The Year-Book of Treatment for 1895. A Comprehensive and Critical Review for Practitioners of Medicine and Surgery. In one 12mo volume of 501 pages. Cloth, \$1.50. Philadelphia : Lea Brothers & Co. 1895.

The eleventh consecutive issue of this annual summary of medical progress will interest the wide circle of readers who have learned its substantial value. To have the real advances in treatment in all departments of medical practice culled by recognized specialists from the immense mass of medical literature, and presented with critical remarks in a classified form for immediate use, is assuredly a help towards success which busy practitioners will not neglect, and which other practitioners will consult for the soundest of business reasons. The reader interested in a special subject can quickly post himself on whatever is new and good in treatment by a perusal of the chapter devoted to it, and the general practitioner can with facility turn to any topic by a glance at the index. Those desiring to read up the literature of any subject can find no more convenient guide than the selected list of new books, new editions, and translations. The volume is exceedingly cheap in proportion to intrinsic value and serviceableness.

The Treatment of Wounds, Ulcers and Abscesses. By W. WATSON CHEYNE, M.B., F.R.S., F.R.C.S., Professor of Surgery in King's College, London. In one 12mo volume of 207 pages. Cloth, \$1.25. Philadelphia : Lea Brothers & Co. 1895.

This little work owes its brevity and its widespread usefulness to the fact that it is devoted wholly to the treatment of affections which, though nominally surgical, are yet so common as to form part of the daily work of every practitioner. Antiseptic methods have revolutionized surgical procedures and have added vastly to their successes. Moreover, by throwing light upon formerly unexplained failures, they have increased not only the knowledge but also the confidence of the surgeon, an element which must be recognized as having an important influence upon results. Prof. Cheyne has long been known as one of the foremost of London surgeons, and as a critical student of antiseptic procedures in their practical bearings. In this volume he has described the methods of treatment which he employs, and which he knows "to be efficient and to be the simplest consistent with certainty in results."
