

## DOMINION ATLANTIC RAILWAY

### Steamship Lines

—AND—  
**St. John via Digby**  
 —AND—  
**Boston via Yarmouth**  
**"Land of Evangeline" Route.**

On and after October 4th, 1909, the Steamship and Train Service on the Railway will be as follows (Sundays excepted):

#### FOR BRIDGETOWN.

Accom. from Annapolis, ... 7.20 a. m.  
 Accom. from Richmond, ... 5.15 p. m.  
 Bluenose from Halifax,  
 Mon., Wed., Fri., Sat., ... 2.29 p. m.  
 Express from Yarmouth, ... 2.08 p. m.  
 Express from Halifax, ... 11.24 p. m.  
 Bluenose from Yarmouth,  
 Mon., Wed., Fri., Sat., ... 12.53 p. m.

#### Midland Division

Trains of the Midland Division leave Windsor daily (except Sunday) for Truro at 7.05 a. m., 5.15 p. m., and 6.15 a. m., and from Truro at 6.20 a. m., 2.30 p. m., and 11.30 a. m. connecting at Truro with trains of the Intercolonial Railway, and at Windsor with express trains to and from Halifax and Yarmouth.

#### Boston Service

Commencing Monday, Sept. 20, the Royal Mail S. S. Prince Arthur and Prince George leaves Yarmouth, N. S., Monday, Wednesday, Friday, and Saturday, immediately on arrival of Bluenose trains from Halifax, arriving in Boston next morning. Returning, leaves Long Wharf, Boston, at 1.00 p. m.

#### S. S. PRINCE ALBERT

Makes daily trips (Sunday excepted) between Parrsboro and Wolfville, calling at Kingsport in both directions.

#### St. JOHN and DIGBY

ROYAL MAIL S. S. PRINCE RUPERT.  
 Daily Service (Sunday excepted).  
 Arrives in Digby ... 10.45 a. m.  
 Leaves St. John ... 7.45 a. m.  
 Leaves Digby same day after arrival of express train from Halifax.  
 Bluenose train from Halifax does not connect at Digby with S. S. Prince Rupert for St. John.

P. GIFFINS,  
 General Manager,  
 Kentville.

## AGENT GENERAL HOWARD

### FAVORABLY IMPRESSED

Nova Scotia as a Fruit Growing Centre Unexcelled.—To the Sportsman a Paradise.—Great Possibilities in Dairy Farming

(Continued from last issue.)

Fresh from a visit to Nova Scotia, where he had gone to see the important developments now taking place in the Province, Mr. Howard reports that he is most favorably impressed with the present and prospective conditions of the country. A tour of the famed Annapolis Valley has confirmed his belief that as a fruit-growing centre Nova Scotia is unexcelled. Over 600,000 barrels of apples were exported from the Annapolis district last year, and as a result of the establishment of experimental orchards in every county of the Province it has been found that apples can be successfully cultivated practically in any district. This has resulted in the fruit area being largely increased, and it is estimated that there are two million apple trees in Nova Scotia, although hardly a fraction of the land suitable for apple culture has yet been planted.

Fruit growing in conjunction with mixed farming offers exceptional openings to men with a capital of £500 and upwards. Most of the farms have an orchard attached, and this can be extended by planting as opportunity occurs. During the growth of the trees the farmer should make a comfortable living from the products of the farm proper and from small fruits, etc., etc. (which are usually set between the apple trees), with the certainty of a substantial revenue from the latter according to the extent of his orchard when the trees arrive at full bearing. To the man with larger capital, and in a position to acquire a more extensive orchard, the returns are immediate, and as the life of the Nova Scotian apple tree may be taken at from 80 to 100 years it will be seen that it is also a good investment for those who come after him.

Dairy farming is another industry of Nova Scotia which brings many inquiries of the Agent-General's office. The full possibilities of the industry are, indeed, only just beginning to be realized in the Province. A recent report of the Secretary for Agriculture states that "the local market is as yet far from being supplied and access to the export markets is exceedingly easy. As Western Canada fills up and our people, instead of looking towards this field, turn their attention to their own possibilities, the dairying industry, for which Nova Scotia is so well adapted, will undoubtedly receive an enormous impetus. In the meantime too much at-

tention cannot be devoted to disseminating and giving illustrations as to the best and most expeditious ways of manufacturing dairy produce." Notable assistance is given to the Nova Scotia dairy farmer by the Provincial Government in this way. The Department of Agriculture not only imports, and helps farmers to buy good class animals of the best milk breeds but demonstrates, by the results actually obtained at the Provincial Farm, the profits to be made by the use of those breeds. It also sends "travelling dairies," round the country to teach the methods of dairy management which experiment has shown to be the best. As a result of these visits there has been in recent years a marked improvement in the quality of the cheese and butter manufactured in private dairies.

