I. R. C. ELEVATOR HANDLED 50 P.C. MORE WHEAT THAN IN 1907-08, BEST PREVIOUS YEAR

The Intercolonial elevator here has just been closed after a season which has been marked by the handling of a nearly 50 per cent. more grain than that which went through it in its best previous year.

As the season is much shorter than that during which the West Side elevator is in operation, it will be seen that the railway elevator has had a busy season. A large proportion of the grain passing through it was handled early in November. All the vessels sailing before the latter part of November took their grain cargo from it. The close of the season is earlier than that of the C. P. R. elevator, which will be running for some time yet. Following is the statement forwards of the the Department of Railways and Canals at Ottawa:

Month. Wheat

This is a striking advance since 1903 the elevator's first working year. At that time a total was handled of only 110,000 bushels.

How Save Money

on

There are different ways of economising in footwear.

To buy cheapiy badly-made shoes is not economy.

But to buy goed shoes—high-class shoes is economy.

It's impossible to use high-grade materials for cheap shoes and make money.

And its also impossible to use the best machinery and employ the best workmen.

Because it wouldn't pay to do either.

When you buy cheap shoes you buy cheap material and cheap workmanship.

But, when you buy
