

## MELOTTE ...CREAM SEPARATORS

Are the popular farm cream separators for several reasons. One of them is illustrated here. The Bowl hangs on a hardened steel spindle which revolves in a socket fitted with ball bearings. Friction is thus reduced to a minimum, and the machine runs so smoothly as to necessitate the use of a brake, which is a feature of all the "1903" Melottes. An equally important feature of this beautiful arrangement is that the bowl is self-balancing, and thus all the annoyance and expense involved in a bowl getting out of balance is avoided. These invaluable features are possessed by no other Cream Separator. Ask our agents to let you have a machine for eight days' free trial, or write us.
