## Drug Reports.

### Canada.

Business is better than it has been for some months, and collections are above the average.

Quinine has advanced 5c. per oz., outlook uncertain. As it was an unlooked-for and sudden jump, many buyers were caught napping. Chlorate potash has advanced 4c. to 5c. per lb. owing to stocks being depleted for American market, the advance would not be warranted otherwise. The long looked-for advance in price of Paris green took place last week when the manufacturers put it up 2c. per lb. The probabilities are it will not likely be lower this season. Laurel green, a new substitute for Paris green, is reported as having a good sale. Copperas has advanced 25c. per 100, manufacturers say there is no money in it at old prices. Wood alcohol, which is somewhat cheaper than methylated spirits, is having a good sale. Sperm oil has advanced 15c. per gallon. Protargol, one of Bayer's new preparations, is being called for; \$1.25 per oz. is the price. Senna leaves has advanced still further abroad, and it is difficult to

get good leaf at any price. Opium is higher, the usual reports are coming to hand showing that snow, frost, rain and drought have all combined against the poppy, and report is that this year's crop will be very small, probably 3,000 cases. Norway cod liver oil, 1898, is worth \$t.50 per gal. Sulphur is much higher.

In American patent medicines that are not put up in this country, it will likely pay anyone to anticipate their wants, as the proposed war stamp will advance their prices.

### England.

LONDON, April 27th, 1898.

The market has shown some effects of the American-Spanish war, and quinine has naturally been first affected. It has advanced this week 3 or 4 cents per oz., and is very firm. Opium, morphine, and ipecac have also risen. Camphor is easier and cassia lower. Phenazone is dearer, as manufacturers have combined, and no further reduction has taken place in antipyrin. Fixed oils and turpentine show small advances. Cod-liver oil in spite of alarmist reports is dull. Quick-silver and mercurials are unaltered, but

an advance is by no means improbable in the near future.
