ENEMY ALIENS LOOSE IN HALIFAX

Controllers Will Wait on Military Authorities and Urge Internment.

A CASE IN POINT

German Woman is Permitted to Mix Freely With Naval and Military Men.

Halifax, N.S., July 5.—Since the sinking of the hospital ship Llandovery Castle the Halifax Herald has been carrying on a vigorous editorial campaign against enemy aliens, who have been enjoying the freedom of the city since the outbreak of the war. Enemy aliens, the Herald alleges, who have no regular occupations, are in constant association with sailors and soldiers, watching marries movements.

watching marine movements.

The interest of this campaign has been so intense that at a meeting of the city council yesterday a resolution was unanimously passed to take the matter before the board of control.

At a meeting of the board of control today it was decided to wait on the military authorities and urge the rounding up and internment of all alien

In the course of a leading article, the Heraid will say tomorrow, in part: "This newspaper was informed yester-day that a woman, a native-born of Germany, whose husband is also a German and at the present time a prisoner in the internment camp at Amherst, is allowed to parade the streets of Halifax, to enjoy every freedom of the city, and is associating with naval and military men. This is not the only case could be cited. To allow this state of affairs to continue is an out: rage on common sense. It is a direct courting of danger.

"For what conceivable reason are alien enemies allowed their untrammeled freedom in this city?
"The authorities must throw off all lethargy in this matter and co-operate with the civil authorities in rounding

"The local spies must go. Halifax must be purged of treachery."

TO PREVENT RISE IN CORN FLOUR

Canada Food Board Urges Millers to Mix Smaller Percentage of White Corn.

Ottawa, July 5.—While the Canada Food Board has no control of the price of grains they have taken steps to counteract the recent advance in the price of white corn. As the result of an apparent scarcity of the white product in the principal markets of the United States the price is now considerably higher than the price of yellow milling and other grades of corn.

The food board today is requesting all millers manufacturing corn flour and cornmeal, or otherwise converting corn into a substitute, to mix not more than 25 per cent. of white corn with at least 75 per cent. of good yellow milling, cr. good mixed corn. In this way it is expected that the price of corn flour can be reduced to the price of government standard wheat flour or even lower.