To the sportsmen Nova Scotia is a veritable paradise, there being excellent shooting, hunting and fishing in nearly every county. There are bears, moose, and caribou in abundance, whilst of feathered game woodcock, snipe, plovers, partridges, and geese are common in many districts. The sporting attractions of Nova Scotia are gradually becoming recognized in the Mother Country, and the Agent-General is frequently called upon to supply information in this connection like so many of our kinsmen of the West, Mr. Howard is himself an enthusiastic sportsman and an excellent shot. On the few occasions which he was able to devote to fishing during his recent trip he had a good day's sport with the salmon not far from Halifax, and also with the pollock with rod and fly on the Bras d'Or Lakes, Cape Breton. In a little over two hours four rods landed forty fish, of which he was responsible for a round dozen weighing about 200 pounds. With the rifle Mr. Howard has earned high distinction at Bisley, having on more than one occasion carried off the Loving Cup, and in 1904 the St. George Vase.

In military matters Mr. Howard has always taken the liveliest interest, and he holds today, the rank of Senior Major in the King's Colonials. For the rest, as Nova Scotia's representative in London for the long period of seventeen years, he has devoted himself unflinchingly to the study of Imperial questions and to the furtherance of every possible means of making the unity between the Colonies and the Mother Country a reality and a mutual source of strength and prosperity.

#### Perpetual Motion

"Has he discovered the secret of perpetual motion?" asked the perplexed persons who see the "dry power" engine invented by Joseph Sutkatis, of Naugatuck, Conn., which, he asserts, will revolutionize the present methods of supplying power for the running of machinery. No fuel, the inventor says, is used to keep the driving rods in motion, nor has it any gas or electrical connection. The wheels turn and the driving rods perform their work with little noise and the building is not jarred in the slightest degree by the action of the machinery.

Everyone who has inspected the machine has concurred in the opinion that whether the perpetual motion problem has or has not been solved, the engine is certainly a remarkable invention. Sutkatis has been at work on it for five years. He has applied for a patent and has had the machine inspected by patent attorneys. He refuses to say what runs the engine, nor will he explain the interior parts, for therein lies the secret, and he is guarding it carefully until the patent shall be granted. All he will say is that the engine runs without fuel of any kind and without water power or electricity, and that it will run on and on until the machinery wears out. In a test recently the engine ran steadily for seven days. He says it is simply a "dry power" engine and that the power will never give out.

The engine on a larger scale, he adds, will run any manufacturing establishment. It must remain stationary, however, and cannot be used in locomotives, steamboats, or anything movable.

The model is seven feet long and two feet high, and there are two separate engines, one at each end, with the driving wheel between tin boxes, in which the engines are enclosed. To start the engine, the inventor does something to one of the little gears and immediately the

wheels begin to turn. He goes through the same operation at the other side of the machine, and the engine is running smoothly and continues to revolve until the inventor stops it by touching the same gears.

#### HOW TO CUPE A COLD.

Be as careful as you can, you will occasionally take cold, and when you do, get a medicine of known reliability, one that has an established reputation and that is certain to effect a quick cure. Such a medicine is Chamberlain's Cough Remedy. It has gained a world wide reputation by its remarkable cures of this most common ailment, and can always be depended upon. It acts on nature's plan, relieves the lungs, aids expectoration, opens the secretions and aids nature in restoring the system to a healthy condition. For sale by W. A. WARREN, BRIDGETOWN, A. E. ATLEE, ANNAPOLIS ROYAL, and BEAR RIVER DRUG STORE.

The world reserves its big prizes for but one thing and that is initiative in doing the right thing without being told. Next to doing the thing without being told is to do it when you are told once.—Jo Anderson, of Sacramento.

### PURPOSELY CREMATED.

A traveller in Tennessee, came across an aged negro seated in the front of his cabin door basking in the sunshine.

"He could have walked right on the stage for an Uncle Tom part without a line of make-up," says the traveller. "He must have been eighty years of age."

"Good morning, uncle," said the stranger.

"Morn'n, sah, morn'n," said the aged one. Then he added, "Be you the gentleman over yonder from New York?"

Being told that such was the case, the old darky said, "Do you mind telling me something that has been botherin' my old haid? I have got a grandson—he runs on the Pullman 'cars—and he done tells me that up thar in New York you all burn up yovah folks when they die. He is a powerful har, and I don't believe him."

"Yes," replied the other, "that is the truth in some cases. We call it cremation."

"Well, you suttlenly surprise me," said the negro, and then he paused as if in deep reflection. Finally he said, "You all know I am a Baptist. I believe in the resurrection and the life everlastin' and the comin' of that Angel Gabriel and the blowin' of that great horn, and Lawdy me, how am they evah goin' to find them folks on that great mawnin'?"

It was too great a task for an off-hand answer, and the suggestion was made that the aged one consult his minister. Again the negro fell into a brown study, and then he raised his head and his eyes twinkled merrily, and he said in a soft voice:

"Meanin' no offense, sah, but from what Ah have heard about New York I kinder calculate they is a lot of them New York people that doan' want to be found on that mornin'."

