Amatite ROOFING

It needs no painting

Put Amatite on your farm buildings and you need never worry, for you have a good roof.

It is a comfort also to know that you won't have to paint these roofs, for frequent painting costs almost as much as a new roof.

Amatite is waterproofed with Coal Tar Pitch, the best waterproofing material known, and it has a real mineral surface.

Write today for sample.

Fall Cultivation Notes

The field that is green with weeds is having as much moisture taken out by the weeds as a crop would use, and it is moisture that should be carried over in the soil for next year's crop. Early fall plowing will kill the weeds and save this moisture in the soil for next year's crop. The longer these weeds are allowed to grow, the more difficult it will be to plow, as the soil will become too dry.

T. E. Clarke, one of the representatives of the North Dakota Experiment Station, in Wells County, in an experiment in discing after the binder in 1913, found in the spring of 1914 that the piece thus disced was moist to depth of 3½ feet which was as deep as the auger would reach. The field adjoining, cropped in the same way, but not disced, was moist only 14 inches.

To Avoid Silo-Filling Accidents

By observing three simple rules, the farmer who is using silo filling machinery for the first time may avoid some of the accidents which occasionally damage new machinery beyond repair.

Here are the things that, according to W. E. Markey, the inexperienced man should do:

1. Be sure that the machine is being run at the proper speed.
 2. Take care that corn is never put into the machine until the motion is up to full speed.
 3. In stopping be careful not to shut off the power until the elevator is empty.
- If the elevator is not empty the cut material will fall back and lodge in the fans. Then when the machine is started again, the cut corn jams the fans and as a result they are bent or broken.

Items of Interest

At the annual picnic of Welland County Farmers' Institute, held at Crystal Beach, Ont., Mr. W. C. Good, of Brant Co., President of the United Farmers' Co., was present by invitation of the management, and spoke in the interests of the cooperative movement now in progress in Ontario, dealing chiefly with the need of co-operation among farmers, and the position of the United Farmers' Co-operative Co. thereto. Active operation of the company as soon as the busy season is over will commence.

Mr. Jas. Walker, farmer, of Scottville, Macomb County, Ill., sold at Chicago, August 19, 1914, five cars of cattle (80 head) for \$11,784.15, of which 47 steers averaging 1475 lbs. brought \$10.60 per 100 pounds, or \$154.45 per head, while 26 avg. 1878 lbs. brought \$10.50 per 100 pounds, or \$144.70 per head. These are the highest prices he ever received for such stock. Mr. Walker is 81 years old and has fed cattle and hogs for the Chicago market continuously for 52 years. Within this period he has sold the best cattle as low as \$3.75 per 100 pounds and the best hogs at \$2.50, and has seen corn selling at eight cents per bushel such as now brings eighty cents.

Model barns at exhibitions have been one of the features at United States shows. This year the Canadian National Exhibition is to have such a model barn. It will be situated at the eastern end of the grounds near the northern boundary. It is to be 56 feet by 76 feet, with two lengthwise rows of cow stalls, with ample cow stall accommodation and horse stalls and box stalls at the other end. This barn will be erected by the Metal Shingle and Siding Co.; Beatty Bros. will provide the equipment; the National Fire Proofing Co. one of the Natco silos, and the milk house is to be equipped with the latest De Laval machinery.

Reduce Your Roofing Costs, Protect Your Buildings From Fire, Lightning and Weather

You accomplish all these results using our heavily zinc coated

"Eastlake" Metallic Shingles

They give longer service than any other roofing. Cost less to lay. Are rust-proof and do not require painting. Those laid 25 years ago are still giving good service. Send for free book that shows how "Eastlake" shingles make your buildings lightning fire, and weather-proof and why they cost less per year than any other roofing.
