to mend almost at once; and after using this fruit medicine for 3 or 4 months, I was back to my normal state of health.

I never had such good health for twenty years as I have enjoyed the past six years. We are never without a box of 'Fruit-a-tives' in the house". JAS. S. DELGATY.

50c. a box, 6 for \$2.50, trial size 25c. At all dealers or sent postpaid on receipt of price by Fruit-a-tives Limited, Ottawa.

#### WINTER TERM OPENS JANUARY 6th ELLIOTT BUSINESS COLLEGE

Yonge and Charles Sts., Toronto. Has recently had positions to fill at \$13: 14, \$17 and \$18 a week and \$110 a month. A course here is a sure route to a good osition. Write to-day for catalogue. W. J. ELLIOTT, Principal,

#### The Future of the Live Stock Industry

The arrival of peace has created new conditions in the export of meat and produce and some uncertainty in the minds of Canadian farmers as to future markets. Information in the hands of the Honorable T. A. Crerar, Minister of Agriculture, convince him that the export market will continue to absorb at firm prices, as compared with the prices for all other agricultural products, every pound of beef. bacon and any other animal products that Canada can supply. In discussing the situation the Honorable Mr. Crerar said: "In view of the great searcity of cattle and live stock of all kinds in Europe, and because of the great demand for live stock and live stock products of all kinds sure to continue for some years at least, I am going to ask the farmers and live stock men of Canada to maintain their breeding operations on a war time scale, to properly finish all feeding stock, and to conserve all good breeding females, and to still further improve their herds and flocks by using even greater care in the selection of the sire.'

#### England And The War

Peace Crank-You agree with me that we should not humiliate Germany?

Tommy (from the Somme) - I do sir! What I say is—shoot 'er Crown Prince, 'ang the Kaiser, plow 'er blinkin' ships out of the water, disany conditions, but -don't