#### BRAVE YOUNG MAN!

The girls had seen a picture of the life-saving fire corps organized by the young ladies of an English town, and decided to form a similar brigade. The drill consisted in getting around a large blanket, and holding it to catch unfortunates who should jump from the second or third stories of burning dwellings. But the fair members of the corps wanted some real practice. After much persuasion a young man, deeply enamored of one of the members, was prevailed upon to fall into the blanket from the top of a barn.

The life-savers gathered one afternoon, attired in becoming uniform, and twelve gathered around the blanket and took a firm grip. Then the accommodating young man climbed up on the roof of the building, made ready, and jumped. Each girl was gazing upward, and at the terrible sight of a man falling through the air they were all so shocked that without thinking, twenty-four hands went up to as many eyes to shut out the view. The brave young man is still confined to his room.

#### THE DIVIDED UNCLE.

The group of little girls was standing on the sidewalk, when a man passed who was generally disliked by the children of the neighborhood on account of his austere manner and the fact that he always ignored them. When he was out of hearing, various uncomplimentary remarks were made, and there was some derisive laughter. No one happened to notice that little Agnes was present. Suddenly she was heard from.

"You can just stop talking about that gentleman," she remarked with some heat. "He's as good as you are. He's my half uncle."

"Oh, we forgot," said Ruth, hastily. "Besides, we were talking about the other half, anyhow. Of course, your half is all right."—Woman's Home Companion.

#### A BAD CONDITION OF AFFAIRS.

"Look here," said the guest, "things around here are just about as rotten as they make them. When I went to lunch today I found hair in the ice-cream, hair in the honey and hair in the apple sauce."

"Well," exclaimed the genial proprietor, "the hair in the ice-cream came from the shaving of the ice."

"And I suppose the hair in the honey came off the comb. But I don't understand about the hair in the apple sauce. I bought those apples myself, and every one was a Baldwin."

A man living in Charleston during the earthquake three years ago felt that his duties required him to remain there to do what he might for the sufferers, but sent his six-year-old son out of the danger and confusion to the youngster's grandfather in New York. Three days after the boy's arrival the Charleston man re-

### What Our Trade-Mark Means to You

IT means that the flour contained in bags and barrels so trade-marked is decidedly whiter, a great deal stronger and more nutritious than other flours.

It means that the flour has been properly aged to mature its full strength.

It means

"More bread and better Bread" and better pastry, too.

It means elimination of uncertainty—"your money back" if Purity fails to give entire satisfaction.

Costs more than the other kind, but worth the difference.

ceived this telegram from his father: "Send us your earthquake and take back your boy."

In the window of a little bookstore in Eighth Avenue, New York, was recently heaped a great pile of Bibles marked very low—never before were Bibles offered at such a bargain, and above them all, in big letters, was the inscription: "Satan trembles when he sees Bibles sold so low as these."

WELL KNOWN HOTEL KEEPER USES AND RECOMMENDS CHAMBERLAIN'S COLIC, CHOLERA AND DIARRHOEA REMEDY.

"I take pleasure in saying that I have kept Chamberlain's Colic, Cholera and Diarrhoea Remedy in my family medicine chest for about fifteen years, and have always had satisfactory results from its use. I have administered it to a great many traveling men who were suffering from troubles for which it is recommended, and have never failed to relieve them," says J. C. Jenkins, of Glasgow, Ky. This remedy is for sale by W. A. WARREN, BRIDGETOWN, A. E. ATLEE, ANNAPOLIS ROYAL, and BEAR RIVER DRUG STORE.

The greatest strike of natural gas ever made in Eastern Canada has been made on the property of the New Brunswick Petroleum Company in Albert County, N. B. From one well alone a volume of gas more than sufficient to light and heat the city of Moncton is flowing and preparations are being rapidly made for sinking other wells in the confident expectation of increasing the quantity ten-fold. The discovery of such a quantity of gas, important in itself, has even greater importance as a sure indication of large oil deposits in the vicinity. Arrangements for reaching these are going rapidly forward.

### TWO FRIENDS RESCUED BY GIN PILLS

#### The Kidney and Bladder Remedy

Mr. Herbert Bauer, of Davisville, says he owes Gin Pills a debt of gratitude which he can never repay. He suffered for years with Bladder Trouble, and could not pass urine except by much straining which caused great pain.

Mr. Bauer sent for a free sample of Gin Pills. The first dose did him so much good that he ordered six boxes and began to take them regularly. A month's treatment completely cured him.

In high glee he called on his friend, Mr. Simpson, to tell the latter about his recovery and what a wonderful remedy Gin Pills proved to be. Mr. Simpson, at that time, was suffering intensely with his kidneys. Gin Pills were promptly recommended and taken—with the gratifying result that both these good friends are well and happy men today.

Gin Pills are a special remedy for three special diseases—Kidney, Bladder and Urinary Troubles. For these, Gin Pills are sold with an absolute guarantee of prompt relief or money refunded, 50c. a box, 6 for \$2.50. Write National Drug & Chemical Co., Dept. NS Toronto, for free sample.
