

SYSTEMATIC SPRAYING IS THE BRIDGE
FROM FAILURE TO SUCCESS — FROM LOSS TO PROFIT
FROM BAD TO PERFECT FRUIT

Deming Sprayers commend themselves to every grower who uses them. All working parts are made of brass, insuring them against the chemical action of spraying solutions. Pumps are constructed on the right principle and are prompt and positive in action. The owner of a Deming Sprayer can depend on his pump to serve him when he needs it, instead of being out of commission just at the critical time in the maturing of his crop.

Don't be discouraged by past failure. Take advantage of your experience, buy a Deming Sprayer now and market a good, clean crop of fruit next fall.

We can furnish you a Spray Pump to suit your needs, anything from Bucket Outfits for vegetables and small trees, to Gasoline Engine Machines for big orchards.

OUR 1907 CATALOGUE handsomely illustrates more than twenty styles of Pumps, Nozzles and Fittings. We'll be glad to send it to you with a copy of "Words of Wisdom." You need to know more about "Spraying for Profit," and we will tell you how to get a copy of this valuable little booklet free of charge
