Stocks and Bonds Bought and Sold on Commission

56 King St. West, Toronto. Ad. 17

NEW YORK, April 14.—Trading in the stock market today again exceeded 1,000,000 shares, with a continuance of the strength and breadth which have been its most prominent recent features. Bethlehem steel, which caused much apprehension on the preceding day because of its wild movement, was far less conspicuous today, also it made a 20 point gain to 140 in the first ten minutes, only to lose much of its advantage later. It closed at 122, a net gain of 3 points.

By far the greater part of the day's advance was made in the forenoon, dealings in that short period aggregating 400,000 shares. All leading issues, as well as two score semi-active and obscure stocks, shared more or less equally in the rise which was subject to frequent interruptions on profit-taking and moderate renewal of near contracts.

The railway list in part and all copper as well as some of the better known equipments and utilities, broke into new high ground, their advance being again ascribed in many quarters to purchases by commission houses acting for outside clients.

Heavy Selling of Steel.

Motor stocks moved irregularly, some of them falling under yesterday's final quotations. United States steel led all speculative favorites as to volume of individual transactions, but was made the objective of a fresh selling drive in the final hour, the move extending to Reading and a few other railers and imparting an irregular tone to the close.

Some of the steel's relative heaviness was coincident with the publication of the weekly trade review, which stated in substance that the steel industry was not measuring up to the scale of prosperity attributed in some quarters, also an encouraging view was taken of the export business.

The wild move for grains and other foodstuffs dispelled all recent pace rumors. An index to the sound investment demand was found in the keen demand for the New Haven one year notes, which rose to a premium. Total sales of stocks amounted to 1,000,000 shares, with a net gain of \$4,500,000.

Interest shifted back to the big stocks on the mining market yesterday, with the Cobalts ruling. McIntyre, Timiskaming and Beaver reached new high points. Dome Mines registered another gain, selling up to \$14 at the market closing, and reached \$14.25 bid after the close.

New York started the movement in the bigger stocks, when several orders were filled for Big Dome. Opening at \$12.00, the stock soon went to higher figures. Brokers claim that yesterday's Big Dome buying will fill only a small part of the New York orders, and another big advance is impending.

Timiskaming was the big feature and touched 42. Buyers seem to be confident that Timiskaming will be one of the greatest dividend payers in the camp. It is reported that development in the new rich vein located in the old working is satisfactory and that something like 5,000,000 ounces of silver is now in sight. Talk of the dividend being resumed within a few months has had a bullish effect on the stock.

On an unconfirmed report that the famous Seneca north vein had been located on the property, Peterson Lake became active and registered a gain of 2 1/2 points to 24 1/2. A bullish element has been controlling Peterson Lake for some time, and it is thought that a large short interest has accumulated.

Beaver reached 39, a new high point, despite the recent selling. Peterson Lake is another strong Cobalt, closing at 37 bid.

McIntyre was one of the few Porcupines to break into what was almost a Cobalt market. In the afternoon 53 was touched several times, making a new high point. Reports from the mine continue bullish.

It is understood that the following proposal has been made to the receiver for reorganization of the Pearl Lake Gold Mining Co. A new company, capitalization at \$2,500,000, of which 2,000,000 shares are to be transferred to the Cartwright interests, leaving 500,000 shares in the treasury. The shareholders of the old company will be given the privilege of subscribing for four shares of the new stock at 12 1/2 cents for each five shares they hold.

It was stated on good authority yesterday that a contract had been made by the Gold Reef for the development of the property in Whitney. Work is to be started at once and it is proposed that a small stamp will be erected.
