The Congregationalist.—"This volume deals with the life and customs of the peoples indicated. It throws a flood of light upon the social conditions of the remote past. It describes the family, education, manners and customs, slavery and free labor, religion and other kindred themes. Only a trained expert could have written the book, and many possessing his knowledge would have failed to have written it so agreeably. It is a pleasant popular account of a civilization which is known to moderns only by scanty records and other remains, and it is surprising that he has been able to draw so much trustworthy information from the sources at his command, and to give to his readers so comprehensive and lively a picture of times and the people under consideration."

The Churchman.—"The book is full of curious detail and will be read with interest for its own sake as well as for the light it throws on the older portions of the Bible."

The Interior.—"It is needless to say that Professor Sayce paints the picture of Assyrian and Babylonian life with a master hand. He virtually transports his readers into the strange world of the Orient five thousand years ago and there shows the movement and action of life."

The Spectator (LONDON).—"The book is full of curious and interesting details. The new series starts remarkably well."
