SEVERELY CONDEMNS GERMAN PROPAGANDA

Ex-Mayor Blankenburg of Philadelphia Attacks Prussian Junkerism.

New York, Feb. 8.—In an open letter made public here today, Rudolph Blankenburg, former mayor of Philadelphia, endorsed the aims of the friends of German democracy, and severely condemned the German propaganda which, he declared, was intended to divide the American people.

"Prussianism, Junkerism, militarism, are the inveterate foes of all liberalizing tendencies," the letter said. "They should be thwarted in every legitimate way, and the friends of German democracy should be heartily supported by America and Americans."

"One of the main weapons of the German autocrats, as far as our country is concerned," the former mayor added, "has been the assertion of the Kaiser's government that the United States would never wage war against the German Empire on account of the loyalty of our twenty million inhabitants of German blood to the land of their fathers..."

FOILED PUBLISHING OF HEARST CABLES

French Foreign Minister Stopped Scheme of Bola to Influence Public.

ATTEMPTED FRENCH LOAN

Paris Treason Trial Reveals Loan of Money to Press Correspondent.

Paris, Feb. 8.—At the trial of Bola Pasha for treason today, P. S. Bertelli, a Hearst newspaper correspondent, testified that Bola had loaned him money which he offered to repay thru Captain Bouchardon when he (Bertelli) heard that Bola was under suspicion. Bertelli told the court that this money now was deposited at the sequestration office.

The witness described the meeting of Senator Charles Humbert, who controlled The Journal, and M. Mouthon, editor-in-chief of The Journal, and now a witness for the government, which meeting was arranged at the instigation of Bola and at which was discussed an exchange of news between The Journal and the Hearst papers. This proposed exchange, however, fell through because the minister of foreign affairs was opposed to the proposition, the witness said.

Bola attempted in America to raise a French loan, which had great prospects of success, Bertelli testified, and he added that he was urged by Senator Humbert to interest himself in this movement which, however, came to nothing.

The chamber of deputies today gave a vote of confidence in the government following an interpellation by the Socialist deputy, Renaudel, and Motet, regarding the organization of military justice. The vote was 395 to 113.

The interpellation was provoked by correspondence between the war office and the military governor of Paris as to the possibility of granting the application of an officer to be transferred to the post of president of the court-martial at Paris or Marseilles. The Socialist claimed to see in the incident a disposition on the part of the government to tamper with the composition of the court that would try one of the cases of treason now under investigation.

JELICOE SAYS SUB. MENACE WILL BE KILLED

But Britain is in For Bad Time for Few Months.

OVER BY LATE SUMMER

About August, He Says, the Menace Will Be Killed.

London, Feb. 8.—Admiral Sir John R. Jellicoe, former chief of the naval staff, speaking at Hull today, said he was afraid "we are in for a bad time for a few months, but by late summer—about August—I believe we will be able to say the submarine menace is killed."

Admiral Jellicoe then continued: "I won't say before August, because I always notice when we have an optimistic speech from the premier or any high official it results in a disaster about the next day. I have told the premier often enough not to make optimistic speeches about submarines, because I have found the next morning I had to go over to the war cabinet with a very long list of losses."

"I would ask them not to make any more optimistic speeches until August, when they can make as many as they like."

Admiral Jellicoe said the reason for the recent losses in the Irish Sea was that there is shoal water on each side of that sea, at the bottom of which a submarine could sit and remain when hunted. The difficulty of keeping submarines in their home ports, he added, was accentuated by the shoal water in and around Helgoland Strait.
