No. 1-The Crumpled-up G.T.R. Train at Richmond, Que.

INE killed and TWENTY-FIVE injured. A head-on collision between a Montreal special examples of the Sherbrooke Exhibition, and No. 5, Island Pond local passenger train, en route to Montreal, occurred at Bichmond Wednesday, at 10,25 a.m. The accident was one of the worst in the history of the road on this division of the G.T.R.

the G.T.R.

The special was running on orders given in Montreal, with right of way over all traffic except first-class trains. When it arrived at Richmond, the end of that division, the same order was repeated, to carry the train on to Sherbrooke. The latter order came from Island Pond. The time table stated that No. 5 was due at 10.15 a.m., and this being a first-class train, the special was bound to wait for it to pass. Furthermore, there is a register at the station wherein the arrival and departure of trains are registered. It was the duty of the special to see that No. 5, the mail train, had reported. Notwithstanding the fact that No. 5 had not passed, the excursion train pulled out, against the warnings of

Notwithstanding the fact that No. 5 had not passed, the excursion train pulled out, against the warnings of the station agent and the operator.

At the station everybody who saw the huge excursion train move out tow ards Sherbrooke knew that it was moving towards an appalling catastrophe, fated beyond reach of human interference. But on the doomed thain agent one suspected what was in store. The engineer of the special did his best to make full speed immediately. He had nearly a mile of straight level track through the Richmond yards, and it is estimated that he was running at twenty-five miles an hour when he reached the curve. As soon as the line leaves the yards it is compelled by the course of the river to turn towards the left, where the curve is sufficiently sharp to prevent the oncoming trains from seeing one another until they were within a train's length. Both engineers succeeded in applying the brakes, but there was hardly space for them to be felt.

The two trains came together with such force that the baggage of the special train and the mail car of No. 5 were telescoped into the passenger coaches behind.

The worst scene presented itself on the special train. The baggage car was telescoped into the first passenger coach, being lifted clean off the track, and into the passenger car right up to the end, three feet from the rear. In this coach most of the dead and injured were found, and it is a wonder that one escaped alive.

It took over half an hour before the dead and injured could be removed, and not then until the side of the car had been cut open.

had been cut open.
On No. 5 the mail car was felescoped into the following passenger car. The three people that were killed in this train were sitting in the smoking car.—From Richmond (Que.) Times and Canada Record, Sept. 2. 1904.

This tragic story is retold with a VOU are cordially invited to inspect and

caused by human negligence.

The pity of it all is that it can be prevented. The Price Automatic Signalling, Controlling, and Stopping device for railways renders such calamities impossible.

We are showing how every day.
