ROBB HEATERS

WILL BURN

ANY KIND OF FUEL.

Hard coal is the only fuel than can be used successfully in the ordinary hot water heater. If soft coal is used, the soot must be removed every day or two. This is seldom properly attended to, and as soot is a non-conductor of heat, much fuel is wasted.

The heating surfaces of the **ROBB HEATER** are so arranged that soot cannot collect, and any kind of fuel can, therefore, be used in the most efficient manner.
