

As Physicians and Surgeons.

Mr. John Lawrence, M. R. C. S. L.

“ Louis Lemieux,

“ Joseph Varin,

“ André Fournier,

“ P. E. Brossard,

“ Theodule Pomainville.

As Apothecaries, Chemists and Druggists.

Mr. Joseph Alfred Sanders,

“ John Musson,

“ William Edward Bowman.

And at the quarterly meeting of the Quebec District Medical Board, held on the same day as the preceding, the following gentlemen were recommended for License to practice as Physicians and Surgeons:—

Mr. Hospice Desjardins,

“ W. Evans,

“ F. Jacques,

“ M. Thyfault,

“ L. Duquet,

“ P. Ouellet,

“ John Watt,

“ L. Tremblay,

“ Terence Sparham.

On the 26th ultimo, the degree of M.D. was conferred on Mr. Petrus Fortin, of Laprairie, by the University of McGill College. This gentleman's exercises were gone through in a most satisfactory and highly creditable manner, demonstrating that he brings to bear upon the responsible duties which he has undertaken, talents of no mean order.

An operation was performed by Dr. Crawford for the restoration of the columna nasi. The disease which caused the destruction of the columna was secondary syphilis, aggravated by the improper employment of mercury at the time of his admission. He had lost the inferior spongy bones and the columna nasi. The whole lining membrane of the nares and back of the pharynx was covered with ulcerations, and there was a characteristic papular eruption over his body. These complaints were removed by mercury, iod. of potass, iron, quinine, and sarsaparilla, with local applications. About two months after the remedies had been discontinued, the operation was performed by cutting a portion of the upper lip $\frac{1}{2}$ of an inch broad, extending from the base of the former columna down through the free margin of the lip, from which a small portion was removed, and a corresponding surface was denuded on the tip of the nose. The surfaces were kept together by means of a needle and ligature, and two hare-lip pins brought the lip to its new situation. The parts all healed accurately and well, and the operation has removed a very unsightly deformity.

WM. E. SCOTT, M. D.,
House Surgeon.

Case of "Charbon," (Malignant Pustule.)

(Reported by Mr. G. D. Gibb, Apothecary, M. G. H.)

Joseph Gibson, ætat 54, farmer, was admitted into the Montreal General Hospital by Dr. Hall, on the evening of Sunday, May 4th, with the right forearm and hand much swollen, the cellular substance presenting a hard indurated feeling, and an erisipelatous tendency. A pustule of a threatening aspect is observable about three inches below the bend of the elbow, on the anterior part of the forearm, about an inch in diameter, with a phlyctenous elevation of cuticle, and dark livid edges. The pain from it is intense, accompanied with burning heat. There is but slight constitutional dis-
