Mackie, of Halifax, will pilot the steamer around to the sister port.

FIRE RANGER ADDRESSES THE ROTARY CLUB

Deputy Chief A. W. Webb Speaks of Fire Danger and Fire Prevention—A Strong Appeal.

The timely subject of fire prevention was the theme of an address delivered before the Rotary Club at their weekly luncheon by A. W. Webb, Fredericton, deputy chief fire ranger. There was a large attendance of members and Mr. Webb's remarks were listened to with close interest. He said the object of Fire Prevention Week was to educate the public in a lasting realization of the enormity of Canada's fire waste and the necessity for more personal care in eliminating this waste.

Last year the fire loss in New Brunswick amounted to \$7 per capita, the highest of any province in Canada. A reduction of \$2 per capita would mean a saving of about \$750,000 and would finally lead to a reduction of the insurance rates. In the last six months for every two houses built in New Brunswick, one was burned and enough manufactured lumber was destroyed to build nearly 1,000 houses. In closing he said:

"Therefore, Gentlemen, my message to you today as a club is an appeal for active co-operation and united support in the enforcement of fire prevention methods in the weeks and years before you, and as individuals a personal appeal consciously to be careful of fire conditions in your office, in the forest and wherever you may be, being careful of fire becomes a habit."

Through the kindness of Rotarian S. Sinton, music was played by Rotarian Weyman and favorably considered. The suggestion also was made by Rotarian K. J. MacKie that the club undertake to stage a big show to raise funds necessary to finance the boys' band. Rotarian Geo. J. Smith was chairman for the day.

POKIOK FOLKS WANT LIGHTS

Matter Up at City Hall Today—The Power Company Wires—Gun Carriages, But No Guns.

A committee meeting of the common council was held this morning, with Commissioner Frink presiding in the absence of Mayor McLellan. Commissioner Thornton presented a petition from residents of Pokioik asking for the installation of electric lights along Bellevue avenue. The commissioner explained that this district needed lights, but if they were installed he thought that the residents would come in for full assessment. He explained that they had not been receiving benefits to warrant a full assessment and that when they were presented, that the petition be referred to the Commissioner of Public Safety to report back.

Acting Mayor Frink said that he noticed that a trolley wire of the street railway had broken twice last Friday, and if reports were correct one person in an automobile had received a shock. He said this seemed out of the ordinary and was certainly a menace to public safety, as the highly charged wires were deadly if anyone came in contact with them. He said it was a coincidence that the wire should break twice in such a short space of time. He presumed that an inspection is made by New Brunswick Power Commission officials, but it was a matter that citizens were very much concerned in and they looked to the council for an adequate degree of protection.

Commissioner Thornton said he was pleased that the matter had been brought to his attention and he would look into it.

Commissioner Bullock said that there are two gun carriages stored in one of the city yards in Water street, and as they were in the way he would like some action taken to get rid of them. It was moved that a letter be written by the common clerk to the commanding officer in charge of this military district to see if two cannons could be procured, and promising to see that they would be properly placed. It was felt that a suggestion offered by Commissioner Frink to have the cannons at Coutreney Hill, West St. John, was a good one and should be acted upon.

FAR AHEAD OF LAST YEAR

C. P. R. Marketing of Grain in the West—Good Results for Some Alberta Farmers.

Winnipeg, Oct. 9.—From September 1 to October 5 the Canadian Pacific Railway has marketed 65,272,864 bushels of grain, according to a statement issued at the local offices today. During the same period 34,484 cars were loaded, which is the equivalent to 51,180,789 bushels. The previous highest figures recorded were in 1915, when the company marketed 32,028,000 bushels and loaded 22,472 cars, which is equal to 29,897,769 bushels.

Calgary, Alta., Oct. 9.—Many farmers in the irrigated districts in southern Alberta have every reason to be satisfied with the results of their season's work, according to G. H. Hutton, superintendent of the agricultural and animal industry branch of the C. P. R. Department of Natural Resources in Calgary, who has returned after a visit to that section of the province. The yield of wheat has turned out most satisfactory, in some cases averaging thirty-seven bushels to the acre. One man in the Comdole district had realized a net profit of \$8,000 from 425 acres.

In the Vauxhall district one of the farmers had informed Mr. Hutton that he purposed finishing with 100 steers, 2,000 lambs and from twenty-five to thirty dairy cattle, and that he would have even then 200 tons of hay for sale from one section of land. Incidentally Mr. Hutton mentioned that the feeding of the lambs under contract in the irrigated districts was being considerably extended this year. The business promised to provide a most satisfactory market for alfalfa hay and coarse grain, and to involve a relatively small risk, inasmuch as it was possible to contract lambs now for spring delivery. The profits from that line of work, he said, were in marked contrast to those which were realized even under the best of conditions in the growing of grain alone on irrigated land.

Mr. Hutton referred to the large number of feeder and stocker cattle that had been exported from Alberta, also to lambs that had been sent to the lakes to be finished. With the development of work on the irrigated sections there was no reason why these animals could not be finished in the province. In the spring they would bring three times the amount of cash compared to shipping them in an unfinished state, as had been the custom in the past.

In this connection Mr. Hutton was sanguine that the British embargo on Canadian cattle would be removed at a comparatively early date. The Department of agriculture had representatives in Britain now who were helping to draft regulations. With the removal of the embargo a market would be provided for the high-class finished stock.
