### STILL FIGHTING

AMERICANS AND FILIPINOS LONG WAY FROM A TRUCE.

A Plan to Surround the Troops of General Pio Del Pilar Frustrated -Hard Work With Boats in Shallow Water

Manila, June 4, 8 p. m.—The position of the American troops tonight indicates that they will tomorrow sweep the peninsula of Morong, the land projecting to the south into Laguna De Bay, where the insurgents are supposed to have a large force, near the town of Morong, as well as the battery on the western shore of the peninsula which recently smashed the propeller of the gunboat Napidan.

General Hall is marching from Antipolo, about six and a half miles northwest of Morong, toward the peninsula, with his forces spread out to cover a large section. Colonel Truman, with the first North Dakota regiment and the twelfth infantry, is advancing along the coast of the lake from Taytia incidentally clearing several small towns, while Col. Whalley, with the first Washington regiment, has landed on the peninsula above the town of Morong. The army gunboats Napidan, Covadongs and Oeste are in a position to co-operate.

dan, Covadongs and Usate are in a posi-tion to co-operate.

The original plan was to surround the forces of Gen. Pio Del Pilar so that he must retreat to the Morong peninsula, where capture would have been inevit-able. This was not a complete success because Gen. Hall's column found the country full of handicaps to marching. There were several streams to be bridged or forded, and the troops frequently

waist deep in mud, an experience which under the terrific sun exhausted the Americans quite beyond endurance. Most of Gen. Pio Del Pilar's followers are supposed to have escaped northward, probably reaching Bosoboso, a stronghol i in the mountains.

Ob. Whalley, having successfully completed his share of the movement, brought the Washington regiment to the river Pasig where last night about mid-

### The Boston Subway.

The Subway of Boston is undoubtedly one of the most remarkable underground transit achievements in the world, not alone for the engineering difficulties sucmore remarkable fact that this municipal undertaking, in these days of municipal construction scandals, was constructed for a sum less than that placed at the disposal of the Transit Commis-

sion by over two millions of dollars. The estimates provided for the expenditure of \$7,000,000, but the Boston Transit Commission has the proud distinction of turning over the work to the municipality (in whom the title is vested) for about \$4,800,000 - \$3,800,000 for construction, and \$1,000,000 for real estate. Through a network of streets and alleys, often not more than twenty-five feet in width, thronged during the day with teams, cars, and pedestrians, and lined on either side with buildings, the work of a cacavating the founds of tons of earth, the placing of the requisite machinery, and the carting away of the expanded material, had to be prosecuted. A perfect may of gas and water pipes, telegraph, telephone, and other electric wires was to be found. Three burial-grounds lay in the proposed course. Statues of noted persons stood at points of many localities scores of piles had to be driven to support the Subway floor. The walls were erected after a fashion caloulated to make them endure for all time.

### A Woman's Pockets.

Talk about pockets! Women are runbrought the Washington regiment to the river Pasig where last night about midmight the men embarked upon cascoes and started for their destination under the convoy of the gunboats.

They encountered a repetition of the experience undergone by almost every expedition on attempting to enter Laguna De Bay, as the boats went aground in the shallows at the mouth of the river, and were detained there several hours.

Major General Lawton, in the meantime, was indefatigable, riding from one force to the other, and supervising the loading of the cascoes, without sleep for two nights.

General Hell's column which assembled at the waterworks or pumpling station last Friday night under cover of a moomless sky, consists of a Second Oregon Volunteers, battalions of the 2nd Wisconsin regiment, four troops of the fourth cavalry, be that lines of the First Colorado regiment, and mountain gens.

At 4 o'clock yesterday morning Gatarday) they began to cross the San Mateoriver and about noon readily repulsed a large band of Flipinos about 12 miles east of Maniis.

The Oregon regiment, the cavalry, the artillery and the fourth infantry accomplished this task, driving the insurgents from the hill; the other troops being the main column in the pursuit toward the sees.

A running fight was in progress all arge band of Flipinos about 12 miles as a remained of the Pirst form hotel or sleeping-car robbers, and is so dressed that she can arry any number of small parcels without annoyance to herself or evidence to the public.

A running fight was in progress all the afternoon. A Filipino outpost first attacked a few American ecoust, where the color of the cavalry formed a long skirmish line and essily drove the insurgents into the hills. Then the Oregonians were within about a mile of the position the Fipinos opened a heavy fire, the Americans replying and pressing forward more rapidly.

After a few volleys the insurgents were seen scattering over the creat of the hills in every direction, and their panic was increased when the artillery opened upon them, and the shells began to explode all around them, undoubtedly causing great loss of life. The bombard-ment by the batteries and the musketry was maintained for nearly half an hour, after which not a Filipino could be seen

was maintained for nearly half an hour, after which not a Filipino could be seen on the hills, and not a shot came from the position.

The heat was intense and the troops suffered greatly; but they continued on the trail taken by the fleeing enemy, in the hope of driving them toward the lake.

Col. Whalley with two battalions of the first Washington regiment, a battalion of the 12th infantry, two guns of Scott's battery and a party of scouts under Mejor Jeisonberger, left San Pedro Macati yesterday morning, and after fording the river Pasig, advanced northeast upon Cainta; while Gev. Hall approached the town from the opposite direction, the gunboats Napidan, Covadonda and Oeste co-operating in the river.

This important movement was kept so secret that the public thought the plan was to send General Oveshine's lines forward against the insurgents who are entrenched south of the city. The signal corps displayed admirable enterprise in laying wires with the troops; but the mative sympathizers cut them behind the army even within the American lines.
