**WHAT IS CATARRH?**

Catarrh is a mucus-purulent discharge caused by the presence and development of the vegetable parasite amoeba in the internal lining membrane of the nose. This parasite is only developed under favourable circumstances, and these are—Morbid state of the blood, as the blighted corpuscles of scurvy, the germ poison of syphilis, mercury, toxomes, from the retention of the effeted matter of the skin, suppressed perspiration, badly ventilated sleeping apartments, and other poisons that are germinated in the blood. These poisons keep the internal lining membrane of the nose in a constant state of irritation, ever ready for the deposit of the seeds of these germs, which spread up the nostrils and down the fauces, or back of the throat, causing ulceration of the throat, or the eustachian tubes, causing deafness, burrowing in the vocal cords, causing hoarseness, usuring the proper strength of bronchial tubes, causing in pulmonary consumption and death. Many attempts have been made to discover a cure for this distressing disease by the use of inhalants and other ingenious devices but none of these treatments can do a particle of good until the parasites are either destroyed or removed from the mucus tissue. Some time since a well-known physician of forty years' standing, after much experimenting, succeeded in discovering the necessary combination of ingredients which never fail in absolutely and permanently eradicating this horrible disease, whether standing for one year or forty years. Those who may be suffering from the above disease, should, without delay, communicate with the business managers—*Toronto Mail*, Messrs. A. H. DIXON & SON, 305 King St. West, Toronto, Canada. Inclose stamp for their treatise on Catarrh.
