## A RELIABLE FIRM.

From St. Thomas Journal.

The new dress of type in which the Journal has attired itself has elicited many complimentary remarks from subscribers and contemporaries, and we have to confess we are rather well pleased with it ourselves. It is only justice to one of the most reliable and fair-dealing of firms to state that this new type is the product of the celebrated Edinburgh Type Foundry. Messrs. Miller & Richard have built up a reputation for "hard metal type" which is now world wide, but is not more firmly established than is their record for square dealing. The Journal has been using their type for thirty-four years, and this latest purchase is the best testimony it can offer of its appreciation of the merits of the products of this foundry. To Mr. R. L. Patterson, of Toronto, the Canadian representative of Miller & Richard, not a little of the success of the firm in the Dominion is due, his unfailing courtesy and businessacumen being prominent factors in the steady increase of business of the Canadian branch of the Edinburgh Foundry.
