St. Thomas, D. W. I., Oct. 30 .- At an extraordanary meeting of the colonial council at St. Croix, Monday, the vice-chairan denounced the statements made by Mr. A. J. Blackwood, the United States Consul at St. Croix and chairman of the Consul at St. Croix and chairman of the colonial council, in an interview printed in the New York Times Oct. 20th, in which Mr. Blackwood was quoted as say-ing the sentiment of the people of the Danish West Indies is strongly in favor of annexation. The vice-chairman said the allegations made were opposed to the facts in the case and that Mr. Blackwood spoke without the council's authority. A resolution was adopted to cable King Christ an of Denmark "submissively ex-Christ an of Denmark "submissively ex-pressing" the wish of the inflabitants to contained under the Danish crown and ex- into flaky bits about the size of oysters

## Does a Moving Train Carry Along an Envelope of Air?

"There is quite a dispute in progress among the experts at present," said an experienced mechanical eng neer of this city, "in regard to the atmosphereic resistance exerted on a moving train. Some claim that every projection which can catch the wind-every flange, bolt, bar, or strip of molding-contributes just so much to increase friction and retard speed; and at tirst blush the proposition seems absolute-ly sound. On the other hand, however, butter, and add to it one-half of a cup ly sound. On absolutely reliable authority it is ascertained that Emperor William and Count Von Buelow alone negotated the greement, to the entire exclusion of Prince Hohentohe, whose policy had as its pivotal point closer relations with Russia and France. It was mainly for this reason that Prince Hohenlohe tendered his resig-nation nation.

It also appears that, in addition to a number of reasons of earlier date, Emperor William considered Russia's behavior in connection with the appointment of Count Von Waldersee and the withdrawal of her troops from Pekin to be distinctly infriendly actions. Hence the approach-ment between Great Britain and Ger-

When it is given its final tests, accurate measurements of resistance, fric-tion and so on will be made and then at last we will have something definite upon which to base our calculations. Strange to say, we have no existing data on the subject of atmospheric pressures. The 'wind splitter' advocates claim that their style of construction will decrease the air friction of a train fully 40 per cent. and effect a saving of about 20 per cent. in fuel "If that proves to be the case, the railroads of the country will not be long in adopting it, especially as the system can be applied to old cars without any great expens "The theory that a moving train carries
