IS YOUR
ROOF ALL RIGHT,
and are YOU All Right
on the Roofing Question?

IF YOU cannot answer the above questions with a vigorous "Yes!" send at once for a Free Sample of Carey's Roofing and learn about its common-sense construction and practical use. Carey's Roofing gives far better satisfaction than shingles, metal or other composition roofings.

Carey's Roofing is suitable for all buildings about the farm, is adapted to flat or steep surfaces, and may be applied over old shingles without removing same. Being a perfect non-conductor, it makes the very best siding for live stock sheds and poultry houses.

CAREY'S Flexible Cement ROOFING

differs from all other composition roofings. In durability, this difference runs from ten to twenty years in favor of Carey's. Quality and durability are stamped on the very face, base and body of Carey's Roofing.

The body of Carey's Roofing is composed of an always Flexible Asphalt Cement, which for 30 years has stood all manner of severe tests. Carey's Asphalt is imitated, but never duplicated by other manufacturers. This Asphalt Cement body is protected by a heavy felt foundation and strong bur-lap imbedded in the upper surface. The three layers are compressed into indivisible sheets, the weather side of which is thoroughly treated with Carey's Fire-resisting Cement Compound.

The Carey Patent Lap covers and protects nail heads, insuring a neat, permanent, absolutely moisture-proof and wind-proof union. The recent Gulf Coast storm played havoc with tin and shingle roofs. A Carey Roof has never been known to blow off—it lasts as long as the roof boards hold.

Carey's Roofing is sold from shipping points conveniently located all over the country, insuring lowest freight rates.
