

DEVELOPMENTS IN THE LONDON MEDICAL COLLEGE.

London ratepayers at the municipal elections to-day took a bold stroke for the elevation of Western University to the plane of a first-class university, when a by-law authorizing the issuance of \$100,000 debentures for the establishment of an efficient medical school carried by a vote of 2,764 to 1,003.

Work will be commenced as early as circumstances will permit on the erection of a building that will cost a quarter of a million dollars, the difference having already been insured from Provincial Government grants and the pledged contributions of a number of private citizens. A \$35,000 site has been donated. Though London has held a university charter for 40 years, the institution has never before received municipal assistance, but plans for a million-dollar plant which have been held in abeyance during the war are now to be proceeded with. The campus for the arts department was acquired more than a year ago, and plans for the development of that branch, contingent upon the success of the Medical School by-law, have been carefully matured.

KILLED IN ACTION.

British.	706,726
French.	1,071,300
American.	58,478
Russian.	1,700,000
Austrian.	800,000
German.	1,600,000
Italian.	200,000
Canadian.	36,000
Roumanian.	50,000
Serbian.	100,000
Bulgarian.	50,000
Grecian.	25,000
Australian.	33,000

These figures do not include those who died of wounds or disease.

PHYSICIANS ENGAGED IN INDUSTRIAL PRACTICE.

By request, the following is published:

"Will you kindly call attention, in the next issue of your journal, to the fact that Dr. Francis D. Patterson, Chief, Division of Industrial Hygiene and Engineering, Department of Labor and Industry, Harrisburg, Pa., is desirous of obtaining a complete list of all physicians engaged in the practice of industrial medicine?"
